Dear TI-99/4A Owner:

Expanding your TI-99/4A's software library and hardware capabilities is the single most important reason we have sent you this, the latest issue, of your new catalog!

Over the past few months we have researched dozens of new offerings—entertainment and educational software and hardware—all designed for your TI-99/4A. In addition, we have kept the very best from previous catalogs.

On the following pages you'll find a variety of what we call Super Specials—highlighted by a bright yellow background—each featuring popular items at incredible values!

On pages 8 and 9 you'll find our Super Combination Special— You pick any 6 entertainment, education or home management programs—all for only $29.95.

Other new items include a banner program (page 18) that will turn your printer into a custom signmaker and on page 16 we've introduced a Smith Corona Dot Matrix printer at the unbelievably low price of only $99.95 as part of another special offer.

And if you're a previous customer, you already know how easy it is to shop with Triton. Customer satisfaction is completely guaranteed. Our courteous customer service personnel are always available to answer your questions and speed your order directly to your home. Or use the convenient order form attached in the center of the catalog. And as an added bonus, we've added three valuable coupons to the order form to make shopping Triton even more fun!

We want you to feel good about dealing with Triton. All products are covered by full manufacturers' warranties. In addition, our customer satisfaction warranty is detailed to the right.

We are always trying to improve. If you have any suggestions please don't hesitate to write to me directly.

Sincerely,

E.S. Herman

E. S. Herman

If you're like most TI-99/4A owners, sooner or later you'll probably want to upgrade your system. The reason is simple. As you grow more and more familiar with your computer, you'll want to use it more and for more complex tasks.

How to expand your system depends on the level of capability you want. For instance, software for your TI-99/4A is available in three formats—cartridge, disk and cassette. Most cartridges containing pre-written programs are simply plugged into the cartridge port on the console. However, some cartridge programs, such as *Household Budget Management* (page 9), require a Disk or Cassette System or the program will not work. For other cartridges a Disk or Cassette System is recommended or optional, which

means the program will run without the added hardware, but you won't get the full power of the program. For still other cartridge programs such as *TI LOGO* page (17), you must have 32K Memory Expansion capability and either a Disk or Cassette System is recommended.

This page and the one following provide guidance to help you make the best product choice for selecting Memory Expansion and either Disk or Cassette capability. Other pages provide information on additional hardware for even more enjoyment from your TI-99/4A: Modems (page 5), RS232 Interfaces (page 5), Printers (page 16), Joysticks (page 10), and Speech Synthesizer (page 17).

SYSTEM EXPANSION THROUGH DISK

SYSTEM EXPANSION THROUGH MEMORY, CASSETTE OR SOFTWARE

Your TI-99/4A has a powerful 16K Random Access Memory (RAM). You can expand RAM up to 48K by adding either a 32K Stand-Alone or a Peripheral Expansion System with 32K built-in, such as the ones featured on page 3.

Some software programs such as *TI LOGO* (page 17) require only Expanded Memory capability. Other software programs, such as *Editor/Assembler* (page 6), *TI-Writer* (page 17), and *Personal Report Generator* (page 17), require both Expanded Memory and a Disk System.

Perhaps the ultimate home computer skill is origi-nal programming. You achieve maximum satisfaction and challenge when you design your own information packages . . . create your own games . . . fulfill your must minute specifications.

Tackling programming is now easier than ever before.

TI Extended BASIC (below and page 6) multiplies programming capabilities if you want to step up from TI BASIC . . . design more advanced operations . . . write complicated programs . . . get the most out of hardware, disks and memory expansion.

Therefore, it's important to decide how you want to use your TI-99/4A before deciding how to expand its memory.

To take advantage of many of the cassette format programs available, all you need is a Cassette Recorder and connecting cable. The Cassette Recorder is controlled by the computer. A Cassette System is also an inexpensive way to store information . . . providing reliable loading and retrieval of data on standard cassette tapes. However, a Cassette System operates slowly compared to a Disk System. To decide on a Cassette System vs. a Disk System weigh your desire for reliability and speed against cost.

PLUGGING-IN TO TELEPHONE NETWORKS

Here is a whole page devoted to the hottest, latest example of computer miracle-working: telecommunications.

All TI-99/4A owners can join in one of the most exciting areas of home computer growth: telephone computer networks. Through your phone, you can access a whole universe of data bases.

By subscribing to CompuServe Information Service, an on-line information and communications network, you can talk to other computer operators—or let your computer talk to theirs. Shop and bank by direct tie-in . . . send and receive electronic mail and messages . . . play games with friends and strangers a continent away.

It's time to plunge directly into the mainstream of computer advancement. All you need to order is right on this page: hardware, software, service!

COMPUSERVE INFORMATION SERVICE STARTER KIT

Now you can join the thousands who use telecommunications by subscribing to CompuServe Information Service. Just link your computer by telephone to one of America's most popular networks—and you revolutionize the way you gather information and communicate with others!

Press a few keys for latest news, weather, sports scores, movie reviews, or for updates on 40,000 stocks, bonds, options, and commodities. Make an air reservation, post a sales notice, confer with a client, beat someone at Trivia. Exchange software, learn about solar heating, receive electronic mail. Bank, shop, and pay bills. In all, choose from 75 special interest groups and 200 information categories.

Kit includes: $25 worth of connect time, Personal User ID Number and Password, 3-ring binder with User's Guide, telephone numbers and log-on instructions, and subscription to monthly UPDATE newsletter. Connect time after initial $25 worth and selected services are subject to additional charges. (Requires *Terminal Emulator II* cartridge or *4A Talk* diskette, Modem and RS232 Interface.)
ITEM #UBAA   **$29.95**
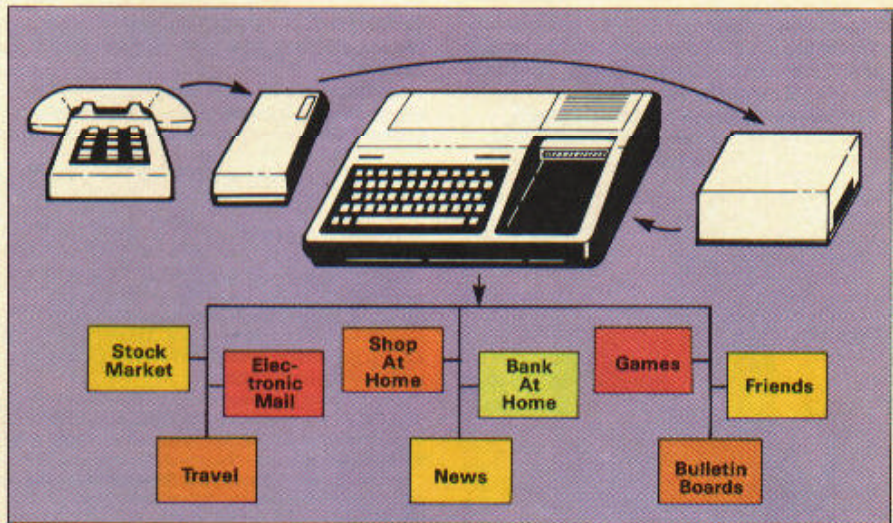

VOLKSMODEM 300 BAUD MODEM

One of the smallest, lightest, most compact modems from Anchor Automation. Operates with any telephone using plug-in handset. Bell 103 compatible. Transmits both voice and data to other computers, automatically changing from ORIGINATE to ANSWER as the need arises. Tucks away out of sight anywhere. Low cost makes this extra worthwhile! Powered by internal 9V battery (not included). Includes all necessary connecting cables. (Requires *Terminal Emulator II* cartridge and RS232 Interface.)
ITEM #WPAD   **$69.95**

MULTICOM RS232 STAND-ALONE INTERFACE

This stand-alone unit incorporates 2 interfaces—serial and parallel—into 1 unit. The RS232 serial and parallel interface allows connection to printers, modems, terminals, etc.
ITEM #YAAA   **$119.95**
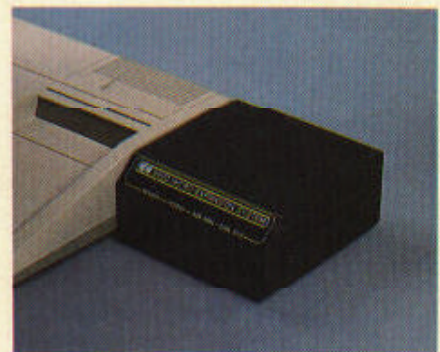

CORCOMP UPGRADEABLE RS232 STAND-ALONE

Weighs little over one pound. Plugs directly into the side of the 99/4A. Provides one parallel and two serial RS232 ports for interfacing with printers, modems, and plotters. Can be upgraded with a single board to include 32K Memory and double-sided/double-density Disk Controller.
ITEM #YKAB   **$139.95**

TERMINAL EMULATOR II

Use this cartridge software program to access subscription data services, e.g. CompuServe, and time-shared computer systems. Features file transfers, improved keyboard interface, and text-to-speech from user-written programs. (Requires Modem and RS232 Interface for telecommunications. Requires Speech Synthesizer for text-to-speech.)
ITEM #AEBB   **$14.95**

4A/TALK TERMINAL EMULATOR

A disk-based program with an operating range of 300 to 9600 baud. *4A/Talk* supports manual file transfer, XMODEM protocol file transfer, and TEII. *4A/Talk* also has a built-in disk directory as well as an automatic dialing routine for those with "smart" modems. (Requires Disk System, 32K Memory Expansion, RS-232 Interface, Modem, and *Editor/Assembler*, *Mini-Memory*, or *Extended BASIC* cartridge or a CorComp Disk Controller card.)
DISK #BJBR   **$19.95**

WRITING YOUR OWN PROGRAMS

Perhaps the ultimate home computer skill is original programming. You achieve maximum satisfaction and challenge when you design your own information packages and create your own games.

Tackling programming is now easier than ever before with this array of aids. Here conveniently together are all the materials you need for writing your own programs, even if you never thought you could!

Remember: creating your own programs may require Memory Expansion and a Disk or Cassette System. Look again at 32K Memory Expansion (pages 3 and 4), Disk Systems (page 3), and Cassette Systems (page 4). Although not required, Printers are recommended for several programs (page 16). Be sure to check the required and recommended specifications for each item you order to make sure you have everything you need.

TI EXTENDED BASIC

Multiplies programming capabilities if you want to step up from TI BASIC . . . design more advanced operations . . . write more complicated programs . . . get the most out of new hardware, disks, and memory expansion.

Lets you add math functions such as MAX, MIN, PI; type multiple statements per line; assign value to more than 1 variable; increase subscriptions on an array from 3 to 7; add variables to subprograms. Increases convenience, reduces limitations of IF-THEN-ELSE statements. Also adds sprites: as many as 28, each with its own color and heading, moving on screen in any direction or speed.

Total enhancements with expanded systems include longer programs, automatic loading and running of another program, execution of a stored program. Includes a PEEK option to directly retrieve numbers from memory. And former TI BASIC programs run perfectly in Extended—no need to throw them away!

The *Extended BASIC* cartridge is required for many disk and cassette programs offered in this catalog.

EDITOR/ ASSEMBLER

This software cartridge allows programming in TMS 9900 Assembly Language. Gives direct access to all system features—sound, speech, graphics, I/O. Links into TI BASIC/Extended BASIC programs through a subroutine call. (Requires 32K Memory Expansion and Disk System.)
CARTRIDGE & DISK #AEBC   **$29.95**
+ $5.00 shipping charge

INTRODUCTION TO THE ASSEMBLY LANGUAGE

Takes you from programming in TI BASIC to the far-more-powerful Assembly Language. Not just a reference manual —but 11 full-fledged lessons, plus character definition and bargraph programs. On completion, you will be able to code simple programs in 9900 Assembly. You'll also be better prepared to use your equipment and reference guides to develop more complex routines. 139 pages, extra-large paperbound format. (Requires familiarity with TI BASIC, as well as 32K Memory cartridge or *Mini Memory* cartridge and Cassette System.)
BOOK #UCAA   **$14.95**

MINI MEMORY

This versatile cartridge adds 14K of additional memory to your TI-99/4A and has a built-in battery to preserve data or programs stored in its memory. *Mini Memory* can also be used to store your frequently-used *TI-BASIC* programs. It allows faster loading than your tape or disk. *Mini Memory* even allows you to use Assembly Language programs and troubleshoot them with the included *EASY BUG* debugging system. (Cassette System recommended.)
CARTRIDGE #AEBD   **$39.95**

MENTOR . . . SMART DISK DRIVE CLEANER *New!*

Don't risk losing your data because of a dirty disk drive head! Like any tape recorder, the heads must be cleaned periodically.
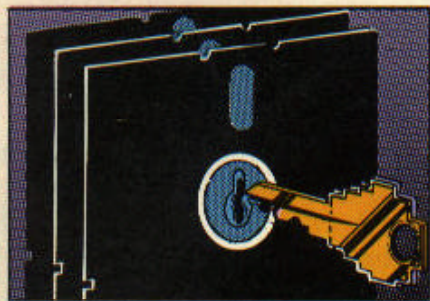

But cleaning disks alone aren't enough—there must be a program to move the heads properly over the cleaning disk surface. You get that program in the *MENTOR . . . Smart Disk Drive Cleaner* kit, along with a cleaning diskette and six pre-measured packets of cleaning solution.
ITEM #QDAQ   **$14.95**

DISK AND CASSETTE SOFTWARE

Whether you're a beginner writing your first BASIC program or an experienced programmer using high-level languages, TRITON has everything you need for your TI-99/4A Disk System (consisting of a disk drive and controller) or Cassette System.

The computer is an infinitely patient, non-critical, personal teacher. It never gets tired of repeating . . . never pushes at a faster pace than the child can absorb. Yet it is never boring. It recognizes the instant a skill is mastered and immediately proceeds to challenge with the next lesson or level of mastery.

Children who need help in one particular subject can repeat, review, retest . . . without embarrassment, in total privacy. And gifted children can set their own fast pace. They can master more subjects than their school curriculum allows . . . learn at higher levels than their current grades.

The computer turns learning into fun. Built into the programs here are the same techniques that make games so exciting.

Computer tutoring benefits parents, too. When parents are too busy, the TI-99/4A is always available—at any hour, on weekends, and during vacations.

On these pages, a selection of educational programs for cartridge, disk and cassette-based systems—for every age and every area of learning. To get the most from the software you select, note whether the following additional equipment is required or highly recommended: 32K Memory Expansion (pages 3 and 4), Disk and Cassette Systems (pages 3 and 4), RS232 Interface (pages 3, 4, and 5), and Printers (page 16).

For some programs, Joysticks (page 10) help to engage the child's skills most fully. For other programs, the *TI Speech Synthesizer* multiplies the computer's user-friendliness . . . adds a warm human element as it coaxes the child to do his or her best.

TELLING TIME
Here is a fun way for your child to learn, step by step, how to tell time! Beginning with an explanation and drills on the hour hand and the minute hand, your child advances to learning to read time in intervals: hours, half hours, quarter hours, three-quarter hours. In each level, the time is illustrated by hand position, numerically stated (i.e. 10:15), and pronounced. Before advancing to higher levels of learning, your child must identify randomly selected times displayed on a clock. For Grades: Preschool-4. From Sungem® Educational Adventures. (Speech Synthesizer and *Terminal Emulator II* cartridge recommended.)
CASSETTE #BJCV $9.95

OLYMPIAN READING
Teaching Objective: To check reading comprehension for sequencing of events and ideas. Let your children feel the thrill of being the best athlete. This double activity program requires the child student to practice reading a selection and then putting its events and ideas in the order presented. They are vying to jump the highest and run the fastest to fun sound and graphics. And the teacher will be a real winner when he or she can key in answers to their own chosen selections using the teacher input section of this program. Children don't realize all the reading they are doing; they anxiously try to get over the high jump bar or around the track. For Grades: 3-8. From Sungem® Educational Adventures.
