

INSTRUCTION BOOKLET

CARS & CARCASSES 2 is a game of driving skill for one player. You are given a car with which to run over fifty monsters (Draculas, Frankensteins, and Space Monsters) who are invading your city. You have 200 turns to accomplish this task.

The screen shows a field with randomly placed trees and the 50 monsters, also randomly placed. Your car appears on the right edge of the screen, going upwards. Press 'M' or 'N' to turn right, press 'Z' or 'X' to turn left. If you press nothing the car will continue to move straight ahead. If you hit a monster it blows up. If you hit a tree you will be thrown in a random direction and your score will suffer. If you go off the edge of the screen the game will be over.

Remember: it is possible to hit every monster, even the ones in the corner, but it takes some practice.
