FALL '86 CATALOG

... **Dozens of Exciting New Products**

... **Lowest Prices Ever on TI EXTENDED BASIC, TI-WRITER WORD PROCESSOR and MULTIPLAN SPREADSHEET**

... **Most Complete Selection of Products Ever Offered**

SYSTEM EXPANSION THROUGH MEMORY, CASSETTE OR SOFTWARE

Your TI-99/4A has a powerful 16K Random Access Memory (RAM). You can expand RAM up to 48K by adding either a 32K Stand-Alone or a Peripheral Expansion System with 32K built-in, such as the ones featured on pages 2 and 4.

Some software programs such as *TI LOGO II* (page 21) require only Expanded Memory capability. Other software programs, such as *Editor/Assembler* (page 6), *TI-Writer* (page 17), and *Personal Report Generator* (page 17), require both Expanded Memory and a Disk System.

Perhaps the ultimate home computer skill is original programming. You achieve maximum satisfaction and challenge when you design your own information packages . . . create your own games . . . fulfill your most minute program specifications.

Tackling programming is now easier than ever before.

TI Extended BASIC (below) multiplies programming capabilities if you want to step up from TI BASIC . . . design more advanced operations . . . write complicated programs . . . get the most out of hardware, disks and memory expansion.

Therefore, it's important to decide how you want to use your TI-99/4A before deciding how to expand its memory.

To take advantage of many of the cassette format programs available, all you need is a Cassette Recorder and connecting cable. The Cassette Recorder is controlled by the computer. A Cassette System is also an inexpensive way to store information . . . providing reliable loading and retrieval of data on standard cassette tapes. However, a Cassette System operates slowly compared to a Disk System. To decide on a Cassette System vs. a Disk System weigh your desire for reliability and speed against cost.

PRICE BREAKTHROUGH

TI EXTENDED BASIC

IF YOU OWN A 99/4A AND HAVE NOT PURCHASED THE EXTENDED BASIC CARTRIDGE, NOW IS THE TIME TO BUY.

With the *TI Extended BASIC* cartridge you can run the huge assortment of programs that require it. Take a minute and look through this catalog at the many cassette and disk-based programs which require *Extended BASIC*. Also, most of the new programs being introduced require *Extended BASIC*.

TI Extended BASIC multiplies programming capabilities if you want to step up from *TI BASIC* . . . design more advanced operations . . . write more complicated programs . . . get the most out of new hardware, disk and memory expansion.

Total enhancements with expanded systems include longer programs, automatic loading and running of another program. Includes a PEEK , option to directly retrieve numbers from memory. And former TI BASIC programs run perfectly in Extended—no need to throw them away!

CARTRIDGE #AEBA   **$29.95**

WRITING YOUR OWN PROGRAMS/UTILITIES

Perhaps the ultimate home computer skill is original programming. You achieve maximum satisfaction and challenge when you design your own information packages and create your own games.

Tackling programming is now easier than ever before with this array of aids. Here conveniently

together are all the materials you need for writing your own programs, even if you never thought you could!

Remember: creating your own programs may require Memory Expansion and a Disk or Cassette System. Look again at 32K Memory Expansion (pages

3 and 4), Disk Systems (pages 2 and 3), and Cassette Systems (page 4). Although not required, Printers are recommended for several programs (page 16). Be sure to check the required and recommended specifications for each item you order to make sure you have everything you need.

New! THE SUPERSPACE II 32K MEMORY MODULE
NOT JUST ANOTHER MEMORY EXPANSION

Have you ever wished for a cartridge with all your favorite software? *SuperSpace II* gives you the power to create your own cartridge-based software. Load in your own assembly code, vacuum software out of other cartridges, or even save your favorite ROM cartridges to disk and run them at the touch of a single key! Design your own menu loader for up to 7 assembly language programs with this ingenious module, equipped with a battery to save your programs in memory for at least two years.

Included with the cartridge in this great package is a built-in Editor/Assembler GROM and a free Editor, Macro Assembler disks, and the *SuperSpace II* manual, plus *Introduction to Assembly Language* and another bonus book. To get you started, a menu and cartridge loader are provided, along with E/A utilities, GROM header templates, a bitmap graphics demo and a free "C" compiler. (Requires Disk System and Memory Expansion. *Editor/Assembler Manual* recommended.)
ITEM #BHDL   **$99.95**

New! THE SUPERSPACE 8K MEMORY MODULE

All the features of *SuperSpace II* but with 8K of memory. Does not include the books or "C" compiler.
ITEM #BHDV   **$49.95**

EDITOR/ASSEMBLER MANUAL
ITEM #XXEA   **$10.95**

New! SUPER 4TH

Explore the world of FORTH with this exciting new 2-diskette package which comes complete with a DECOMPILER and a clearly-written manual.

Super 4th is a language, ideal as a step-up from BASIC and clearly superior to *TI-Forth*. *Super 4th* is almost as fast as Assembly but much easier to learn. Unlike other versions of FORTH, *Super 4th* supports both speech and sound.

Because *Super 4th* runs in *SuperSpace* or *SuperSpace II*, you get 8K of additional RAM for your applications. You even get a powerful demonstration of FORTH applied to recreating a Bach musical masterpiece! (Requires Disk System, 32K Memory Expansion and *SuperSpace* or *SuperSpace II*.)
DISK #BHDW   **$24.95**

EDITOR/ASSEMBLER

This software cartridge allows programming in TMS 9900 Assembly Language. Gives direct access to all system features—sound, speech, graphics, I/O. Links into TI BASIC/Extended BASIC programs through a subroutine call. (Requires 32K Memory Expansion and Disk System.)
CARTRIDGE & DISK #AEBC   **$29.95**
+ $3.00 shipping charge

INTRODUCTION TO THE ASSEMBLY LANGUAGE

Takes you from programming in TI BASIC to the far-more-powerful Assembly Language. Not just a reference manual —but 11 full-fledged lessons, plus character definition and bargraph programs. On completion, you will be able to code simple programs in 9900 Assembly. You'll also be better prepared to use your equipment and reference guides to develop more complex routines. 139 pages, extra-large paperbound format. (Requires familiarity with TI BASIC, as well as 32K Memory cartridge or *Mini Memory* cartridge and Cassette System.)
BOOK #UCAA   **$9.95**

SCREEN DUMP II PACKAGE

A fast, easy, resident program from Quality 99 Software. Print the screen in normal or full-page size in seconds by simply pressing a key. No programming is required.

Included in this package is the *CorComp Load Interrupt Switch*. This, combined with *Screen Dump II*, allows you to print the screen of cartridges such as *Video Chess, Tax/Investment Record Keeping, Personal Real Estate, Home Budget Management*, etc. (Requires 32K Memory Expansion, *Extended BASIC* or *Editor/Assembler* or *Mini-Memory* cartridge and TI, Axiom GP-100, Epson, Gemini, Panasonic, or ProWriter compatible printer.)
DISK #ZZXP   **$29.95**
CASSETTE #ZZXY   **$29.95**

MINI MEMORY

This versatile cartridge adds 14K of additional memory to your TI-99/4A and has a built-in battery to preserve data or programs stored in its memory. *Mini Memory* can also be used to store your frequently-used TI-BASIC programs. It allows faster loading than your tape or disk.

Mini Memory even allows you to use Assembly Language programs and troubleshoot them with the included *EASY BUG* debugging system. (Cassette System recommended.)
CARTRIDGE #AEBD   **$29.95**

QUICK-COPIER II

Save time and work by backing up a disk in 3 passes or less, no matter how full the disk is. Full or selective backup. Transfer single-sided disk and/or single-density to double-density, or visa versa. Reorganize the copy disk for faster access. Automatically verify the copy disk so you know your copy is good. Written in assembly language by Quality 99 Software. (Requires 32K Memory Expansion and *Extended BASIC, Mini-Memory* or *Editor/Assembler* cartridge.)
DISK #BBBK   **$19.95**

New! DISK MASTER I DISK MANAGER

Everyone that tries it loves it. The user groups are giving it "A" and "A+" reviews!

Features include full screen edit where you can display or edit in HEX or ASCII, configure up to 5 diskettes and save all configure features, format multiple disks all at once, load and run assembly files without modules, recover deleted files, initialize disks in any format, do diskette tests, implement all file utilities at one time and much more. *DiskMaster I* can be loaded from your console, *Extended BASIC, Mini-Memory, Editor/Assembler* or *TI-Writer* using any disk controller card. From DataBiotics.
DISK #DIIDO   **$19.95**

New! DISK ASSEMBLER

DiskAssembler is the perfect complement to Advanced Diagnostics and MG Explorer for the serious programmer!

This program will disassemble computer memory and DIS/FIX 80 or program type files right off the disk. This allows you to modify existing programs and/or examine programming techniques. It can output to a printer, floppy disk, RAMdisk or hard disk. Generates fully labeled 80 column source code listings complete with REF, DEF, EQUATE and symbol table list. Easily handles TEXT or DATA and automatically inserts labels where needed. Contains automatic DSR disassembly option. Includes function key overlay and an extensive 54-page manual complete with examples. (Requires *Disk Controller*, 32K Memory Expansion and *Extended BASIC, Editor/Assembler* or *Mini-Memory* cartridge.)
DISK #BHDX   **$19.95**

The computer is an infinitely patient, non-critical, personal teacher. It never gets tired of repeating . . . never pushes at a faster pace than the child can absorb. Yet it is never boring. It recognizes the instant a skill is mastered and immediately proceeds to challenge with the next lesson or level of mastery.

Children who need help in one particular subject can repeat, review, retest . . . without embarrassment, in total privacy. And gifted children can set their own fast pace. They can master more subjects than their school curriculum allows . . . learn at higher levels than their current grades.

The computer turns learning into fun. Built into the programs here are the same techniques that make games so exciting.

Computer tutoring benefits parents, too. When parents are too busy, the TI-99/4A is always available—at any hour, on weekends and during vacations.

On these pages, a selection of educational programs for cartridge, disk and cassette-based systems—for every age and every area of learning.

To get the most from the software you select, note whether the following additional equipment is required or highly recommended: 32K Memory Expansion (pages 2, 3, and 4), Disk and Cassette Systems (pages 2 and 4), RS232 Interface (pages 2, 3, 4, and 5) and Printers (page 16).

For some programs, Joysticks (page 10) help to engage the child's skills most fully. For other programs, the *TI Speech Synthesizer* multiplies the computer's user-friendliness . . . adds a warm human element as it coaxes the child to do his or her best.

PRICE BREAKTHROUGH

TI SPEECH SYNTHESIZER

A marvel of solid state technology, this popular peripheral reproduces human speech electronically, accurately and realistically—with a variety of inflections and appropriate pitch. Ideal for children too young to read the screen . . . while older students benefit from voice interaction. Plugs directly into the TI-99/4A console without external cables. When used with software designed for speech, gives voice instructions, asks and answers questions. With *Speech Editor* cartridge (not offered in this catalog) or *Extended BASIC* cartridge, allows you to add speech to your own programs drawn from a vocabulary of 370 words. With *Terminal Emulator II* cartridge, provides virtually unlimited text-to-speech capability.

X-10 POWERHOUSE
Protect your home . . . Save on utilities . . . Regulate appliances . . . and more!!!

It can wake you up to your stereo or television. Light up your bedroom, hallway or bathroom. Start your coffee, central heating or air conditioning, warm up the curlers, all before you even get out of bed. But it's smart enough not to wake you up on weekends. At night it can lower your heat, play music or your favorite late night TV show for as long as you want, first dim and later turn the lights out automatically.

The X-10 PowerHouse Interface is programmed using the CorComp 99 Home Sentry cartridge and your TI-99/4A. **It's easy and takes only minutes!** You can then turn off your computer or use it for something else.
It does not tie up your computer. The software shows a graphical representation of your home and allows you to select a room, then select a light or appliance to be controlled. The interface sends digital signals over your existing house wiring to control your lights and appliances which are connected to plug-in modules (sold separately). Relax and enjoy the convenience, security, safety and energy savings of your automated home with a new X-10 PowerHouse system.
