PROGRAM DIRECTORY UPDATE

SPRING 1984

ORDERING INSTRUCTIONS

All programs are \$2 each on cassette, unless otherwise indicated! A minimum order of five programs is requested. If you want the programs on diskette, please add \$.50 per program. If you desire a hard copy they are \$1.50 apiece. Hard copies of Third Party programs are not available! Orders will be handled within ten days of receipt and returned to you via first class U.S. mail. Please enclose payment in full with your order.

USER WRITTEN PROGRAMS

86. Asteroid Gallery: Basic. You are the curator of a museum that is overrun by anderoids and it is your task to rid the museum of them before the exhibition starts. This is done by enclosing each anderoid inside a box, and they do get nasty if you fail to enclose them in the "right" order! For instance, some boxed previously placed may vanish. Limited graphics. Rating: Fair+ \$2
87. Bar Chart: X/Basic. This program permits you to generate a colored graph for any subject that has changing values; such as grade point averages, stock market prices, etc. Values may range from one to one thousand. Progress of the graph may be halted by the space bar and later resumed. A printout is available. A nice effort and very practical. Rating: Good \$2
88. Bar Graph: Basic. This generates a bar graph for the purpose of test score comparisons for students. The high, low, and average are shown. It permits twenty entries. Most helpful for teachers. Rating: Fair \$2
89. Cash Flow: Basic. You can follow the progress of any type of cash flow with this program; such as loan costs, interest rates, or mortgages. It shows you the best time to pay off a loan, as opposed to leaving the cash invested. Yield rates can be viewed and compared. Helpful for anyone who must deal with changing monies. Rating: Fair \$2
90. Donkey Jump: X/Basic. This is a twist on the favorite Donkey Kong. You must climb the ladders to the multi-story building on your way to the top, but beware of the rolling barrels! Jump them or perish! It may be played with the console keyboard or optional joysticks. Nice graphics and reasonable speed. Great fun! Very entertaining and colorful. Rating: Very Good \$2

USER WRITTEN PROGRAMS

91. LaFond Checkbook Manager: Basic. Synthesizer and TE#2 required. A talking checkbook management program with many helpful options. You may post balances, enter check charges and service charges, sort by check number, and change data. A very complete management system! Excellent speech! Rating: Excellent \$10
92. Jewel Heist: Basic. You enter a building with 100 hidden jewels. You may only remove ten gems at a time and the caretaker is determined to get them into a safe before you heist them. You may play against the computer or a friend. Limited graphics. Who ever gets the most wins. Rating: Fair \$2
93. Poem: X/Basic. Disk system is required. Generates some very odd poems and colorful graphics, perhaps strange is more correct! Hitting any key changes the scenery and the colors. It is interesting to watch, although it may give poetry a bad name! Rating: Fair \$2
94. Power: X/Basic. Synthesizer is required. A two player game and each person controls his ship on the grid with a joystick. Try to get to the green "0" symbol first, as it increases your force field. The winner is the person with the highest score when you both occupy the same square! If you are high, just try to run your opponent down to gain the victory. Rating: Good+ \$2
95. Pyramid: X/Basic. You are in control of a ship that must avoid impacting green pyramids, as hitting them costs you power! You must weave your craft around them carefully. Run into the red pyramids to gain bonus points and extra ship power! Move the joystick left to go to the upper left and right to go to the lower right. Careful though, as your ship may vanish! Nice graphics. A test of your hand/eye coordination indeed! Rating: Good+ \$2
96. Sprite Definition: X/Basic. Disk system required. Allows you to create graphics and store them to a disk file. You may pattern a four character sprite and see it as it was created as well as magnified, enlarge with a single character, edit a creation with the function keys. You may turn individual points on or off as desired. Graphics may be stored and added to a program of your choice at a later date! Rating: Very Good \$2
97. U-Boat #1: X/Basic. You control the firing of torpedos from your U-Boat. You may use either the console or a joystick and it offers two levels of difficulty. Lead the target ship of your choice into the crosshairs, but remember to allow for the time lapse from the time of firing until impact. You have to lead a moving target! A variety of targets, aircraft carriers, destroyers, etc. They are all moving at varying speeds. A challenge! Rating: Good+ \$2
98. TI Trek: Basic. Synthesizer and TE#2 required. A modified version of the original game that uses Text To Speech instead of the Speech Editor module. A very nice space combat game with limited time. You control shield power, lasers, torpedos, position, short/long range scanners, etc. The difficulty level also varies in accordance with the number of aliens to battle. Nice graphics, colorful, and moderately exciting. Rating: Very Good+ \$2

USER WRITTEN PROGRAMS

99. Three Blind Mice: Basic. (Synthesizer and TE#2 required) This is a cute version of an old favorite, although in this case the synthesizer sing it. An excellent program to take apart to see to make your synthesizer sing a tune with variable pitch and slope. Rating: Good \$2
100. Bingo Call: Basic. (Synthesizer and TE#2 required) Allows you to call out random numbers for a bingo game with speech and print. You may hit the enter key and have the previously called out numbers displayed on the screen in the bingo pattern. Rating: Good \$2
101. Ham Call Sign: Basic. (Synthesizer and TE#2 required) If you are a ham, then you may find this program helpful. You key into the program your own call sign and city and the computer speaks it on command. Rating: Fair \$2
102. Changing Situations: X/Basic. This program calculates spendable money when you change a job situation or your place of residence. You may also calculate retirement situations. Your output is as good as your input, the key is accuracy. Rating: Fair \$2
103. Interest Calculation: Basic. (Synthesizer and TE#2 required) You can enter a loan balance, amount of interest per year, and the monthly payment. You are told the total interest being paid out, as well as the time required to pay the total loan off. Rating: Fair \$2
104. Peril: X/Basic. You are the captain of an ore freighter and are moving through enemy territory. You are being threatened by robot destroyers, but they can't detect you until you move. Unfortunately, you can't see them either! As soon as visual contact is made the danger becomes immediate. They will pursue you right into a star! Try to get the robots to run into each other or crash into a star. Don't warp into a star! You can't leave a sector until all robots are destroyed, then you automatically warp out. Console or joysticks. Rating: Good \$2
105. The Dungeon: X/Basic. A fantasy adventure through a two level one hundred and twenty eight room maze. You start with 1000 gold pieces and must find your way out of the dungeon with as much gold as is possible. A monster will approach you and inquire where your gold is, how you respond to that question can determine your future! You can encounter: roving monsters, thieves, empty chambers, trap doors, secret doors, super keys, secret tombs, and enchanted maps. A mystery wizard may swipe your map, so study it when you can! The map has a legend to read it by and input commands navigate you through the maze. Very good fantasy adventure! Rating: Very Good+ \$15 on cassette-Third Party
106. Profit/Loss: Basic. Permits six inputs of numeric data of either a positive or negative value. The results are graphed out to show the profit/loss pattern. Rating: Fair \$2

USER WRITTEN PROGRAMS

107. Slot Machine #1: Basic. Enter your bet—from one to five coins—and watch as this one armed bandit pulls the lever. The higher the bet, the more you stand to win or lose! Nice colorful graphics and cute sound routines. Rating: Good \$2
108. Slot Machine #2: X/Basic. This clever program shows you the winning combinations on the screen. Enter your bet level and take your chances! Nice random odds factor, very close to the real thing. Earnings and debits are displayed on the screen. Excellent graphics and action. Rating: Very Good \$2
109. Sound Effects: Basic. Some very neat sound effects that can be incorporated into your programs. Such goodies as: Big Ben, siren, bee in flight, sword fight, etc. Very realistic! Rating: Very Good \$2
110. Time Clock: X/Basic. This is a graphic clock that has a speech option. You may use it to help your child learn to tell time or keep track of the real time with it! Yes, it does keep time! The child inputs the proper hour and minute in conjunction with the screen display of the time. A very unique program! Rating: Very Good \$2
111. Space Scout: X/Basic. You try to pick up all of the cargo modules in as brief a time as possible. You must avoid asteroids and keep an eye on your fuel levels. If you dock with the mother ship you can gain some bonus points. Fuel can be critical in this game! Nice graphics and good play action. Rating: Very Good \$2
112. Space Shoot: X/Basic. The object is simple, wipe out as many enemy ships as possible. You can turn your guns, enter warp drive, and blast away with your onboard lasers. A cosmic arcade gallery of sorts! Nice graphics and interesting play action. It doesn't shoot back, but it is hard to hit just the same! Rating: Good \$2
113. Docking: X/Basic. Try to pilot your space craft to the planet Nala, but your defenses are limited and the hazards are many! Your laser has only six shots, so use them wisely. A real space navigational maze game! Nice graphics and a true challenge. Rating: Good \$2
114. Print Type Demo: X/Basic. Allows you to input a variety of print font types and see the results in hard copy. Very useful when you are trying to decide what style of print would look best. Edit line 105 to match your printer control codes! Rating: Good \$2
115. Cylon Raiders: X/Basic. Shoot down as many of the enemy ships as is possible, but don't destroy yourself in the process. You can overheat your ship, so watch to keep your ship below 100 degrees! The enemy does fire at you and when your shields drop zero the game ends. Movement is by joysticks. Decent graphics and reasonable response. Rating: Good \$2
116. Alien Search: X/Basic. This is the first in a series of junior adventure games. You are on an alien world and must find the treasures taken from the Earth. The movement is by the keyboard and you must return to the original starting point to learn your score! Danger lurks in hidden places, like the nasty force field that is invisible! Great fun for the younger child and adults. Very nicely written! Rating: Very Good+ \$10

USER WRITTEN PROGRAMS

117. Sunrise Sunset: X/Basic. A beautiful musical selection with options for: the starting music frequency, change of music frequency, and timing change. It has to be heard to be appreciated! Rating: Excellent \$2
118. Silent Night: X/Basic. A beautiful Christmas song with spectacular color graphics. The words to all of the verses appear on the screen so that you can sing along. A super effort! Must be seen and heard to be appreciated. Rating: Excellent \$2
119. Checkers: X/Basic. A one player game that pits you against the computer. You may choose one of several difficulty levels to play and the difficulty does get more logical. Very nice graphics! It plays a good game and is suitable for younger users! Rating: Excellent \$10
120. Igo: X/Basic. You may play either a mortal or your friendly console. This is an ancient game that was military originally. It involves occupation of the majority of the possible sixty four board squares. Moves are any direction: horizontal, vertical, or diagonal. Great strategy is required to be a winner! Super graphics and nice logic. Rating: Very Good \$10
121. Simon Outdone: X/Basic. This game may drive you bonkers, but it is fun. You may use either the keyboard or joysticks for play. The game runs one hundred sets of possible matches, thirty gets you name in the high score file! Three difficulty levels. You may play one of three versions: standard, reverse, or hot cross buns. Match the cracker color in the center to those on the left or right, or try to match opposites, or match the diagonals! Confusing? Yes! Neat graphics and some mind blowing fun. A match earns you a point, but a mistake gets you into trouble! Rating: Excellent \$10
122. Alpha-Writer: X/Basic. (RAM Card, RS/232, and Printer required) A mini-text editor with an eighty column line length. Limited to 108 printed lines of text! Options include: old text, new entries, printer, correct, append, save, etc. You can edit with the cursor. It is a very nice text entry program and works quite well. A great introduction to the world of word processing! Rating: Very Good \$10
123. Mystery Word: Basic. (Synthesizer and TE#2 required) You can enter up to three hundred words of your choice for spelling tests. The words can be entered by their phonetic spellings as well as by their correct spellings! You may start with any word in the possible list and work forward. The score is kept and displayed on the screen. A disk system is required to operate this program, as the word file is stored on diskette. A fantastic spelling program, perhaps the best we have ever seen! Rating: Excellent \$10
124. XYZ Plot: X/Basic. A plotting program that allows a printout of your graph. You may vary the math routines to plot a desired configuration by editing line 10. Output may be to the screen, thermal printer, or RS/232. You enter the range and domain of the plotting points and it computes the proper equations. A very nice program that is quite efficient. Rating: Very Good \$2

USER WRITTEN PROGRAMS

125. Flash Word: X/Basic. This program is educational and is primarily for children. You select whether you want to see words, letters, or numbers. You may also use the optional joystick to find the letters or numbers on the screen. Speech is used to encourage or prompt the user. You may input the data of your choice. A good way to improve concentration and symbol identification! Rating: Very Good \$2
126. Farm: Basic. (Synthesizer and TE#2 required) Now here is something to make you give your computer a second glance! The console sings the classic Old McDonald Had A Farm to you! The words flash on the screen as the TE#2 changes pitch and slope frantically in an effort to sing. Amusing to listen to. Rating: Good \$2
127. Snakes and Ladders: Basic. Up to four can play and you select how many snakes you want to play with. You can also pick the number of ladders and a backwards move option. Avoid the snakes and try to climb the ladders to get to the next level. Some colorful graphics and interesting logic, the right move is essential to move to a new ladder. Harder than it sounds. Rating: Good \$2
128. Piano: X/Basic. A graphic cutie of a piano with flower vases and moving keys. It plays variations on themes by Beethoven. Nice music and very pretty graphic representations! Rating: Very Good \$2
129. Read Fast: X/Basic. This program is intended to help your child improve their reading rate and comprehension. They can select from two menus: numbers or words and phrases. Four levels of difficulty! The higher the difficulty level, the less screen display time! A good way to improve concentration and memory! Your mistakes are shown at the conclusion of each test period. Rating: Good \$2
130. Stock Records: X/Basic. (Disk Controller, Disk Drive,) This program keeps track of your profit and loss investments for personal securities and stocks. You can calculate your profit and loss, display the current records, update your stock file records. Profit/loss can be stored in a disk file if desired! A very comprehensive and helpful program for those of you who wish to keep track of your stock market activities. Rating: Good+ \$2
131. The Entertainer: Basic. This program presents the title song to the movie The Sting. No graphics on this one, but some great sound! Rating: Very Good \$2
132. Rhythm: Basic. Select from one to five groups, hit enter, and watch the colors flash and the title screen appear. A few musical notes and you are tested on your ability to correctly identify declinations in rhythm. The faster your team plays, the greater the number of examples you get and the more points that can be scored. You can enter the notes you think match the audio examples and see just how good you really are! It is difficult. Rating: Good \$2
133. TI Demo: Basic. A very original piece of musical construction that demonstrates everything from the classics to pop to jazz! A sensational workout of the three sound generators! Rating: Excellent \$2

USER WRITTEN PROGRAMS

134. Print-A-Bit: TMS9900 Assembler (X/Basic, Disk Controller, Disk Drive, Expansion RAM, RS/232 Interface, and Epson compatible printer required) This powerful printing program interfaces with the Data Force Draw-A-Bit program. It permits you to print out the graphics designed via the DAB program in one of four different sizes. The concentration, or density, or the printed dots can be varied to suit your tastes. A very potent utility! Rating: Outstanding \$18.50
135. Space Station #1: TMS9900 Assembler (X/Basic, Disk Controller, Disk Drive, Expansion RAM required) An extremely fast arcade game for one player that matches you against space foes who are bent on destroying your space station. The action increases in speed every ten thousand points! You can move and shoot at the same time, an impressive feature. Full bit map graphics, intense colors, and incredible action! Rating: Outstanding \$22.50
136. Kippy;s Nightmare: TMS9900 Assembler (X/Basic, Disk Controller, Disk Drive, Expansion Memory required) This is one of the most highly animated games ever written! Poof the monsters—six per screen—use the energizers, light up dots by touching them, and just try to get through the fifty levels! The more time you take, the more Kippy is slowed down! Points are earned for quickness and right actions. Designed with youngsters in mind and it is arcade quality! Full bit map graphics and incredible play action. Rating: Outstanding \$22.50
137. Bang! Bang! Sub: TMS9900 Assembler (X/Basic, Disk Controller, Disk Drive, Expansion Memory required) Here is a fast arcade game that lets you blast away at the various enemy targets. Your sub can withstand five hits, no points are earned for blasting clouds, waves, or the small formations of planes. The more damage you sustain, the less depth your sub can achieve! The enemy ships and planes shoot back aggressively, so this game takes much thought and advance strategy! Full rapid fire capability! Nice bit map graphics, tremendous play action, and lots of difficulty! Rating: Outstanding \$22.50
- NOTE: All three of the foremention games were rejected by TI for solid state modules! Not because they weren't good enough, but because they were so good they made TI's modules look slow!!! Space here doesn't permit adequate descriptions of them, so refer to previous newsletters for detailed escriptions.
138. Data Force Arcade Game Pack: TMS9900 Assembler (same system requirements as above) All three arcade games on a single disk with full documentation. A retail value of \$105. Your cost is \$60 and it is a steal!
139. DAB and PAB Package: TMS9900 Assembler (requirements listed above) Both disks with a retail of \$75, but your price is \$52.50
140. Green Sleeves: X/Basic. A beautiful version of an old favorite with sensational colored graphics. An excellent example of what can be done when music is written correctl, and combined with appropriate graphics! Rating: Excellent \$2
141. Pascal Dasaassembler: UCSD Pascal (Pascal system is required) This program enables you to disassemble programs assembled with the Assembler/Linker utility. It is only for experienced programers who know their Pascal! Rating: Good \$10

USER WRITTEN PROGRAMS

142. Electronic Card File: X/Basic (X/Basic, Disk Controller, Disk Drive, Expansion Ram required, RS/232 and Printer optional) A very handy utility that permits you to store and catalog names and important data. Each file stores the same amount of data as a 3 X 5 index card. You may add new items, look them up by name, alter a saved data file, delete a file, and print out either a report or envelopes! Nicely written with easy to learn commands. Rating: Very Good+ \$25
143. Rainbow Weaver: Basic. A cute little program that weaves some very pretty and complicated designs on the screen. It is pretty to watch and is an excellent example of how to mix colors with graphic characters. Rating: Good \$2
144. White Water: Basic. Just try to manipulate your raft down this roaring river and avoid running into the banks, the rocks in the stream, and so forth. It is quite fast for basic and does take a good deal of skill. Points are earned for the greater the distance. Rating: Good \$2
145. Reverso: Basic. If you want to challenge your memory, try this one! A series of numbers are presented for you to view and then you must enter the series back into the computer in the reverse order. Sound easy, well it isn't! Quite a challenge. Rating: Good \$2
146. Theon Raiders: TMS9900 Assembler (Editor/Assembler, Disk Controller, Disk Drive, Expansion Memory or Mini-Memory and cassette) A fascinating game from Intersoft that features true three dimensional graphics and motion!!! Split screen display with view of space from the window of the space craft and the radar screen. It has fast action, challenging foes who are smart, and incredible play action. See the review in a previous newsletter for details. One of the absolute best games yet for sensations of motion. Rating: Outstanding \$15 MM version \$18.50 EA version
147. United States Capitals: X/Basic. Test your knowledge of the fifty states to see if you can name all of the capitals. You may also test yourself by seeing the capitals and naming the states, or seeing the states and naming the shortened abbreviations. Score is displayed as you go. Excellent for educational purposes for children or adults. Rating: Very Good \$2
148. United States Presidents: X/Basic. This program presents a learning situation for the first twenty-five presidents, their dates of birth, and the years they served in office. Study time is unlimited. The student is tested by three separate skill builder tests and the score is posted constantly on the screen. A printed report is generated at the termination of the session. Features both graphics and music-United States flag and "America". Rating: Excellent \$10
149. Mystery Melody: Basic. (synthesizer and TE#2 required) A modified version of the original program. Speech has been added. See a TI catalog for a description of the program proper. Essentially, it presents a short length of a tune and you try to identify it. Rating: Good \$2

USER WRITTEN PROGRAMS

150. Load Generator: X/Basic. (X/Basic, Dick Controller, Disk Drive, Memory Expansion required) This inovative program is loaded onto any disk and stored under the name of "LOAD". It will automatically write a load driver program each time the program is accessed, and without having to use merge! It updates constantly and allows you to just sit back and punch the button of the program you desire to run. A fantastic effort! Rating: Excellent \$10
151. Haunted Mansion: Basic. A very clever graphic depiction of a haunted mansion that is complete with a witch flying through the air, blinking lights, a rolling pumpkin, and other oddities. Nice animation and excellent use of color. A fine example to study. Rating: Very Good \$2
152. Vienna Woods: Basic. An excellent translation of this famous waltz into computer music. It is by Straus and is worth your while to listen to! It is very well done and demonstrates the power of the TI sound chip. Rating: Excellent \$2
153. Vocabulary Quiz: Basic. This program tests your word power with some difficult words to define. It offers a nice random factor and is great for improving your vocabulary or learning the meanings of new words. Rating: Good \$2
154. Miner: Basic. Try to control your miner as he enters the mining shaft, recovers gold nuggets, and avoids hazards. It is a lively game with some thought required. Nice graphics and colorful scenery. Great fun for all ages. It may sound easy, but it isn't! Rating: Very Good \$2
155. Quantil: Basic. An interesting game involving ten switches, some of which are on and some of which are off. Try to get them in the correct order before your opponent does. It lets you know a right choice from a wrong decision, but it also gives your opponent an advantage each time you guess wrong! Rating: Good \$2
156. Cars: Basic. Now here is a game for the more dangerous drivers among you! You try to navigate your car into creatures and avoid the borders and trees. The car moves constantly and can only turn left! It is quite fast and getting a high score is difficult. Marvelous fun! Rating: Very Good \$2
157. Pony Time: Basic. (synthesizer required) This program offers a verbal account of a horserace. Pick your lucky horse, place your wager, and they are off. You can watch to see how your horse is doing while the computer babbles about the race. Strictly a luck game with odds figured in. Rating: Fair \$2
158. Sea Horse: Basic. A cute little graphic program that draws a seahorse on the screen. Color options are available. A nice graphic learning took, as it does do a nice job! Rating: Good \$2
159. Pink Panther: Basic. The familiar tune to the Pink Panther cartoon with colorful pink pathers appearing on the screen. Fun to watch, but more fun to just listen to! A nice effort. Rating: Good \$2
160. Snoopy: Basic. A graphic depiction of this famous cartoon character. You can alter the color of this famous pooch and observe the results. A very nice job was done with Snoopy! You'll love him. Rating: Good \$2

USER WRITTEN PROGRAMS

161. Shmoo: Basic. Lob mudballs at the invisible Shmoo and try to score points. You are prompted as to whether your guess is high or low on the distance. It does have speech and limited graphics. Great fun! Rating: Good \$2
162. Master Mind: Basic. Try to arrange the colored blocks into the right sequence of colors and into the proper physical positions. Your tries are limited and it is quite a mental challenge. Good graphics and several can play. Rating: Good \$2
163. White Hole: Basic. You must shoot invisible creatures with your laser, and that isn't easy! The direction and angle of your shot is shown, as well as the trail left behind. You must find the invisible creature by deducing its position from the data left by each shot. Great fun! Rating: Good \$2
164. Resistor: Basic. A colored representation of the various resistor color codes from black through white. Helps you learn the color code bands and their numeric equivalents. Rating: Good \$2
165. Road Race: Basic. Try to navigate your car around the race course and avoid the hair pin turns, obstacles, and other driving hazards. Several can play and it is interesting. Nice graphics and sound routines. It takes timing and good hand/eye coordination. Rating: Good \$2
166. Musical Key: Basic. Learn music with this nifty program. You control the pitch, duration, and note. Blend notes together to create a tune by use of the keyboard. Nicely presented and easy to use. Rating: Very Good \$2
167. Godfather: Basic. Some pretty music from the movie of the same name and some excellent graphics. It is easy listening and enjoyable to study the colors incorporated into these great graphics. Rating: Very Good \$2
168. Motocross: Basic. Try to get your cycle through this course and remain intact. Some nasty turns and other hazards to deal with. Difficulty levels make it tougher as you go! Want a challenge? Here it is! Rating: Good \$2
169. Echo Chamber: Basic. A twist on a Simon game with some exciting special effects. The sounds are reverberated and the game itself is quite a challenge for your memory and tone recognition abilities. Rating: Good \$2
170. Piano: Basic. Two tunes from the Beatles done by a piano. The graphic keyboard shows the notes as each one is played! Nice music and clever graphics. Nice for learning the piano keyboard. Rating: Good \$2
171. Computer Medi-Alert #1: X/Basic. A comprehensive program that deals with emergency medical situations. It offers information on counterdoses for poisoning situations or drug overdoses. A must for the home! Rating: Excellent \$2
172. Computer Medi-Alert #2: X/Basic. This program deals with emergency procedures for serious first-aid situations. Intended for educational purposes, but could be used in actual conditions. Rating: Outstanding \$2
173. Sweetheart: Basic. Let Me Call You Sweetheart done with graphics and nice music. Fun to watch. Rating: good \$2
174. Fishing: Basic. A cute graphic of a man fishing at the old fishin' hole. Nice for learning graphic procedures. Rating: good \$2
175. Space Combat: Basic. A neat demo of two ships attacking a third craft with lasers smoking and super sound effects. Great to learn animation from! Rating: Very Good \$2
