MARCH 1985
EDITOR Mark Harms

Hello, faithful computer users. Hope all can attend our next meeting. It will be held March 16, 1985 at the Bourbonnais Municipal Center, from 1 to 4 p.m.

ANY MEMBER WHO ATTENDS COULD WIN A FREE MODULE. Register as you come in. A drawing will be held before the meeting ends. That's all there is to it.

At our February meeting, George Lempeotis gave a super demo of the Personal Record Keeping module. We also had a fantastic demo of some of the ATARI computer's graphics and sound capabilities. Many thanks to the guys who did this for us. Bruce Shearer and his daughter Debbie gave a really nice demo of a power pad on the COMMODORE 64 computer. Even thought Debbie got a case of stage fright, she did a great job showing us her designs. Other children had a great time trying it out after the demo. It was one of those "You should have been there" days.

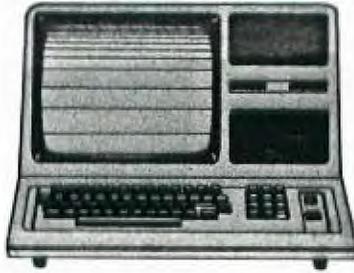

Have any of you ever wished you knew a little more about programming? We hope to start a Beginners BASIC programming class. Bring your computer and monitor and join us from 3:30 to 4:30. If any of you have a programming problem, bring it to the meeting and maybe one of us can help you solve it.

Got any news we should know about? Got something to buy, sell or trade? Are you looking for something? Let us know. There is no charge for listing your buy, sell, trade, wanted items in the newsletter. PRINT your ad on a piece of paper and leave it at the library. Got an interesting article you have written? We would be interested in that too. Its a nice feeling seeing your name in print. Heard any new hints lately? Let us know. We can always use articles of any length for our newsletter. How about it?

Our March meeting will feature a demo of a genealogy program by Fred Jacobazzi. I will also show how to change a power supply and keyboard. These should be interesting as well as informative.

As stated before, let us know if there is anything we can do to help you solve a problem or clear up a question. Also any feedback on our demos would be appreciated. We don't know how we are doing unless someone tells us. Jim Johnston, Mark Harms, George Lempeotis, or Bev Cook would be glad to hear your feedback regarding the meetings. If something doesn't suit you, let them know about it. Change comes slowly when only one person is told.

Hope to see everyone at the meeting. The TI994A has not been forgotten as far as we are concerned. Help us keep it alive and well by supporting our user's group.

This is a special edition to invite K-TUG members to our next monthly meeting at the Bourbonnais Municipal Center, 1PM, Saturday, MAR 16th, 1985. The program will consist of a demonstration of a record-keeping program on the TI99/4A, a general business session and at 3PM, a class in the BASIC language taught by members of the K3 board of directors lasting until 4:30PM - bring your consoles and monitors in order to follow the lesson material. This will be one of a series of 5 tutorial sessions following the course content of a class taught at Triton College in Chicago; you are most welcome and we hope you can attend all five sessions. Our meetings are on the third saturday afternoon of the month.

We are not a large organization; about 30 active members attend our meetings and we have about 80 on our mailing list. Our dues are \$7.50/year, and those of you in K-TUG will be considered as paid-up until your K-TUG dues expire. We will send two newsletters to all K-TUG members; if you wish to continue to receive copies, send us a note, come to a meeting and tell us, or give me a call at 815 467 5432; you will receive the newsletter until your K-TUG dues become due at which time we hope you will sign up with us.

We hope to obtain more articles of interest to TRS people from those of you who are willing to contribute; in fact Al Johnson would welcome any information you can give him to include in his column each month. The contents of this newsletter have been excerpted from several regular issues which were not sent out to you because of misplacing the list of addresses Mrs. Creel sent us. We hope this special issue will compensate for the delay.

LIBRARY NEWS
By Bev Cook

We have not had the time to find any new modules for the library, but we did run across a real bargain the other day. The library now has a modem for rent. We haven't decided on a rental fee yet, but we should have that decided by the next meeting. We hope to purchase a sidecar RS232 that can be rented along with the modem for those who don't have the P-box RS232 card. Our bulletin board will soon be up and running and the modem will allow any user to access it. Details will be coming soon.

We haven't got any new modules for rent but we hope to acquire some in the future. Keep in touch with us at the meetings and let us know what you would be interested in seeing in the library. Unfortunately, we will have to raise our disk prices a bit. They will now be \$13.00 for 10 disks. That's still not a bad price considering that 10 disks locally are about \$25.00.

As the saying goes, no news is good news. That's not true in our case, but that's about all that can be said for this month. If your name is listed below, your rentals are overdue. Late charges will be applied.

MINUTES JANUARY BOARD MEETING K13 USERS GROUP

by George Lempeotis Secretary

At the January board meeting there were seven board members in attendance. The treasury report was good, with sufficient funds to operate for a few months. The board passed a motion for the treasury to keep a minimum of \$80.00 in funds on hand. That amount would keep a cash reserve on hand to cover cost of two months newsletter production.

The board approved the mailing of two special editions of our newsletter to members of the K13 TRS-80 Users Group, in hope that we can bring them into our club. The board also decided to again mail out our newsletter to all our members.

The board also decided to open and put out the library after the presentation and demo at the general meeting, about 2:00pm. The board members also decided to rent all modules and booklets in a 5x7 envelopes, in order to keep both together.

The unfortunate resignation of Dan Morrissette as membership chairman, led the board members to give the task of membership paperwork to George Lempeotis and membership recruitment to Glen Flowers.

The March general meeting will feature a demo of replacing a console power supply, keyboard strips, and a RF TV hookup by Mark Harms and Al Johnson. The library will then open at 2:00pm. At the March meeting Al Johnson and other board members will try to teach basic programming to all interested members, starting at 3:00pm. All interested members are asked to bring their console and a TV set. This class in basic programming will be the first in a series and will continue at the same time at the general meetings in the months to come.

The board members also took action against selling or giving away a copyrighted program at a general meeting, due to a complaint by a club member. The board voted to deplore and will in no way sanction the giving away or selling of a copyrighted program. The board also voted to punish any members caught selling or giving away a copyrighted program at a general meeting. The punishment for the first offense of giving away a copyrighted program will be a three month expulsion from club activities, a second offense will bring permanent expulsion, and selling a copyrighted program will also bring permanent expulsion from our club. Any reported incident will be brought before the board for a hearing and then before the entire club at the general meeting for final resolution. This board action is not retroactive to past incidents.

FREE PROGRAM LISTING

The following people have programs coming under our attendance giveaway. Programs can be ordered on tape or disk. Bring your own tape or disk or you may purchase one at our meeting. Look through the catalog at the library and place your order with the librarian. The number after your name indicates the number of free programs you are entitled to. Don't remember how the program works? Check with the librarian at the meeting for details.

Bruce Shearer 3
Bev Cook 3
Jim Johnston 3
Dan Hessling 1
George Lempeotis 3
Rich De Roos 3
Greg Feige 1
Mark Harms 3
Glen Flowers 1
Roger Helm 3
David Conrad 1
Richard Ludlow 1
Larry McRoberts 3
Don Duncan 3
Paul Parkhill 1
Louis Surprenant 1

Our listing may not be complete. If you feel you are entitled to free programs, let us know. We may not have gotten a card made up for you. MAKE SURE TO SIGN IN WHEN YOU ATTEND A MEETING. That is our only way of determining if you were there.

REVIEW OF IBM/PC

By: Dan Hessling

I recently upgraded to an IBM/PC. I've only used it a short time, but I'd like to give a 'novice review'. The IBM is of course a very powerful system. With 256K expandable (so far) to 640K. It is a bit above the average 'home computer' market. But, I think that as time goes by the "PC's" of all Manufacturers will be lowered into the home computer market. There are five models of the IBM/PC right now: PC/Jr., PC, PC/PORTABLE, PC/XT, and PC/AT. THE PC/Jr. is a home computer, the rest are powerful enough to be business computers. Let's take my configuration: DOS 2.00, 256K, (2) 360K disk drives, mono/printer card, color graphics card, asvnc card, mono monitor, color tv, printer. The mono screen is super for text (and some graphics) the color tv is fuzzy on text but nice for graphics. (the color monitor would surely be a lot better for both.) the disk drives are very fast (a full diskette will copy in two passes (w/256k)) and its very nice to have two! The Disk Operating System is in my opinion fantastic! Short commands to do whatever you like for instance to copy a full disk one option is to key in "diskcopy" and "a: b:" to go from drive a to b (diskcopy a: b:). that's it the computer takes it from there. To get into the top level of Basic key in "basica" and your there! there are a lot of little things that are nice (like using capitals or lowercase letters for everything!). You may use both monitor at once if you like (text on one, graphics on the other). There is more to learn if you want to really get into the system. For instance you may run things straight from DOS. Some of these "programs" are called exe's, com's, and so forth. Another big plus is the availability of software, (especially free software). The only 'boughten' software I'm using is what IBM supplied with the system. (and a some other packages I bought for tutorial type purposes.) My wordprocessor, spell checker, file program and others are semi-public domain software. (you may copy and if you find the program(s) of use are ASKED to send a 'donation' to the author). I could hardly believe it! From what I've seen of the wordprocessor it seems to be at least as powerful as TI-Writer! The one disadvantage would of course be cost. But if you consider that the prices are dropping and the free software its a pretty good buy.

To close out this column I'd like to say that I still really like the TI as well. The IBM/PC should in any case be compared only against the TI/PC, and other computers in its own class, not the 99/4A. I still think the 99/4A is the best computer in its class. In my opinion far ahead of Commodore and the others.

CHARLES KATZ
SALES/PURCHASING

What's New with TI?
E. A. Johnson, 27 Jan. 1985

The January Chicago TI users group meeting at Triton College produced a speaker who pointed out that keyboards and RF modulators can be obtained inexpensively. When our consoles, etc. cease working, we can always take them back to TI's exchange centers and pay \$30 for a reconditioned console and \$8 or so for an RF modulator. However, if the problem is the keyboard, we could substitute keyboards for \$2.50 and buy a modulator for \$2.50. The question is whether to stock up on such parts while they last so members can have the club try this fix and pay sev half the TI exchange center price if it is the keyboard, with the rest going to the club. If anyone wants to try this avenue themselves, the following ordering information is furnished:

Babrat Electronics, 17650 Floyd Rd., Suite 104, Dallas, TX 75247: 214 783 4950: Keyboard \$2.50 or ten for \$19: RF Modulator: \$2.50 or ten for \$15.

American Design Components, 62 Joseph St., Moonachie, N.J. 07074: 900 524 9809: 5 1/4 floppy stand-alone plus disk controller card: \$99. I also ran into a former TI representative who is now building disk drives full-time. Gary Dodendorf (his partner is Chuck Hoff; Mark has bought drives from Chuck). Gary has a 35 track single sided double density drive for \$75; half height SSDD (single sided double density) for \$125, SSDD full height for \$100, etc.; call him at TI 254 4144.

A final note on equipment: Radio Shack has purchased a large number of surplus console power supplies and is selling them for \$7 or so.

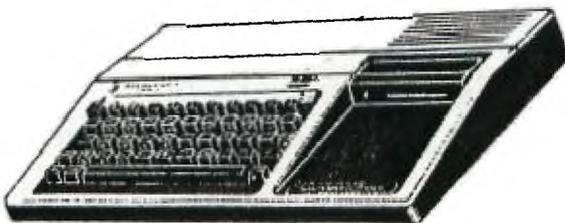

Another initiative of the Chicago chapter last time was the initial class in TI basic which was run immediately following the meeting. In the newsletter, all who wished instruction in BASIC were urged to bring their own consoles and TV's and set them up after the meeting; the Chicago club president, Sam Pincus, a very knowledgeable individual, then taught BASIC for the next 90 minutes. I was amazed at the number of people who responded; there must have been 50 or so; with all their equipment, they occupied a large space. Many children and teen-agers were there. There was no cost to participants. Based on this, I would like to invite all interested to attend a class which I and possibly other members of our group will teach following the next K 3 club meeting in February. Bring your own equipment; we will cover essentially the first of the 5 session course I teach at Triton College in programming on the TI99/4A. If you have cassette players, bring them; I will discuss their use and we will write a program and save it on cassette.

We do not always have pleasant subjects to consider. A rumor has it that a member of our club is selling pirated programs. I am proposing a club b.law that any such person be expelled from our club. I am also proposing that any person copying copyrighted programs to give away free be suspended for 6 months. People who know who is doing this should attend our board meetings to give this evidence - all I get is hearsay. This is serious: our club can be sued, the officers can be sued and we cannot condone theft.

The Tandy Corp is launching a program to send sales reps to individual homes, etc. to demo the color computer. This is much like the TI effort in 1982, and I called to get more information. Currently they want full-time people to set up visits with schools, etc. by Spring they will be looking for part-time people. This would be a good opportunity for our Radio Shack Color Computer owners as well as anyone with some computer capability.

One or two more observations: about a month ago, Coleco announced discontinuation of the Adam. Atari and Commodore are in trouble. It looks as though the home computer market is losing the lower priced selections such as the Commodore 64 and that the IBM Jr., Apple II and IBM clones such as the TI Professional, all in the \$2000 (with disk drives) price range are becoming the home computer marketing choices. I have just purchased ten new consoles for loan to my IEC and Triton students at my computer programming courses as Roy Hunter tells me his source cannot get any more consoles. It is hard to believe there are no good home computers in the \$200-300 range except the Commodore 64, and that despite this lack of competition in their price range, Commodore is in trouble. However, that is the picture I get.

See you at the next meeting. . .

EVENTS OF THE MONTH

By Mark Harms

This month George and myself attended a computer flea market in Des Plaines on the third of March. I found it fascinating and a little disappointing. There is still alot of bargains for the TI owners in the club. I was able to purchase a csl cable, power supply and the transformer for only \$5.00!!

For the other computer owners there was an abundant supply of hardware and software for the Commodore,IBM,Apple, and the Radio Shacks. All I could keep saying was I wish I had more money.

Now for the good news for those that missed it. On SUNDAY MARCH THE 31ST it'll happen again!! I will be at the HOLIDAY IN located in ROLLING MEADOWS, IL. at 3405 ALGONQUIN ROAD from 10:00 AM TILL 4:00 PM maybe some of us can car pool up at the end of this month.

If you want to have a booth or need more info then call 1-312-981-1727 admission is \$3.00 and children under 12 are FREE!!

LET'S TALK
By Glen Flowers

Hiya. Well if you remember from last month I gave you the basics on modems. Now, a month older and wiser, I have some more tidbits of information for you. Contrary to what I said last month about needing a TE2 Cartridge to use a modem on the TI Home Computer, you can use an Extended Basic Program send and receive information and play games. Mark Harms and I have played a game called "BATTLESHIP" through Extended Basic. Its layout is like the board game only instead of having a divider between the players, the opponents are linked via phone lines. It's lots of fun.

Mark and I have now revised a few games of our own to work on the modem.

Last month, I was also discussing bulletin boards and the high price in phone bills that you could incur. Well, in a little time there may be a K3 User's Group Bulletin Board. This project is already in the works and hopefully next month will be ready for use. We have also managed to purchase a modem for club rental which should be available to group members soon.

That's about all I have for you this month. As I delve into this subject deeper, I hope to bring you more technical info in the future. Until then, keep in touch (Ma Bell loves it).

bye.....

hang up please....#%#!

GOOD STUFF FOR THE TI
By Mark Harms

How does a Multi-Color Pen PLOTter sound for under \$120.00?

Yep that's right the Radio Shack Pen Plotter will adapt to the TI for use with the RS232 card and it really looks neat.

The original price for the unit was around \$250.00 and their closing them out at \$119.99 while the supply lasts.

It will make pie charts and bar graphs and even draw pictures with the right software, wich I understand is easy to write or find. if I find out more about this I'll relay it at the next meeting so see you there and keep watching for GOOD STUFF FOR THE TI !!

HINTS FOR ZORK II BY JOY FLOWERS

I hope that last months hints where helpfull to you. I have not realy worked too much on this adventure in the last month but maybe you have not gotten too far ahead of me. Have you found out how to get past the dragon? Well it realys is not all that hard, get him to follow you, as you have probably found out that once he gets close to the cool room he turns around and heads back to the door that he is guarding. Dragons do not like anything cold as you have discovered. Well here is how you do it... He has to follow you all the way to the ice berg and you have to do this in ONE command try to get him angry and he will follow you and when he reaches the ice he will help you melt it. As I said last month the Unicorn will come after the dragon is gone.

As for the locked door that you have found put the placemat to work. Now for the Riddle Room. I really hope that you have figured this one out on your own if you haven't WELL better luck next month.

If you have not yet made a map of this Adventure why dont you give me a call at home in the evenings at 937-5009 and I will be glad to get a copy of mine made for you. You will find that having a map to follow as you adventure through the Zork II is very beneficial,Especially when you are lost. Good Luck to All of you

HAPPY ADVENTURING
