** MEETING MINUTES - 12/20/89 **
 THERE WERE NO MEETING MINUTES... Instead, the group had a great little Christmas Party at Round Table Pizza. Food and drink were provided courtesy of the 4N treasury.

The party began at 6:00 P.M. and ended around 8:30 P.M. Over 20 people showed up for the festivities. The evening included some demos of newsletter programs, gift-swapping, Bisks of the Month give-aways (Carfax Abbey and Quest), and a blackout BINGO game. Joel Cote' was the lucky winner of the Crocheted Mouse - donated by Mrs. Edie Bettling, and Roland Chapman won the embroidered Christmas Sleigh - donated by Mrs. Audrey Conradt. A.G.T.N.B.B.A! (A good time was had by all!)

** OLD BUSINESS **

"IMPORTANT REMINDER" Annual membership fees are due and payable at the upcoming meeting - Tuesday, January 30, 1990. Please, bring cash or check and help support your local users' group for another fun-packed, educational year.

If you are thinking of leaving the group because you can no longer attend the monthly meetings but would like to remain involved, why not consider an associate membership? For only \$15, you can receive the monthly newsletter and will at least be kept informed as to the latest goings-on in the TI community.

The TI/99/4A POSTER of SPOCK will be handed out to members at the January meeting for local distribution.

 A friend and longtime member of 4N, MR. JOE BETTLING, passed away recently during the holidays. To his wife, we offer our deepest sympathies... OUR HEARTS ARE WITH YOU, EDIE.

** DISK'S OF THE MONTH **

The following two programs will be featured this month and demoed after the general meeting by Ed Conradt:

Disk #1 -
 BOOT (Utility software - XB, Super XB, or Mechatronics XB required.) A copyrighted fairware disk utility offered by Miami Users' Group, 6755 Tamiami Canal Road, Miami, FL 33126. Asking for any amount in the way of donations and/or comments.

- This is a sensational utility which should have been thought of a long time ago for the XB environment. Noted for its ease of operation and its valuable time-saving steps, BOOT, quite simply, is a very versatile, user-friendly disk directory program. It is similar in many ways to the menu-driven directory program once available only to Horizon Ram Disk owners. Some of BOOT's credentials include:
1. List directory to printer or screen
 2. View ANY file
 3. Run ANY program
 4. Add User configurable options

5. Change background colors
6. Change foreground colors
7. Delete ANY file
8. CALL a routine with one key
9. Cycle through all BRON's
10. Get and display a ROM cartridge header at >6000
11. Boot-tracking option
12. Toggle the XB color interrupt routine on or off
13. MORE...

An excellent and highly recommended utility. Docs are included.

Minimum system requirements:

- ~ TI-99/4A console
- ~ 32K memory expansion
- ~ 1 SSSD disk drive
- ~ ANY EXTENDED BASIC cartridge

Disk #2 -

TETRIS - (Fairware game, Ver. 1.3 - XB required.)
 Author: Alexander Wulpe, Sadonstrasse 68,d-3600
 Huppertal 1, West Germany. Asking \$10 if you use his
 program.

The object of TETRIS is to assemble, as compactly as possible, an onslaught of various puzzle pieces as they plummet towards the bottom of the screen. There are only four basic shapes to contend with, each one different in color. Simple? Uhhhh...I don't think so.

Before you can start, though, you must choose the speed of descent; after which, you are given complete control of the pieces as they begin to fall, one by one, to the bottom. As soon as one piece is in place, a second one starts to drop immediately. While its falling, you can move each piece to the left or to the right, rotate it, or even drop it quickly to the bottom. This is a very well written program with great graphics, good music (Scarborough fair), and is definitely a challenge to play. (I'll bet you can't keep from swearing even a little in this one! Try it for yourself.)

Minimum system requirements:

- ~ TI-99/4A console
- ~ 32K memory expansion
- ~ 1 SSSD disk drive
- ~ EXTENDED BASIC cartridge

*** Editor's Notes ***

A Tip of the 10 gallon hat to:

Mr. Charles Good of the LINA 99'ers users' group. He kindly sent us the latest FUNNELWEB update, version 4.21. It is available through the program library for a nominal fee. If you try it and like it, remember to send Tony & and Will McGovern a thank you message in the form of an international money order.

Charles Good is also offering to Users's Groups Only a video tape demonstrating the Configuration feature of FH, step by step. For those groups interested, send a blank QWS tape and paid return mailer, or \$5 to: LINA 99/4A UG, P.O. Box 647, Venedocia, OH 45894.

It has come to my attention that the CARFAX ABBEY disk given away at the Christmas Party last month had a bug in the loading sequence. It appears that while converting the program, I accidentally typed in two "D's" at the end of the second load filename, "CARF/LOADD". To correct this, simply fire-up your Disk Manager 2, (Or BN1000) and change the filename from "CARF/LOADD" to "CARF/LOAD". Sorry!

Also, for those of you who have taken the time to type-in the program, VICIOUS, from the December issue of the OUT*POST and can't seem to get it to run correctly; try examining line 150, which starts out: FOR A=4 TO 18... In the sequence following the DISPLAY AT command, there is a lower-case "L" in it, NOT the numeral "1". Make that simple correction and you won't (shouldn't) have anymore problems.

TI FEST WEST 1990!
 By Jim Ely, VAST NEWS / Jan '90.

The Best Faire In The West is this year being hosted by the Southwest Ninety-Winers In Tucson. The dates to remember are February 17, 1990 from 9 A.M. to 5 P.M. and February 18, 1990 from 9 A.M. to 3 P.M. It is being held at the Days Inn, 88 E. Broadway, Tucson, AZ 85701. For room reservations call (602) 622-4000 and ask Olivia for Fest Nest hotel rates. Admission for the Faire is \$4, under 15 years old free when accompanied by an adult. One of the main prizes to be given away is a NYARC HFD controller card. Other prizes and door prizes will also be announced. For more information, you can call the Cactus Patch BBS at (602) 795-1953 in Tucson. You can contact the Southwest Ninety-Winers directly at P.O. Box 17831, Tucson, Az 85730, (602) 747-5046. (I have two complete information packages for anyone interested. -Ed.)

(The OUT*POST is compiled with Will and Tony McGovern's FUNNELWEB (V4.21), Chris Faherty's TI-ARTIST+, and Jack Suhrue's PLUS)

TIPS FROM THE TIGERCUB

#57

Tigercub Software
156 Collingwood Ave.
Columbus OH 43213

I am still offering over 120 original and unique entertainment, educational and utility programs at just \$1.00 each, or on collection disks at \$5.00 per disk.

The contents of the first 52 issues of this newsletter are available as ready-to-run programs on 5 Tips Disks at \$10 each.

And my three Nuts & Bolts Disk, \$15 each, each contain over 100 subprograms for you to merge into your own programs to do all kinds of wonderful things.

My catalog is available for \$1, deductible from your first order (specify TIGERCUB catalog).

TI-PD LIBRARY

I have selected public domain programs, by category, to fill over 200 disks, as full as possible if I had enough programs of the category, with all the Basic-only programs converted to XBasic, with an E/A loader provided for assembly programs if possible, instructions added and any obvious bugs corrected, and with an auto-loader by full program name on each disk. These are available as a copying service for just \$1.50 post-paid in U.S. and Canada. No fairware will be offered without the author's permission. Send SASE for list or \$1, refundable for 9-page catalog listing all titles and authors. Be sure to specify TI-PD catalog.

I like little programs that load quickly and do just what I want to do at the moment. And one of the things I wanted to do quickly was to find phone numbers. So, I used FUNLWEB to create a little file -

SMITH,JOHN (999) 111-2222
BUSH, GEO. (000) 123-1234
GHADDAFI, O. (666)66-6666
and all my other frequently called numbers. I SAVED it as DSK1.PHONELIST and wrote this little routine to use it.

```
100 CALL CLEAR
110 OPEN #1:"DSK1.PHONELIST",INPUT
120 DISPLAY AT(12,1):"LAST NAME?" :: ACCEPT AT(14,1):N$
130 LINPUT #1:M$ :: IF POS(M$,M$,1)<>0 THEN DISPLAY AT(16,1):M$ :: RESTORE #1 :: GOTO 120
140 IF EOF(1)<>1 THEN 130
150 DISPLAY AT(16,1):"NAME NOT FOUND" :: RESTORE #1 :: GOTO 120
```

Now actually, that was all I needed,(even though it did take several seconds to find a name at the end of the file), and it was easy enough to load the file into FUNLWEB when it needed updating. But, programmers are never satisfied, so I decided to write a self-contained program -

```
100 CALL CLEAR
200 DATA "ALDA, ALAN 888-9999"
201 !@P-
300 DATA "BUSH, GEORGE 111-1111"
400 DATA "PRESLEY, ELVIS 000-0000"
499 !@P+
500 DISPLAY AT(12,1):"LAST NAME?" :: ACCEPT AT(14,1):N$
600 READ M$ :: IF POS(M$,M$,1)<>0 THEN DISPLAY AT(16,1):M$ :: RESTORE 200 :: GOTO 500
700 ON ERROR 800 :: GOTO 600
```

```
800 DISPLAY AT(16,1):"NAME NOT FOUND" :: RESTORE 200 :: GOTO 500
```

That funny thing in line 201 turns off the prescan and speeds up initialization. This routine is no faster than the last, but can be updated by editing the program itself. It is limited to about 500 records due to the least-known and greatest weakness of the TI, that string storage is limited to console memory.

But, computer users are paranoid about speed, so I decided to put my data into a pre-loaded array with self incrementing subscript numbers, and find the data by a binary search.

```
100 !QUICKFINDER by Jim Peterson
200 DIM D$(50):: GOTO 300 :: D$(1),X :: !@P-
300 X=X+1 :: D$(X)="ALDA, ALAN (999) 666-1234"
400 X=X+1 :: D$(X)="BUSH, GEORGE (111) 111-1111"
500 X=X+1 :: D$(X)="GHADDAFI, OMAR (999) 456-1234567"
600 X=X+1 :: D$(X)="KHOMINI, AYATOLLAH (666) 666-6666"
700 !@P+
800 INPUT "NAME? ":M$
900 IF M$>D$(X) THEN PRINT "NOT FOUND": "CLOSEST IS":D$(X) :: GOTO 800
1000 IF M$<D$(1) THEN PRINT "NOT FOUND": "CLOSEST IS":D$(1) :: GOTO 800
1100 H=X :: S=INT(X/2)
1200 S=D$(S):: IF POS(S$,M$,1)=1 THEN 1700
1300 S=D$(S+1):: IF POS(S$,M$,1)=1 THEN S=S+1 :: GOTO 1700
1400 IF S>M$ THEN H=S :: S=INT(H/2):: GOTO 1600
1500 S=S+INT((H-S)/2)
1600 IF S=S2 THEN 1800 ELSE S2=S :: GOTO 1200
1700 PRINT D$(S):: GOTO 800
1800 PRINT "NOT FOUND": "CLOSEST ARE"
1900 IF D$(S2)>M$ THEN PRINT D$(S2-1):D$(S2+1):: GOTO 800
```

```
0
2000 PRINT D$(S2+1):D$(S2+2):: GOTO 800
```

Note that in this case the records must be in alphabetical sequence. New records can be inserted in intermediate line numbers, in alphabetic sequence, always preceded by X=X+1 :: D\$(X)= . Obsolete records can be deleted, and records can be corrected in place if the correction does not change the alphabetic sequence.

This idea did not work out as well as I hoped. The maximum number of records is less than 300, for the reason mentioned above, and this leaves so little free memory that even a binary search is slow. However, for a smaller file this is perhaps the best method.

For a large file, the best method is certainly a fixed sequential disk file, accessed by a binary search routine. But, that requires other routines to delete, add or change records, and had best be the subject of another Tips.

There is apparently a mistaken belief that sprites cannot be used together with my BXB routine. Not so - you can use all 28 of them! However, you cannot change their color with CALL COLOR(#,N). The only other limitations of BXB that I can think of, are that a single CALL COLOR cannot be used for multiple character sets and a single CALL CHAR can only reidentify one character. CALL CHARPAT cannot return the hex code of an ASCII above 143 because those ASCII's were not supposed to be available in Extended Basic.

I have used BXB on hundreds of Basic-only programs and have had only

two rare problems. If the program contains multiple line feed colons :::::, the computer may rearrange them into pairs of double colons :: and lock up. Or, if the colons are before the text, as in PRINT "something" you may get a puzzling error message.

Also on rare occasions you might get an error message indicating the subprogram was called from a line containing a CALL CHAR, if the programmer had inadvertently put more than 16 characters in the hex code. Basic just ignores any extra characters, and XBasic uses them to reidentify the following ASCII, but BXB crashes.

From the TI!M\$E\$S newsletter from England, here is an extremely useful bit of assembly which should be assembled as ALPHA/O and placed on the disk of every joystick program, or imbedded in it with ALSAVE.

```
DEF ALPHA
# save old R12
ALPHA MOV R12,@FFFC
# 9900 CRU base=0
CLR R12
# signal alphalock key line
SBZ 21
# check alphalock other side
TB 7
# jump if state=on
JNE STATE
# state=off
SETO @FFFE
# as off skip next line
JMP JUMPA
# state=on
STATE CLR @FFFE
# stop sending to alpha key
JUMPA SBO 21
# restore R12
MOV @FFFC,R12
# standard XB return now
# clear error for basic
SB @B37C,@B37C
# return to calling program
B @0070
END ALPHA
```

Now, put this in the first lines of the joystick program -

```
1 ! by M. Gikow, Andover
  MA August 1989
2 ! used with ALPHA/O,
  will detect whether
  Alpha Lock is up (A=
  255) or down (A=0)
3 CALL CLEAR :: CALL INIT ::
  CALL LOAD("DSK1.ALPHA/O")
4 CALL LINK("ALPHA"):: CALL
  PEEK(-1,A):: IF A=0 THEN DIS
  PLAY AT(12,1):"RELEASE ALPHA
  LOCK" :: GOTO 4 ELSE CALL CL
  EAR
```

I published this one in the C.O.N.N.I. newsletter. Barry Traver picked it up and put it in the TI Forum in Computer Shopper, but their typesetter garbled it, so here is how it was supposed to be -

According to the TI-Writer Reference Guide, page 77, when you select the PrintF command, then type C and space once and then the device name, any control characters with ASCII less than 32 are removed before the file is printed.

With Fun!web, at least, this is not quite true. A carriage return character, ASCII 13, or a line feed character, ASCII 10, at the end of a line is actually not deleted but is changed to the space bar character, ASCII 32. This can be proved by running this little routine -

```
100 OPEN #1:"DSK1.(filename)
  ",INPUT
110 LINPUT #1:M$ :: PRINT M$
  :LEN(M$):: IF LEN(M$)>0 THEN
  PRINT ASC(SEG$(M$,LEN(M$),1
  ))
120 CALL KEY(0,K,S):: IF S=0
  THEN 120 ELSE 110
```

Therefore, when a file is Filled/Adjusted and the line feed characters are stripped

with the C option, the lines are one character longer than they appear to be. An apparently blank line also contains ASCII 32.

Since these characters are blank, they normally do no harm. However, they can create problems when records are read into programs for multiple column printing or concatenation of strings. In these cases, this routine can be used to strip out any ASCII below 33 at the ends of records.

```
100 DATA INPUT,OUTPUT
110 FOR J=1 TO 2 :: READ J$
  :: DISPLAY AT(12,1)ERASE ALL
  :J$&" FILENAME?": "DSK" :: AC
  CEPT AT(13,4):F$(J):: OPEN #
  J:"DSK"&F$(J),UPDATE :: NEXT
  J
120 LINPUT #1:M$
130 IF ASC(SEG$(M$,LEN(M$),1
  ))<33 THEN M$=SEG$(M$,1,LEN(
  M$)-1):: IF LEN(M$)>0 THEN 1
  30
140 PRINT #2:M$ :: IF EOF(1)
  <>1 THEN 120 :: CLOSE #1 ::
  CLOSE #2
```

Attention all newsletter editors! If you are going to print my Tips (or anything else that contains program listings!) through the Formatter, PLEASE first replace and transliterate the ampersand, asterisk, period, carat and "@" sign! Print this one through the Formatter and see why -

```
100 A=A$264 :: B=1
110 PRINT "1 . . . 2 . . . 3
  . . . 4 . . . 5 . . . 6 . . .
  7 . . . 8 . . . 9 . . . 0"
120 M$=M$&A$&B$&C$ :: K=K^3
```

Here's how you do it. Load the above in the Editor, position the cursor at the beginning of the 1st line, hit FCTN 9, type RS and Enter, then /&/ and Enter. At the prompt, type A. Now get the cursor back to the beginning, repeat the

above with /&/, and then /./ and /~/ and /@/ and the file should now look like this -

```
100 A=A$264 :: B=1
110 PRINT "1 \ \ \ 2 \ \ \ 3
  \ \ \ 4 \ \ \ 5 \ \ \ 6 \ \
  \ 7 \ \ \ 8 \ \ \ 9 \
  \ \ 0"
120 M$=M$&A$&B$&C$ :: K=K^3
```

Now use FCTN 9 to open 5 lines at the top and add this transliteration -

```
.TL 92:46
.TL 123:64
.TL 124:42
.TL 125:38
.TL 126:94
```

Save the result, go to the Formatter and print it.

If my multi-column Printall program (Tips from the Tigercub #45) won't run on your Epson-compatible printer, try changing line 250 to -

```
250 ACCEPT AT(12,3)VALIDATE(
  "123")SIZE(1):P :: IF P=2 TH
  EN PRINT #1:CHR$(27);CHR$(77
  )ELSE IF P=3 THEN PRINT #1:C
  HR$(15)
```

You might also need to change the 136 in line 280 to 132.

If your printer offers the elite condensed option, you might want to add -

```
:" (4) ELITE CONDENSED" to
line 240, change the
VALIDATE string in 250 to
"1234", add ELSE IF P=4 THEN
PRINT #1:CHR$(27);CHR$(77);C
HR$(15) to the revised line
250 and add +(P=4)*160 to
the first statement in line
290.
```

Memory almost full,

Jim Peterson

```

```

A LOT OF FONTS ARE AVAILABLE TO TI-ARTIST AND C.S.G.D. FANS, BUT ONLY IF YOU KNEW WHICH CHARACTERS WERE IN THE FONT, AND WHAT THEY LOOKED LIKE, WITHOUT HAVING TO LOAD THE GRAPHIC PROGRAM AND TYPE THE WHOLE RANGE JUST TO SEE! PETER HODDIE'S FONT WRITER AND GRAPHIC EXPANDER HAVE THE SCAN OPTION, BUT PERHAPS YOU DON'T OWN THEM; AND THEY HAVE A DRAWBACK: ALL CHARACTERS BEING LISTED TOGETHER, THE SYMBOLS AND PUNCTUATION CHARACTERS ARE HARD TO SPOT. SO I WROTE THIS QUICKIE, TO DISPLAY THE CHARACTERS IN FOUR CATEGORIES: UPPER CASE, LOWER CASE, DIGITS, AND OTHERS (SYMBOLS AND PUNCTUATION). THE LETTER "A" IF PRESENT, IS DRAWN ON THE SCREEN IN ACTUAL SIZE.

THE DIS/VAR 80 FONT FILE IS READ LINE BY LINE; WHEN A SOLE CHARACTER IS ENCOUNTERED IT MEANS "THIS IS THE CHARACTER DEFINED NEXT"; LINE 220 WILL TAKE IT'S ASCII VALUE A, AND THE SUB HC WILL SHOW IT ON THE SCREEN, IN THE APPROPRIATE CATEGORY; IT WILL ALSO BE ADDED TO A STRING FOR THE PRINTOUT. IF THE CHARACTER IS AN "A", THE PROGRAM JUMPS TO A SUBROUTINE.

TO DRAW THE "A", WE LINPUT THE NEXT LINE IN THE FILE; IN LINE 320, WE EXTRACT THE TOTAL COLUMNS AND ROWS; WE DON'T NEED THE THIRD VALUE IN THE LINE, "PIXEL JUMP". EACH SUBSEQUENT LINE CONTAINS THE DECIMAL EQUIVALENTS OF THE HEX BYTES FOR ONE CHARACTER DEFINITION, SEPARATED BY COMMAS. THESE VALUES ARE READ AND TRANSFORMED INTO THEIR HEX VALUE BY CALL CBYTE; WHEN THE STRING C\$ IS COMPLETE, WE CALL CHAR A CHARACTER ABOVE 127 AND CALL HCHAR IT IN THE UPPER CORNER OF THE SCREEN (FOR VERY BIG CHARACTERS, COUNTER K REVERTS TO 91 UPON REACHING CHARACTER 142, ALREADY USED FOR THE SCREEN DISPLAY).

WHEN ALL THE FILE HAS BEEN READ, YOU CAN SCAN (A)NOTHER FILE, (P)RINT A LISTING (MINUS THE GRAPHIC "A"), OR (Q)UIT. IF YOU WISH TO GET A GRAPHIC DUMP OF THE SCREEN WITH THE "A", YOU CAN USE AN ASSEMBLY SCREEN DUMP AT THIS POINT (CALL LOAD THE FILE BEFORE LINE 150; CALL LINK REPLACES 310-320).

(I CHANGED THIS PARAGRAPH TO REFLECT THE FACT THAT THE PROGRAM LINES TO SCAN C.S.G.D. FONTS ARE ALREADY ADDED. [WOODY]). IN C.S.G.D. FONTS THE "A" WILL NOT BE DISPLAYED, AS I DON'T KNOW YET HOW IT'S DONE! THESE FONTS FOLLOW THE SAME PATTERN: UC ONLY, UC/DIGITS /OTHERS (ALWAYS THE SAME ONES), UC/LC/DIG/OTHERS; THE VALUE A, THE TOTAL NUMBER OF CHAR. IN THE FILE TELLS THE STORY. WHEN YOU WISH TO SCAN A C.S.G.D. FONT YOU MUST ADD THE "/CH" SUFFIX TO WARN TEX

IMFACT/99

XB SPEED

WORD HUNTING

Puzzles are a word-processing tool we often forget about. Although I'm not much of a word hunt person (word search, find-a-word, whatever), my fifth-grade students are. I prefer crosswords or cryptograms, but wordhunts have their value. They are also a very pleasant way to introduce the names of bones in the human skeleton or the Presidents or geometrical terms. Computers are great teacher helpers in these matters. All one has to do is find a puzzle-creator program from somewhere and type in the words. The sorting and placement and completion of the puzzle is done by our 99. So is the making of hardcopies of puzzle, wordlist, answers. It's so easy. But not always so quick.

Way back in 1982 *WORD SAFARI* was programmed for TI. It's amazing how many people own it but never use it. Most people got it with *OLDIES BUT GOODIES* before they got printers or disk drives. By the time they got these things they'd long since forgotten this puzzle gem.

I have six word hunt programs, PD and commercial, but there was always a few things about WS that appealed to me. (The "thinking numbers" on the lower right screen, for one.) Though it was soundless and colorless and was SLOW BASIC and had very poor printouts, the program had a structure I liked. The way the menu operation worked appealed to me.

I decided to use that original structure to make a more modern version of this puzzle, suited for disk. First it had to be XB for speed and because I don't know assembly. Then it had to have a continuing music pattern while the reading was going on internally. It also had to have color. And some better screen directions. And much better hardcopies (enlarged, double strike, etc.) with a better overall look. It also had to be drastically reduced in size, though XB would take care of some of that automatically.

I printed out all six of my word hunt puzzles to see what features I wanted for this new one and how I could most efficiently program it. It was fun. Besides the menu operation, I found the sizes offered were excellent for the different kinds of things I planned to do in my classroom. Each of the programs presented me with interesting concepts and interesting problems. However, after three days (nights, actually) I had a debugged version which satisfied me. Then, as I do with all programs, I gave it to some adults and some kids to play with. The input from them helped me fine tune the project. I then (as I always do) put it away for a couple weeks.

Later, I took the "worker" disk out of storage, turned on my Gemini, and set out to do my first "official" school puzzle: names of dinosaurs (thus I had to use the large square).

Perfect.

I made 27 copies of the puzzle and word list for the kids and one copy of the answers for me. FAST!

Then I put this right on my *FUNPLUS!* and was ready to use it whenever I word processed. Very handy. I since have added a few subprograms from Jim Peterson's wonderful *NUTS 'n BOLTS* disk which will not appear in the succinct piece below.

Anyway, I'm not permitted to print the six original hunt programs, but if you have a copy of *WORD SAFARI* and/or some others you might want to try them out if you haven't used them for a while; then print out a copies of the listing.

Next type in a copy of *WORD HUNT*, try it out, and make some comparisons. This will give you a good idea of how I went about the task.

Think about some really good programs you recall from the past, dig them out, look them over, see if you can brighten them up, make them better. Sometimes it'll take drastic changes. Sometimes little. But in either case you've had some fun with some programs you probably would have left forgotten in a box in the closet. Now you can enjoy them all over again.

NOTE: When I first wrote the program I was going to write it in BASIC. After I translated quite a few line from my flowchart notes, I decided to go into XB. I continued with the PRINT and colon lines instead of DISPLAY AT statements until testing. It turned out to be fine and fast as it was, so I left them in. Those of you who'd like to tighten this even more, adding or changing features, send me a copy. If the improvements are really good, I'll print an update

in a future column. (Am also looking for original SHORT programs in XB for inclusion here with full credit.)
JACK SUGHRUE, Box 459, E.Douglas MA 01516

 Other restaurants
 Greyhound Bus Depot
 Amtrak Train Depot

Conference Room:
 Separate building from hotel
 Easy access to ample parking
 Restrooms in the building
 Plenty of outlets
 Phone jacks
 Wall lit
 Seminar room may be included in same building (depending on # of vendors)

Guest rooms - \$44 per night double/single (plus taxes)
 Children under 18 free in parents room
 Continental Breakfast (included)
 Suites available (extra cost)
 Golf Passes (green fees - cart, rent/transportation to courses not included)
 No charge for local phone calls
 Cocktails 2 free per adult per room - alcoholic or non-alcoholic
 Saunas
 Hot Therapy Pool
 Swimming Pool
 Lounge with TV/Bar in basement of hotel
 Transportation to/from Tucson Mall provided by Tucson Mall
 Non-smoking rooms (request)
 Wetbars (refrigerator) in rooms (request)
 Coffee makers in rooms (request)
 Rollaways - additional \$7 per rollaway per night

**** PUBLICATION NOTICE AND DISCLAIMER ****

The OUTPOST, is published monthly, except in JULY and AUGUST of each year, by the NORTHERN NEVADA NINETY-NINERS USERS' GROUP (4N), a non-profit organization, supporting the TI-99/4A and compatibles. 4N is not affiliated with TEXAS INSTRUMENTS or their subsidiaries.

Any mention of a specific product in this newsletter does not constitute an endorsement.

Opinions expressed in this newsletter belong solely to the writer and does not necessarily reflect the views of the OUTPOST, it's Editor, the 4N Users' group, it's officers or members.

Articles in this newsletter may be reproduced, provided they are not used for profit, and due credit is given to the author and the original source.

All 4N Users' Group members are encouraged to submit articles, programs, tips, etc., for publication in this newsletter. Please, send your submittals to:

4N Newsletter Editor
3490 Golden Valley Road
Reno, NV 89506

(Comments and letters are always welcome!)

**** 4N BOARD MEMBERS ****

President	-	Dic Slunaker	-	673-2436
Vice-President	-	Sandy Goetze	-	827-3721
Secretary	-	Andy Yuan	-	747-6325
Treasurer	-	Richard Emblen	-	786-9181
Program Librarian	-	Ed Conradt	-	358-2328
Newsletter Editor	-	Roland Chapman	-	972-8209

Term of office, 12/88 - 12/90.

**** MEMBERSHIP ****

To join the Northern Nevada Ninety-Niners, an annual fee of \$20.00 (\$15.00 for newsletter ONLY subscription) is due and payable on or before the last Tuesday of each January. Membership includes a monthly newsletter, access to the Program and Paper libraries, and S.I.G.'s.

The following color-coded address labels serve as reminders to our subscribers/members regarding their active status with 4N:

GREEN highlight = Renewal fee due.
 YELLOW highlight = Fee is 1 month overdue.
 RED highlight = Fee is 2 months in arrears.
 FINAL NOTICE!

**** PROGRAM LIBRARY ****

Disk programs are available from our library at the following rates:

SS/SD = \$2.00
 DS/SD = \$4.00 (includes FLIPPIES.)
 DS/DD = \$6.00

Send disk, self-addressed postage-paid return mailer and check or money order with your specific request to:

4N Users' Group
 Attn: Program Librarian
 5554 Mark Circle
 Sun Valley, NV 89433

**** DISKS of the MONTH ****

Two software programs on disk are featured each month at the general meeting, announced in advance via the newsletter. These disks are available to active members only at a discount rate of .50 cents each. To qualify for the special rate, they must be picked up in person during the evening of the meeting. No exceptions will be allowed.

**** PAPER LIBRARY ****

4N participates in an ongoing newsletter exchange program. Presently, we have over 25 Users' Groups on our mailing list. Active members are encouraged to check out these newsletters (maximum 3 issues) for a ONE MONTH period, and on a first-come, first-served, basis. There is no fee charged for this service. However, members are expected to return them to the paper library, in the same shape as they were received, within the allotted period. Failure to do so may jeopardize future membership privileges. Please, be considerate of others.

**** S.I.G.'s (Special Interest Groups) ****

As the need arises by the membership for special instruction in order to develop the skills necessary for a particular software program or hardware item, a special interest group may be called upon by the President. This is not a formal meeting and is usually held voluntarily at a member's home, where personal attention is readily available.

**** SUPPORT ****

4N supports the following vendors:

MICROpendium, P.O. Box 1343, Round Rock, TX 78660
 TEXCOMP 1-818-366-6671
 TRITON 1-800-227-6900
 TEXAMENTS 1-516-475-3480
 ASSARD 1-703-255-3085

**** COMMERCIAL ADVERTISING RATES ****

Full Page - \$10.00 / Half Page - \$7.00

Quarter Page or Business Card - \$4.00

ALL RATES ARE FOR ONE ISSUE ONLY!

Present circulation - 60 (As of 12/17/89)

**** MEETING DATES ****

Unless noted in the newsletter, 4N general meetings are held on the last TUESDAY of each month, at 7:00 P.M., at ROUND TABLE PIZZA, West 4th and Vine St., Reno, NV. Visitors are cordially invited to attend.
