99'er ON LINE... is the newsletter of the Edmonton 99'er Computer User's Society published ten times a year. Unless otherwise stated, all articles may be republished in other Newsletters provided that source and author are identified. We will in turn credit authors quoted in 99'er ON LINE.

NEWSLETTER CORRESPONDENCE: Editor: John Harbour, 13857-114st. Edmonton, Alberta, Canada. T5X 4A1 (403) 456-0862.

OFFICERS: President Yves Chevalier; Vice President Bill Ince; Treasurer Dennis Miller; Secretary Andrew Webster.

OFFICERS AT LARGE: Paul Helwig Newsletter Library; Gordon Bradley Book Library; Win Appelt Disk Library; Ron Hohmann Module & Cassette Library; Jim Mulligan Sysop, T.I. Bulletin Board 464-4167, 300/12008aud.

DISCLAIMER: Information published in this Newsletter is created by and for amateurs, therefore, we cannot guarantee the accuracy or use of presented information.

REGULAR MEETINGS: of the Edmonton 99'er Computer User's Society are held on the second Tuesday of each month in room 849 of the General Service Building of the University of Alberta from: 7:00 till 10:00PM, and are open to all members in good standing. Non-members may attend their first meeting free of charge.

ADVERTISEMENTS: Commercial space is available in this Newsletter at the following rates: Full page \$20.00, Half page \$15.00, 1/4 page \$10.00. Discuss your needs with John, at (403) 456-0862, or the next meeting, alternatively send "photo ready" copies to him. Members may advertise their personal computer related items for free but are asked to limit their ads to about 50 words. Mail your ads., to the Editors address or hand it to him at the General Meeting; Newsletter deadline 3'rd Monday of the month.

MEMBERSHIP FEES: Family; 12 months \$20.00, 6 months \$15.00. Students; 12 months \$15.00, 6 months \$10.00. New member initiation; \$20.00.

-----{99'er News Letter}-----

NEXT MEETING.

The next meeting will be
January 10th. At 7:15 PM.
General Service Building U of A
Campus room 849.

-----{ SEASONS GREETINGS }-----

JUST A WCFD.

by: Yves Chevalier (President).

Best wishes for the New Year to all those I missed during the Holiday Season. I feel it is a privilege to be allowed to help the club in this capacity and I thank each and everyone of you for your support.

Now that the Holiday Season is behind us, it is a good time to get all those projects that have been put on hold completed, or at least restarted again. Now all those SIGs and maybe a programming contest or two would do well to get things going. Work is also going on behind the scene on the "Alberta" intergroup meet (I wonder how many other groups exist within the province). Win is co-ordinating with the Red Deer group and will disclose the date when it is known.

Try this: Clear the Screen.

There is more than one way to clear the screen on the TI Home Computer. (That can probably be said of anything one does with the TI.) After you have got tired of using the CALL CLEAR command, try this in place of the CALL CLEAR in your program:

```
10 CALL HCHAR(1,1,32,768)
```

It will clear the screen by sweeping from top to bottom. Then try this one:

```
10 CALL VCHAR(1,1,32,768)
```

Of course this clears the screen by sweeping left to right.

M.P. Printer Control.

By Curtis Ringold. Mid-South.U.G.

Have you ever wanted to gain control of your printer through Microsoft Multiplan? i.e. send printer controls using spreadsheets created with Multiplan? According to Curtis, this is possible, though it takes a little time, (but what's time with a hobby like ours, and at least it does work as I've tried it out Ed.) This being a copy of a copy from the Newsletter of the Suncoast 99ers.

Requirements are Multiplan and a program that allows Single Sector Disk access, preferably one that uses ASCII and HEX, (Disk&Aid, DSKU40, etc. Ed.) It is recommended that you use a FRESHLY INITIALIZED DISK to make it easier.

- STEP 1. Get into Multiplan.
- STEP 2. In Row 1 Column 1. using Alpha, enter ABC.
- STEP 3. Press (T)ransfer. (O)ption, here select Symbolic, press Enter.
- STEP 4. Press T, then Save. Enter a filename and press Enter. The ABC sheet has now been Saved.
- STEP 5. Leave Multiplan and load your Single Sector Editor*. On a newly initialized disk, your saved ABC should be at sector 22 (022). go to sector 22. Toggling between ASCII and HEX you will see your ABC in the display, returning to HEX ABC is represented by 41, 42, 43, replace these numbers respectively with 0F, 1B, 47.
- STEP 6. Save these changes to disk.
- STEP 7. Re-enter Multiplan. press (T)ransfer, then (O)ption select Syabolic and Enter. Press (T)ransfer then (L)oad the file you saved. Examine RIC1 you will notice ABC has now been replaced with the letter 'G'.
- STEP 8. Press (T)ransfer, then (O)ption select (N)ormal then Enter.
- STEP 9. Resave this file under a new name. This cell may now be called up and placed anywhere in the spreadsheet, to send a control to the printer, in this case a Gemini. The control here created is for condensed, double strike.**
- STEP 10. To insert this printer control into a spreadsheet, type e(X)ternal and (C)opy***. At the prompt: External copy from sheet: Enter the name of the second file you created containing the control character, press CTRL(A) next prompt, Name: RIC1, press CTRL(A) next prompt, to: type in desired position you wish the control character to appear in the spreadsheet. ie.,R6C15 etc., press CTRL(A) next prompt, Linked: press (N)o then Enter.

The command should now appear in the worksheet at the cell location you designated. It is now ready to take control when the spreadsheet is sent to the printer.

There is no reason why you should stop with one printer control. You can enter a series of printer control commands, and insert them wherever you like in your spreadsheet. You may do this by entering a series of single-cell references into a single file, that would be called up based on cell location of the command, or, you may file them individually.

It would be prudent to create controls to cancel these commands, as once they are set, they continue until you switch off your printer Ed.

In utilizing this idea, you would be able to change the character style of the printing eg. Italic, Pica, Elite, with a little practice perhaps you could even use the international character set and write in another language, (an asset to some of us, no names mentioned) check your printer manual, use your imagination. I don't have the time to try out everything as I would like, this is where you can all help.

Perhaps in the coming year, I may find time to give you all a (SIG) on Multiplan, I keep passing out hints to the experts, to no avail, I am not an expert by no means but could possibly help some of you to at least get a start, keep these tips you may find them useful in the future Ed.

*Sector editors are being demonstrated by Jim Mulligan, December and January, it would be wise to attend the meetings for more information on these Utilities, although in this case you don't have such a message.

** On looking in your printer manual, under "Index by Character Code, (mine is an Epson), down the Hex column you will find:

```

0F (zero F) sets condensed print mode.
1B      escape.
47      Sets double strike print mode.
        This will give you an idea how you can use other symbols in
your spreadsheets.
    
```

*** At this point I am changing the text for I hope better clarification Ed.

Have you ever wanted to change your TI screen, Text and cursor colour in the immediate (programming) mode? A simple routine entered without line numbers will do the trick, although it works only in XBasic.

```
FOR I=1 TO 9:: CALL COLOR(I,16,1):: NEXT I:: CALL SCREEN(14):: ACCEPT AT(1,1):A
```

After pressing Enter, press FCTN 4, Voila! a screen of a different colour.

Thanks to the Cleveland Area 99/4A C.U.G.

I would like to wish all our readers, wherever they may be a very Happy and Prosperous New Year, I cannot imagine a Xmas season without snow, but we don't have to worry about that problem here it comes along with the -20°C.... Oh yes, and with the Sunny Alberta skies, I hope you all get something out of this Newsletter to improve your computing knowledge, by for now, your Editor.... JOHN.

DISK-CATALOGUE.

by: Win Appelt.

Happy New Year Everyone! This is what is new for January:

BRDRS+TMP1 & BRDRS+TMP2 - GRAPHX and TI-Artist Borders and Card Templates. This floppy comes with a Demo, Card design Templates and 10 Borders. This is a great companion disk for your TI-Artist & GRAPHX programs.

COMICSHOW2 - This is the original TI-Artist Picture Animator from Germany. Included are three Demos : Bouncing Balls - Rotating Box - Stretch Letters. Good animation!

DSKLBL99.2 - Disk Label 99 V.2 is a program that lets you print disk catalogs on labels in various sizes and formats. This program produces the labels that you will now be seeing on all of our Club Library disks. Quite versatile!

FNLWRTR4.1 - This is Funnelweb's latest update. The new configuration program features pull-down menus and is much easier to use than previous versions.

INFOC_LOAD - This great utility lets you load your INFOCOM Adventure games in a fraction of the time it used to take.

TI-ARTPIC5 - More TI-Artist pictures! Included are Pictures of Einstein, Heather Locklear, Madonna, Mickey Mouse, Victoria Principal, P-Box, and more, 14 in all.

TI-ARTPIC6 - Pictures included: 5 Beatles pictures, German Shepherd, Laurel & Hardy, 3 MASH pics. Margaret - Klinger - Col. Potter, Mercury 7 Crew, Saturn V Rocket.

TI-ARTPIC7 - Pictures included: CokeCan, Death Head, Greek Ruins, Huebert, Mathart, Sea, Skull. All pictures on this disk come with color files, and are good examples of the 4A's graphics capabilities.

A request was made to me a while back, to include notes with disks giving directions or hints as to how to run some of the files. This is now made possible thanks to John Birdwell's great Disk Utilities V4.12 Using this program it is now possible to comment each file on disk and save these comments right along with the file descriptor records. What this all means is that if you catalog your disk using V4.12 of DSKUTILS, you will get a catalog complete with file comments, purchase date of the disk, Start & End Sector numbers for each file.

Hopefully this will be of some help. Win.
