

Co-President, Ken Gladysewski opened the meeting @ 1:30 P.M., Sept. 17, 1994. Deanna is on vacation & Frank is working, so Walt Ryder read the Treasurer's report. As of today we are very solvent! Marty read the membership report. We have 49 members, with 2 being honorary members. Under New Business, Harry brought up news of Fest West and the table rates & motel rates. He also quoted from the West Penn newsletter stating that of several of the best NL's, Cleveland was one. Way to go team! Jim Harris brought up that Cecure (Don Walden) is now official TI-99/4A repair person. The MICROpendium carries an Ad stating the price list. Walt wondered if anyone kept a history of things like Corcomp or any other TI related companies. Bill Gaskill has written a History of the TI-99 & related equipment. Also, Bruce said Mr. Wright wrote a TI Encyclopedia listing all the modules & programs in alphabetical order. Ken announced a Ham Fest at the Berea Fairgrounds on Sunday, Sept. 18th

Time for the demo by Walt Ryder. Walt started off by explaining his objectives;

1. To link assembly language (A/L) subroutines to Basic & Xbasic to enhance the speed of these programs.
2. Identify the statements to use in linking them.
3. Show examples of running a linked program.

Walt then proceeded to show examples using a Basic program to count to the screen from 1 to 100. Very slow! He then demo'd how to link his A/L subroutine to this and improved the execution greatly! Walt went on to show improvement in Xbasic and the use of the MiniMem module. He also showed that you could pass parameters back & forth from Basic to Assembly, etc. Walt's figures for running #'s 1 to 1000 on the screen were: Basic - 3 min. 7 sec., Xbasic - 1 min. 39 sec. Basic-A/L - 54 sec. Xbasic-A/L - 54 sec. This demo was terrific and generated LOTS of comments and questions!!!

Another plus of this demo was Walt's explanation of (Call Init), (Call Link) & some of the A/L command language. Thank you, Walt! Looking forward to more of this kind of Demo!

After this demo, Ken closed the meeting and everyone either left or adjourned to Ron Markus' table to buy some needed hardware or software! One member bought a whole system!

I didn't catch what demo was being shown next month! SORRY!

North Coast 99'ers wish all kids, big & small,
a HAPPY & SAFE HALLOWEEN HOLIDAY !!!

TI-CHIPS NOTES

BY: HARRY HOFFMAN

The Sept. 17th meeting was opened by Glenn Bernaset at 10:00 A.M. Lin & Carol Shaw were not present, so the Treasurers Report was put on hold. John Parke gave the Membership & Tape/Module Library report. We have 22 paid members & some that haven't paid their dues yet. Jack Koryta brought in the enhanced Lima tapes, one of which could not be enhanced because it was copied over an old tape that was too scratchy to work on without taking a LOT of time (one screen at a time!). The other two are in great shape! Les Kee then gave his Disk Library report. The new disk catalog is in the Newsletter. We're still waiting for someone else to take a disk from the library for demonstration purposes. Get a free disk from Les and run it at home, write down how to load it, run it and what it does. Then come in and show Chips what this program does and what you would use it for. Glenn said there are over 4000+ programs in the library now and there should be no problem finding something of interest for everyone! It is easy!!!

Glenn announced that Deanna Sheridan would bring her Laptop computer and demo how to communicate between the TI-99/4A & the IBM using PC-Transfer and a null modem. She may, if time allows, show a bit about the TI Emulator! Glenn showed us a printout of a report he wrote for work that he transferred to his TI and edited with FunnelWeb 5.01. It was a 339 sector file that he was able to put in 700+ line segments in TI-Writer format, using PC-Transfer to put on a TI disk.

Harry received a letter about Fest West '95, to be held in San Diego on Feb 18th, 1995. The motel rates were included and the special rates will be in effect for 4 days for those that want to see the sights! Special table rates are available for user groups that wish to set up & sell equipment or programs. Harry spoke about the newsletter and how there is not enough input from the members. The newsletter can't be informative for the membership if there is no news ABOUT what members WANT, NEED, or even what they are DOING or have DONE with their machines! This input would benefit us ALL! If anyone wants to talk about ANYTHING, give Harry a note and we will start a CHIT-CHAT column. Hey, if any member wants something to contribute to the clubs, become a reporter and give Harry a report every month on any subject.

We then talked about having a reunion (as the Dallas Group is doing!), in conjunction with North Coast. Deanna wrote about it in the Sept. newsletter. We will have to co-ordinate with NCoast and send cards, etc. John Parke has a complete list (on Disk) of all members that have ever belonged to CHIPS! How about that!! It was brought up by Ada that many of the old members may like to know about members that have passed. This will be tabled until we can talk to Deanna at this coming meeting.

Cecure Electronics now is the authorized official TI-99 repair company. Don Malden has an ad in the MICROpendium listing the prices of repairs to Consoles, PEBoxes, & other related TI-99 parts.

Ada brought up the fact that Ron has started selling internationally. He got some orders from overseas! Ron says it is due mainly because of Charles Good's excellent reviews in MICROpendium & thanks him very much! Glenn said that there are not enough vendors that are as honest and reputable as RON and we need that kind of service. Ron says that Chris is not able to come to meetings because he has to work on the meeting Saturdays, so we will have to put up with a tape recorder as secretary until we can get a temporary replacement! How about it SOMEBODY!!!

Virgil Thomason announced that Dinny Stockdales wife had passed away two weeks ago. He sent a letter to Harry so it would be put in the last NLetter, but Harry never received it! Please let Dinny know of your feelings and prayers.

Send cards to:

Dinsmore Stockdale
4400 Melrose Dr. Box 34
Wooster, OH 44691

Curt Gadd put on a demo on DBCard File. This database program is a very simple one to use and is very powerful in use. Curt recommends making a backup of your database, but you cannot use Rapid Copy, you can use DM 1000 for this purpose. The Title screen shows a 3 drawer file cabinet & a menu. To get around on this screen, use the FCTN & arrow keys, then ENTER to go where you want. You can make up each file drawer into a separate data base with records of what you want; addresses, data, etc. You can print all of the drawer or selected parts. A very good demo!

Les Kee then gave a demo'd a program called Cad Master v.1.9 which has been in our library for some time. It was written by John Miller of Anaheim, Calif. This is a drawing program which allows you to scale your drawings and is set to 1"= 1 foot. Unfortunately, there is no print function and the circle portion leaves a little to be desired. John has promised updates but we do not know if he has done so. Les gave a thorough run through of this program. Maybe he will try to contact John Miller about an update! Thanks again Les for a great demo!

We then had our 50/50 drawing and Curt Gadd won. Congratulations Curt!!! With that over, the meeting was adjourned to Ron's table to check on what he had and some left for home! All in all a great meeting!

OCTOBER

DEANNA & HARRY'S GRAPHIC PROJECT

Deanna Sheridan bought a CD with a large BUNCH of pictures in IBM format! We really don't know the exact amount of pics involved. There are a few duplicates and a few unusable ones! Deanna, using three different computers, converted all to MAC format. This made it easier for Harry to convert them to TI-Art and then to PagePro pics! So far, there are about 100 pics changed to formats I can use. On this page are a few that were taken from some of the 70 disks Deanna gave me!!! All 43 Halloween pics will not be in this newsletter, but at least they are on a disk labeled for 'HALLOWEEN'!

Some graphics in Mac format are too large for TIA' but could be O.K. for Page Pro. The header is 2 pics copied VERY carefully with Peter Hoddie's 'Macflix Pro' A very good program to buy, if you can get it from Ron! The bottom 'Cornstalk' is 3 pics that are off a little, but passable, [find it!] After converting the TI-Artist pics to PPRO, I had to figure out what line and column to start each picture, so they match up O.K. That was a lot of fun!!! Here are a couple more trick/treaters:

Here again it took two pics to make ONE graphic. It was too big for TI-ARTIST!
<-----

HAVE A SAFE HALLOWEEN!!

PROGRAM OF THE MONTH

by Bob August

The program this month was written for Frank to use in his Motor home. I don't know if we published it before or not, but it has been revised several times so there are new features.

The program lists the mileage by date with the amount of gas you bought, where you bought it and how much it cost. You can enter two entries each day. The program will give you a recap on the screen or printer. You now can edit any record or delete the last record entered. You can also page back or forward through each day.

I am sorry the program is so long, but it is necessary for what it does.

the program is written in Extended Basic.

Hope you enjoy.

```

Where in the world can you get almost 500 items for your TI-99/4A or the Myarc GENEVE 9640 computer, all under one roof and all at popular prices?

RamCharged Computers, that's where!

Fairware, Software, Hardware, Cables, You name it, We got it! (or will)

EXAMPLES.....

5 1/4" DS/DD disks (25 for \$6.00)

3 1/2" DS/DD disks (25 for \$9.75)

3 1/2" DS/HD disks (25 for \$11.25)

5 1/4" or 3 1/2" disk drives - 'NEW' with full 1 year warranty - ONLY \$49.

3 1/2" mounting kit with all cables and adapters ONLY \$4.00 each.

5 1/4" or 3 1/2" disk drive cleaning kits ONLY \$2.95 each.

Home of:

ASTRO-MANIA

WAR ON THE SEA

WHO'S BEHIND THE MEXICAN UFO'S

and the best joystick ever made for any computer or video game.. with exclusive five year warranty

the RamCharged Computers - Prostick II (still ONLY \$14.95 for a limited time)
