

MG

GRAM KRACKER™

THE PERIPHERAL THAT TI SHOULD HAVE BUILT YEARS AGO

- * OPENS UP AN ENTIRE NEW AREA OF MEMORY FOR ADDITIONAL PROGRAMMING AND CUSTOM MODIFICATIONS.
- * SAVES THE CONTENTS OF ANY MODULE TO DISK, CASSETTE, RAM DISK OR HARD DISK. LOADS THE SAVED MODULE INTO THE GRAM KRACKER TO RUN IT. (ALLOWS YOU TO BACK UP AND/OR MODIFY YOUR MODULES.)
- * STORES APPROXIMATELY 15 MODULES ON 1 DOUBLE SIDED DOUBLE DENSITY DISKETTE.
- * ALLOWS PROGRAMMING IN THE TI PROPRIETARY GRAPHICS PROGRAMMING LANGUAGE (GPL).
- * CONTAINS 80K OF BATTERY BACKED UP CARTRIDGE RAM AND GRAM.
- * CONTAINS ITS OWN MODULE PORT FOR EASIER SAVING OF MODULES.
- * CONTAINS 8K OF PREPROGRAMMING FOR ON-LINE SAVING, LOADING AND EDITING OF MODULES AND OPTIONAL CONSOLE GRAMS.
- * COMES WITH A UTILITY DISKETTE THAT CONTAINS MANY EASY TO RUN UTILITIES TO HELP YOU CUSTOMIZE YOUR XB, TI-WRITER AND EDITOR ASSEMBLER MODULES AND MENU SELECTIONS WHICH ALSO ALLOWS A MENU WITH ALL THREE MODULES ON IT.
- * SHOWS YOU HOW TO SET YOUR OWN DEFAULT COLORS FOR YOUR MODULES AND ASSOCIATED SOFTWARE.
- * ALLOWS YOU TO CHANGE THE DEFAULT PRINTER CONFIGURATION FOR YOUR MODULES, SUCH AS REPLACING RS232 WITH PIO.
- * EASY TO INSTALL - JUST PLUG IT INTO YOUR MODULE PORT AND YOU ARE READY TO GO!
- * SIMPLE TO OPERATE, WITH FULL EXAMPLES IN THE OPERATORS MANUAL.

THE 8K OF BUILT IN PREPROGRAMMING DISPLAYS THE FOLLOWING MENU:

1. LOAD MODULE
2. SAVE MODULE
3. INIT MODULE SPACE
4. LOAD/SAVE CONSOLE
5. EDIT MEMORY

JUST PRESS 1, 2, 3, 4 OR 5 TO PERFORM THE FOLLOWING:

LOAD MODULE

LOADS ANY MODULE OR BASIC PROGRAM PREVIOUSLY SAVED WITH THE SAVE MODULE SELECTION. THIS SELECTION WILL ALSO ALLOW YOU TO LOAD ANY UTIL1 OR RUN PROGRAM FILE TYPE FILE. THE MODULE LOADING AND UTIL1 TYPE FILE LOADING CAN AUTOMATICALLY BE CHAINED TOGETHER WITH A BUILT IN GRAM KRACKER OPTION. THIS MEANS THAT YOU CAN LOAD UP TO 88K BY TYPING IN 1 FILE NAME!

SAVE MODULE

SAVES THE CONTENTS OF ANY MODULE PLUGGED INTO THE GRAM KRACKER MODULE PORT TO DISK, CASSETTE, RAM DISK OR HARD DISK. THIS SELECTION WILL ALSO SAVE THE CONTENTS OF THE GRAM KRACKER'S RAM AND GRAM OR YOUR BASIC PROGRAM THAT HAS BEEN SET UP IN GRAM WITH OUR UTILITY. TO SAVE A MODULE, SIMPLY PLUG IT INTO THE MODULE PORT, SELECT 2 AND TYPE IN THE FILENAME TO SAVE IT TO.

INIT MODULE SPACE

CLEARs OUT THE GRAM KRACKER'S MODULE RAM AND GRAM.

LOAD/SAVE CONSOLE

ALLOWS YOU TO LOAD AND SAVE THE CONSOLE GRAMS, THAT CAN BE TURNED ON AND OFF IN PLACE OF THE CONSOLE GROMS.

EDIT MEMORY

BRINGS UP A FULL SCREEN MEMORY EDITOR SIMILAR TO THE EXPLORER'S EDITOR. THIS EDITOR ALSO ALLOWS YOU TO MOVE BLOCKS OF MEMORY, FROM ANYWHERE TO ANYWHERE, FILL ANY BLOCK OF MEMORY WITH A DESIGNATED BYTE OR DUMP ANY BLOCK OF MEMORY TO A SELECTED OUTPUT DEVICE IN HEX, ASCII AND ASCII WITH THE BASIC BIAS. (PLEASE NOTE: EDIT MEMORY AND LOAD AND SAVE CONSOLE SELECTIONS REQUIRE MEMORY EXPANSION)

UTILITY DISKETTE

CONTAINS FILES THAT WILL; ADD NEW CALLS TO EXTENDED BASIC, ADD THE EDITOR AND FORMATTOR TO THE TI-WRITER MODULE FOR INSTANT ACCESS, ADD THE EDITOR AND ASSEMBLER TO THE EDITOR/ASSEMBLER MODULE FOR INSTANT ACCESS, MOVE THE TI-WRITER AND EDITOR/ASSEMBLER MODULES TO DIFFERENT GRAM CHIPS FOR MORE THAN ONE ITEM ON THE MENU, ALLOW YOU TO WRITE BASIC PROGRAMS AS MODULES, CHANGE THE DEFAULT CHARACTER SETS AND MORE.

GRAM KRACKER CONTROL PANEL

GK Off

Allows you to manually turn off the Gram Kracker's module space. This permits the "Gram Kracker" selection to be displayed on the menu when an Auto Start module has previously been loaded into the Gram Kracker.

Normal

The normal operating position for the Gram Kracker. With the switch in this position the Gram Kracker's module space will automatically be turned off when a module is plugged into the Gram Kracker's module port. (No need to remove the Gram Kracker to use other modules)

Reset

Executes the Power Up routine to reset the computer back to the main Title Screen.

Gram 0

Turns on an alternate operating system or Title Screen when an alternate or modified Operating System has been loaded into Gram 0.

Op Sys

Enables the normal TI Operating System and Title Screen in Grom 0.

Gram 1-2

Disables TI Basic and enables Gram in its space. This allows you to have other modules or programs in this space or to modify TI Basic.

TI Basic

Enables the normal TI Basic language in Groms 1 and 2.

Bank 1

Turns Off write protection and enables Bank 1 of the Module Ram space.

W/P

Turns On write protection for the entire module space and for Gram 0 (Alt Op Sys).

Bank 2

Turns Off write protection and enables Bank 2 of the Module Ram space.

Loader On

Places the "Gram Kracker" selection on the menu which enables it's internal software.

Loader Off

Disables the Gram Kracker's internal software.

SPECIFICATIONS

Contains the following CMOS Memory:

- 24K Console Gram >0000 - >5FFF
- 40K Cartridge Gram >6000 - >FFFF
- 16K Cartridge Ram 2 Banks >6000 - >7FFF
- 8K System Rom/Grom (Internal Software)

All memory is battery backed up by a Lithium Battery so you do not have to reload it each time you use your computer.

The following are Gold Plated for High Reliability and Long Life:

- Module Interface - Computer Connection
- Control Switches - Logic to Memory
- Board Connections - Gram Sockets

NOTE: The Gram Kracker requires a minimum system but it can be used with all memory expansion and disk controller systems currently available.

80K GRAM KRACKER - ORDER NUMBER GK01 - 189.00 + 4.00 FOR S/H

THE ORPHAN CHRONICLES

A Review by John Gardner

"What a Book! To give you the old cliché that I stayed up half the night reading it would not be a lie. In point of fact, I read it in one day. Not that I am a voluminous reader or that it is a small book, but it is a book that will surely command your attention. If you now have one of these orphans, had one before or ever plan on getting one, or if you would just like to know why TI bailed out.

Dr. Albright takes us from the inception of the 9900 chip (the first 16 bit) to the building of the Ill-fated 99/4.... The computer wars that led to the sale of this machine for less than it cost to manufacture, the magazines, the users groups, the good guys and the not so good....

A great book to those of us who still lie awake at night wondering why TI did not bring out the 99/8 to counter the commodore 64 and why everyone had new programs but us. A thousand questions will be answered and you'll be entertained to boot! The 4A did not die of its own accord, it was ultimately strangled by its manufactures ineptitude and bad marketing decisions. The simple fact that it is still in use attests that it was, is and will remain a great machine! The Orphan Chronicles is a book well worth reading."

THE SMART PROGRAMMING GUIDE FOR SPRITES

This 80 page book will show you some of our professional programming secrets on how to:

Use CALL PEEK to speed up your programs.

Get Sprites to pick up objects, eat dots and lay down a trail.

Shoot Sprites without missing a coincidence.

Make one Sprite chase another or generate moving Sprite patterns.

Easily convert Sprite rows and columns into graphic rows and columns and visa versa.

Use 3 different CALL KEY and 3 different CALL JOYST examples for moving Sprites around the screen.

Write a general bar graphing program (To one pixel accuracy) that shows you Sprites aren't just for games.

Full of fast running and byte saving examples that you can use in your existing programs or combine together to write your own programs. Each example program is FULLY documented in a step-by-step method that is easy to understand. This book is written exclusively for your TI 99/4A computer and the Extended Basic command module.

DISKASSEMBLER

THE SMART DISK OR MEMORY DISASSEMBLER

- * ALLOWS YOU TO DISASSEMBLE DIS/FIX 80 OR PROGRAM IMAGE FILES, CONTAINING 9900 ASSEMBLY CODE, RIGHT OFF THE DISK OR TO DISASSEMBLE MEMORY.
- * OUTPUTS AN 80 COLUMN DISPLAY, COMPLETE WITH SOURCE CODE, OPCODE DATA, TEXT AND ADDRESS, FOR EACH INSTRUCTION TO ANY STANDARD DEVICE. UP TO 3 OUTPUT DEVICES CAN BE ON AT ONCE AND THEY CAN BE TURNED ON AND OFF AT WILL.
- * GENERATES FULLY LABELED SOURCE CODE ON THE SECOND PASS, COMPLETE WITH REFS, DEFS, EQUATES AND A SYMBOL TABLE LISTING.
- * EASILY HANDLES DATA, TEXT AND DATA FOLLOWING SUBROUTINES AND IT AUTOMATICALLY SPLITS UP DATA OR TEXT BLOCK AND INSERTS LABELS AS NEEDED AND IT AUTOMATICALLY HANDLES THE DATA FOR BLWPs.
- * GENERATES SOURCE CODE THAT IS 100% READY FOR RE-ASSEMBLY FOR MOST FILES WITH VERY LITTLE, IF ANY, EDITING.
- * CONTAINS AN AUTOMATIC DSR DISASSEMBLY OPTION WITH CRU BASE SELECTION, A REGISTER OPTION, AN EXTENDED LABEL CHECKING OPTION, A TEXT BEFORE DATA OPTION, AND A BASIC BIAS OPTION.
- * ALLOWS RETRO SCREEN CAPTURE TO ANY STANDARD OUTPUT DEVICE.
- * AUTOMATICALLY GENERATES A SEPARATE REF, DEF AND EQUATE FILE FOR YOU, SO YOU CAN SIMPLY ADD THE NECESSARY COPY DIRECTIVES TO IT FOR EASY REASSEMBLY.
- * IT'S SO FRIENDLY IT EVEN PUTS THE END DIRECTIVE IN FOR YOU.

DISKASSEMBLER

THE PERFECT COMPLEMENT TO ADVANCED DIAGNOSTICS AND EXPLORER
FOR THE SERIOUS PROGRAMMER!

GET READY TO LEARN

If you are ready to learn what REALLY makes the 99/4A tick then we have the Tools for YOU. It may look complex but, the EXPLORER is SMART. Just load it and press a Single key and it will start right up were the Application Program or Module left off, but YOU will be in FULL CONTROL!

Whether you want to understand the 4A a little better, how the Basic Languages work, or you are learning Assembly Language, there is nothing else like it when it comes to Power, Control and Education. The EXPLORER and its Documentation open up a whole new world and reveal some amazing things about our 99/4As!

EXPLORER

YOUR WINDOW INTO THE 99/4A

Have you ever wondered how CALL SOUND, CALL SAY or the GPL Interpreter actually works? Or how Parsec sets up and scrolls its bit mapped screen? Or exactly what Extended Basic is doing when you type in LIST or RUN and it executes a program? Or how about the Interrupt Routines?

Imagine what else you could LEARN if you had an instrument that gave you total control over the microprocessor in your computer and you could stop and start it at will, at any point in a program or module and it allowed you to examine and change memory, or any of the registers or Cru Bits.

Well stop imagining because the Explorer turns our 99/4As into that powerful Instrument and Learning Tool! The heart of the Explorer is a machine language interpreter that thinks its a 9900 microprocessor. This allows you to be in TOTAL CONTROL of the application program so You can watch the Explorer's Main Screen with all of its dynamic information or flip to the ACTUAL Program Screen running in slower motion under YOUR control.

Along with ALL the other items on the Main Screen, You can also track up to 3 Dynamic Memory Windows for any area of CPU Memory, VDP Memory or GROM/GRAM Memory, in any one of 4 sizes. You can also Track, Display, Edit and Search any area of memory in Hex, ASCII and in ASCII with Basic Bias. This powerful interpreter also allows you to lock in Break Points for ROM or RAM, Any VDP Write or Read and Any GROM or GRAM Memory access. And, at any time, You can easily modify any of the items on the Explorer's Main Screen or, with the aid of the Explorer's Registers Screen, the GPL Status and VDP Registers.

The number converter on the Explorer's Options Screen uses the same mathematical logic as the 9900 microprocessor. It will Add, Subtract, Multiply, Divide, AND, OR, XOR or NOT numbers in all three, Decimal, Hexadecimal and Binary, number bases at the same time so you can easily calculate what's going to happen next, before it happens. And, Yes, it will convert negative numbers and numbers into their CALL PEEK or LOAD addresses.

To further assist you, and help explain what is going on, the actual 9900 source code for the next instruction to be executed is displayed. Also, the ENTIRE Main Screen is Dynamically updated after each and every instruction is executed, so you can examine, learn and control it step-by-step or TURN IT ON and watch it GO!!

This is an extremely easy Utility Instrument to use with its Function and Control Keys, Binary Switches, and its Full Screen Edit Control fields. It also includes a function key strip and an extensive 112 pages of documentation complete with Step-By-Step Explorations, Memory Maps, Register Information and Cru Bit and Peripheral Assignments.

However, its only fair to warn you!

**Millers Graphics has determined
that the EXPLORER is very hazardous
to your sleep!**

- Expanded System Requirements -

Extended Basic or Editor Assembler or Mini Memory
Memory Expansion and a Single or Double Density Disk Controller System.
(currently not compatible with Myarc's MPES-50 Mini Peripheral System)

Order Number **UT02**

Price **24.95**

NIGHT MISSION

NOW AVAILABLE FOR YOUR TI-99/4A COMPUTER
THE MOST EXCITING PACKAGE EVER OFFERED

NIGHT MISSION... THE GAME

Night Mission is Millers Graphics' newest action packed extended basic game. Designed by Mike McCue, it won first place award in the New York State competition against games for the TI, Atari, Commodore and Apple.

If You Liked PARSEC... You'll love NIGHT MISSION!

- Five, action filled screens squeezed into the computer's full 16K memory.
- Lightning fast action... amazingly quick response... you'll swear you're playing an assembly language game.
- Exciting use of color, animation, graphics and **advanced** sound effects.

DISCOVER THE HIDDEN POWER OF THE TI-99/4A COMPUTER

NIGHT MISSION... THE BOOK

The Author's Reveal Their Professional Programming Secrets For Making Fast, Action-Packed, Arcade Games In Extended BASIC

The Night Mission Book is a follow up to "The Smart Programming Guide for Sprites." It dissects the Night Mission game using the special MG flow chart method. You can easily follow the program line by line, giving you an in-depth working knowledge of TI graphics, sounds, sprites and program structure. You can modify any portion of the program to suit your taste or curiosity, and use the subprograms in your own games.

The Night Mission Book Lets You Unlock The TI-99/4A Computer's Potential.

Learn How To:

- Use the powerful Boolean function AND to your advantage.
- Use CALL PEEKs and CALL LOADS with new addresses.
- Write flawless coincidence routines.
- Easily use complex mathematical formulas to speed up your programs.
- Use optical illusions in your programs for color and special effects.
- Improve your use of variables, pre-scan and character definitions to create a faster running program.
- Use **Advanced** sound effects like the ones found in PARSEC.
- Create incredible graphics within the computer's limited 32-143 character range.

Optional equipment: Disk System - Memory Expansion

NIGHT MISSION

Enemy tanks roam the desert where the hostages are held. Their lethal cannons can cripple your chopper and send it to a fiery grave . . . or kill the hostages trying to flag you down. You must maneuver your chopper through enemy fire until you have picked up your capacity of five hostages, then return to the base ship.

You'll also encounter Soviet built MIG-21 fighters, and the enemy's fleet of powerful military choppers armed with nuclear tipped missiles.

Finally safety is within reach, the base ship is in sight. All your flying skills will be necessary to land your chopper gently on the back of the moving ship. Be careful . . . a false move could sink the ship and all will be lost!

Now you must return for more hostages, but the enemy has increased it's defenses and changed its strategy. Can you once again successfully meet the challenge and rescue the hostages?

CONFIDENTIAL

- MISSION COMMANDER:
- COMMERCIAL AIRLINER DOWN!
- HOSTAGES TAKEN IN ENEMY TERRITORY!
- SCRAMBLE YOUR CHOPPERS!

Your Mission . . . rescue hostages and rendezvous with an awaiting base ship. You'll be piloting the most sophisticated chopper known to man . . . with incredible maneuverability . . . a fatal sidewinder missile launcher, and powerful laser cannon.

You must have nerves of steel, a quick trigger finger, and superior flying skills to successfully complete your mission.

As you leave the desert, the enemy will activate its defenses and scramble its Air Force to prevent your return. You'll have to avoid their deadly surface-to-air missiles.

As you increase in altitude, you'll be engaged in the most destructive high-altitude dogfight you have ever experienced . . . and your sidewinder missiles are your only hope.

THE SMART PROGRAMMER

We have some GREAT news for you regarding The Smart Programmer Newsletter. Many of you have been wondering when the last issues for your subscription would be published and how we were going to handle renewals and new subscriptions and what we were going to do next.

Well, we are very pleased to be able to announce that Bytemaster Computer Services has purchased ALL rights to The Smart Programmer. It will now be a true MONTHLY publication, starting in April 86'. Bytemaster Computer Services, which is owned by Richard Mitchell, has been publishing their own newsletter, Super 99 Monthly, on a REGULAR MONTHLY basis now for 18 issues!

This merger of The Smart Programmer Newsletter and Super 99 Monthly into a MONTHLY 16 page Smart Programmer, will allow for improved service and a TIMELY publishing schedule. At last, The Smart Programmer will become what it was intended to be; An informative international MONTHLY newsletter devoted to the 99/4A.

We have known Richard Mitchell for some time now and his honesty and integrity along with your desire to keep The Smart Programmer going is what prompted this great merger. The Smart Programmer will not only become a regular monthly publication but it will continue to be an informative one as well. Richard currently has some very talented writers contributing to his newsletter and we, of course, along with Doug Warren, will continue to write articles and memory maps.

Your subscription to The Smart Programmer will continue for the next four issues, starting with the issue to be released in April 86'. So now, everyone that wanted to renew or subscribe to The Smart Programmer should do so by contacting:

Bytemaster Computer Services
 171 Mustang Street
 Sulphur, LA 70663
 (318) 527-0035

The subscription and renewal rates are: 15.00 for U.S. and possessions - 18.00 for Canada - 20.00 for Foreign Surface Mail - 32.00 for Foreign Air Mail.

Now is the time to Subscribe or Renew!

ORDER FORM

TO ORDER:

Fill out the order blank below with quantity and description of each item and enclose a check or money order. Sorry no COD or credit card orders. All foreign orders must be payable in United States CURRENCY drawn on a United States BANK or with an International or Postal Money order.

Send the completed order form and payment to:
