## AMAZING ADVENTURES IN THE SPACE PIRATE'S ASTERIOD STRONGHOLD

### SCENARIO

You are Herbie, a strange blue intergalactic salvage expert. Like all of the children of your race you were taught the legend of the space pirate. It is said that in the last hours of life the space pirate used the full power of his ship to blast a tunnel through the core of a small asteriod somewhere in the Metabelious VII star system. He then scattered his great treasure throughout the massive tunnel. At the very center of the asteriod he locked away the Chest of Wealth. Finally he set loose the horrors of the universe and set forth to greet Destiny. All those who have seeked the treasures of the asteriod have failed.

After years of searching you have finally found the asteriod. As the game begins, your small ship sets down on its surface. Great wealth awaits... if you survive.

**START THE GAME-** To begin go into Extended BASIC and type in RUN"DSK1.ADVENTURE".

**OBJECT-** The point of the game is to make it all of the way through the asteroid with as many treasures as possible.

**MOTION-** Herbie is moved using the eight directions of the joystick.

**WIND CURRENTS-** At certain points in the tunnel are wind currents. You will hear the currents as they blow Herbie around. The wind might harmlessly blow you to a new location or it might smash you into a wall. To overcome the wind you are equipped with a jetpack. To use the jetpack hold down the button on the joystick. It will only work in a wind current. Warning: Using the jetpack uses up your oxygen.

**OXYGEN-** You begin with 1000 units of oxygen and get 300 bonus units when you reach the center of the asteroid. Oxygen is used up when you smash into a wall or when you use your jetpack. When you run out of oxygen you die.

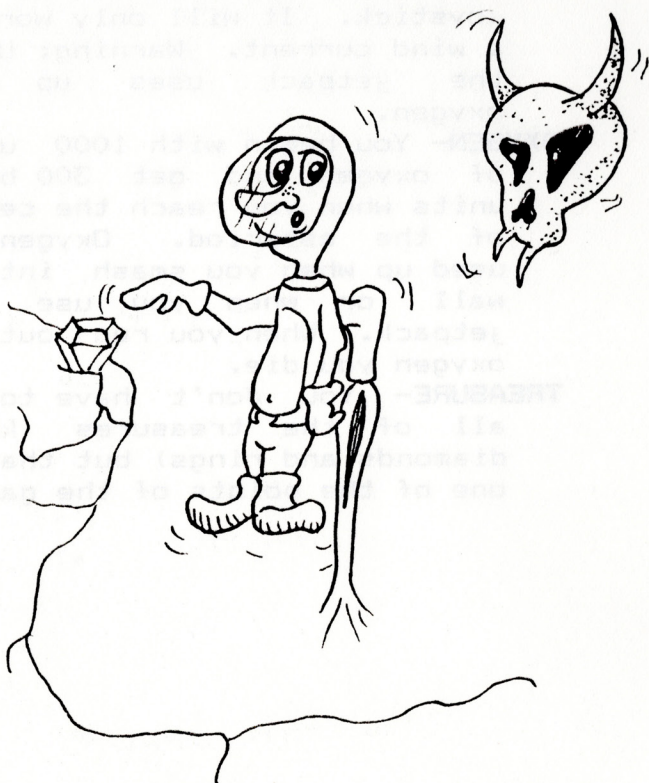

**TREASURE-** You don't have to get all of the treasures (keys, diamonds and rings) but that is one of the points of the game.

**DEMON OF BAD LUCK-**  (red) At some point during the game he will chase after you. Stay away from him-- The Demon of Bad Luck will steal your treasures.

**DEMON OF GOOD LUCK-**  (yellow) He doesn't move, but when you capture The Demon of Good Luck he will make The Demon of Bad Luck go away.

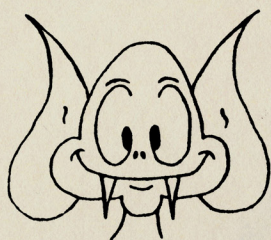

**VENUSIAN FLY TRAPS-**  These strangely colored beasts have acquired a taste for small blue aliens. Stay away.

**POISONOUS GAS-** At the top of the screen is a layer of poisonous gas. Run into it and you will die.
