DZARK 99er USER GROUP MINUTES JANUARY 10, 1991 Regular Meeting

The of Jan. 10, 1991 meeting was called to order

at 7:40 PM with 15 members and guests present. SECRETARY: Minutes of 12/90 meeting read and approved.

TREASURER: Barr absent. Mary transmitted his report: Dec. 13 start \$286.11; Income \$104; Expenses \$215.32; Operating balance 1/10/91 \$174.19. Approved by

voice yet: NEW IETTER : Mary distributed new program disks for NL review, and DEMO at future meetings:

"Boot Changer" - C. Rinehart "Disk Hacker" - C. Rinehart

"T/Shell" - D. Brinley

"Quick Dirty Posters" - H. Beersman

"Sector Patrol" - T. Beersman" "Quick Tax Estimater" - B. Whitakcre

"Othello" - D. Brinley

She also reported that she is having very good luck with Epson MX/FX 80, Panasonic, and Gemini re-inked ribbons.

OLD BUS.: Mary brought samples of club letterhead designed by Leland Piper, with innovative printing by Al Collins, who offered to provide same for free several months ago. Iwo-color combos were chosen, with BLACK and RED as the favorite choice.

Henry reported that the church had received the club check for \$120. They thought the "USERS GROUP" was related to the "druggies" who are habitues of the surrounding park! Gee, we'd better see that the parishioners see a 1199/4A sometime!

Mary moved, Henry seconded, the slate proposed by the Nominating Committee be elected by acclamation. There being no nominations from the floor, a voice vote resulted in unanimous acceptance. 1991 Officers are:

President: David Brinley Vice Pres: Tom Bingaman Treasurer: Don Barr Secretary: Charles Rinehart Newsletter: Mary Phillips Hardware: Tom Beersman Disk-Libr: Leland Piper

Program: To be announced C. R. commented on his recent conversation with Pratt about the new multi-purpose disk controller

from ESD and read excerpts from a letter from Pratt.
Price \$225, shipping 3-5 days from receipt of order.
NEW BUS.: Leland queried interest concerning individual or group purchase of one of the 80 column cards now available for the TI. Discussion 3 available cards.

Bob OsterIoh queried Mary and group about a program place copies of our NEWSLETTER (in disk format) on The group the "PC Connection" for nationwide access. was unanimous in approval of the project which could give our group such favorable publicity. Discussion

give our group such favorable publicity. Discussion followed about opening up "remote" memberships for NL and DOMs. More at Board meeting.

Mary asked if anyone would like to go to Anaheim, CA "Fest West" on Feb. 16-17, RI trip air fare is \$208 PROBRAM: Piper commented on the January DOM, a 3-disk set of FUNNELWEB V4.31 and related utilities. Mary presented a comprehensive and interesting program on "building a newsletter" using FUNNELWEB 4.31!

ADJOURN: 9:30 PM. Board Meeting at Phillips home Thursday Jan. 17 at 7:30 PM.
Respectfully: C.R. Rinehart, Secretary

NOTE: 1 hated to miss the NL demo Mary, but leaving early WAS SMART! We ran into really slick road ice just

early NAS SMART! We ran into really slick road ice just north of Brighton and drove all the way to Stockton "on instruments".

ii FEBRUARY 1991 BBS NEWS 11 ## By Tom Bingaman

We have news about the TI events in Chicago and Europe and the TI world is alive and well, just smaller. We will take a look at DEZIP at this month's meeting and also GIF MANIA, the Gif viewer for the II. Gif files and Dezip are available on our local BBS, another good reason for their use. I have listed some of the Files and I'm sure there are many more here locally. Old time Tler Jerry Campbell left a note about his board and Richard Anderson may be putting his BBS up soon.

DEZIP will allow Tlers to open ZIP files and read text file. Zip is the most used archiver for the IBM (clone) world. You will have to use the Editor Assembler cartridge to load as most third party image loaders will have code problems. Use option #5 and type in DSK#.DEZIP, 1st prompt is (Enter ZIP: Input (path & filename) To exit Dezip type (Ctrl-Z) Next enter an output path:, valid path's are to Disk, RS232 and PIO. Note: It is best not to send BINARY files to the R9232 or PIO.

Extract ALL? This will allow you to extract all files without prompting.

Dezip text files are stored on disk as display fixed 12B format, same as a remote PC's. With PRINT128 you can convert them to display format to use or edit. Enter the filename and where you want it to go (either PIO or R\$232 is acceptable), reply to (for a record type/len). in C-format. The first letter should be "w" for variable length or "W" for fixed length output file. Next 1 to 3 characters should be the record length, w80) for Display Var. 80 files.

See you at the meeting and we will go through these two fine programs. We will also have the PC program that allows TI archives to be un-arced and viewed on a PC (no demo).

******************************* ** REVIEW OF GIF MANIA by Tom Bingaman ** ***************************

If your love is graphics or outstanding color on the screen, this is for you. With this program we can now view (GIF) files with the Tl. What is a GIF file? It stands for Graphic interchange Format, a universal graphics file format that was developed by CompuServe so that users of all different computer types could exchange graphics files. There are over 100,000 GIF images available. Most can be found on BBS or user groups. Loading can be done by TI Extended

Basic, Editor/Assembler, TI Writer or Funnelweb. The X/B has a load program. If you use E/A then use option 5 in E/A menu (Run Program File) and enter DSKx.6M. If you use the other two I'm sure you know how it will load.

After loading you will get a menu with four options, the first is LOAD 61F/TI ARTIST. If you pick option #1, enter name, such as (DSK1.MDDN), you do not have to include the P or C on a II Artist picture. You must enter the complete name that you saved it as. If you down/load this file from an IBM board be sure to drop the period out of the filename between the name and the GIF or your II won't except it. On an IBM board it will give a listing like this: MOON GIF. That blank space has a period in it. Be sure to input it like this: (MDDN.GIF) to down/load it, but change the name or replace the period like this (DSK1.MOON/6IF), when you send it to the Tl. On loading, the program will determine which type and if a Tl ARTIST, it will display it immediatly. If it's a GIF, you will be informed of its number of colors and resolution. You are then prompted by this input: Color Select (1/D/6/M):

"I" stands for intensity, while "D" is deviation. I is usually the best on a II for color but sometimes (D) will deliver a better image.

"6" stands for grayscale and "M" is for monochrome. If you wish to print it out in black and white with TI ARTIST you will want to use monochrome. You will also be able to change the quality of the picture with these two options with the brightness.

Black line Mode? (Y/N): This handles the boundary and some will be better on and others better off.

Condense? (Y/N): This will proportionally reduce a large GIF to fit into the TI frame work of 256 pixels across by 192 pixels down. If you pick NO, you will only get a part of a large GIF.

Left Shift: and Up Shift: These allow you to window around on a large picture. You pick the area with your input numbers in LS: and US: you can only view one part at a time.

SAVE TI ARTIST: Converting a Gif to TI Artist is easy, just select (Save Tl Artist) and enter Device, filename (8 charter for II Artist), device is drive and the filename is the name you gave the picture you saved.

CATALOGING THE DISK: You can do floppy, ram or hard drives with the device name, such as DSK1. or on a hard drive (WDSI.GIF.), for location and subdirectory. The only draw back is that it doesn't have its own printing routine, which would improve the program. (This fine program is by Barry Boone and Texaments. The price is right, so send an order....Tom)

WE LOVE TIPS

WITH 24 PIN PRINTERS By Ed Machonis QB-99ers, Bayside, NY

So you've tried printing labels using TIPS with that shiny new 24 pin printer and the results have been less than satisfactory. Your images are elongated and the labels won't stay in registry. Not only that, when you try to print the image catalog with TIPS SHOW, you find one page printing onto the next page. CHEER UP! Help is at hand.

From personal experience, I know that 9 pin printer owners find it hard to work up any sympathy for 24 pin owners, but don't you 9 pin owners run away yet. There will be something for both types of printers later on.

A member of our group is the proud owner of an Epson LQ-850, a 24 pin printer. The fix described in this article applies to that printer, however if you have a different 24 pin printer and are experiencing similar problems, chances are the fix may work for you.

When said member found he was having the above described problems with TIPS V1.7, he called for help and I made some suggestions on line feed spacing, none of which seemed to have any effect. On a subsequent visit, he brought over his printer manual and one glance inside pointed out the problem. Escape A set the line spacing in 1/60ths of an inch, instead of the usual 1/72nds.

A search of the TIPS 1.7 listing led to Line 1480 which read as follows:

1480 PRINT #1:CHR\$(27);CHR\$(65);CHR\$(08)

TIPS meant to set the line spacing to 8/72nds but the LQ-850 was setting it to 8/60ths, a bigger spacing which accounted for all the problems my friend was experiencing.

The trouble is, the one-ninth inch spacing could not be converted to an equivalent fraction in 1/60ths. The 8 would have to be changes to 6 and 2/3rds, which the printer would probably round up to 7 or down to 6. Since most

printers allow setting line spacing in 216ths of an inch with ESCape 3, perhaps we could set line spacing to 24/216ths? No good, ESCape 3 on the LQ-850 set line spacing in 180ths of an inch, not 216ths. Good old Epson compatibility again! But wait, all is not lost! 20/180 is the same fraction (1/9) as 8/72.

The rest was a piece of cake. Change CHR\$(65) to CHR\$(51) and change CHR\$(08) to CHR\$(20). Everything worked as advertised. All you have to do is load the program with OLD DSK1.TIPSX, bring up line 1480 by typing the line number followed with the Down Arrow. Cursor to the 65 and type over it with 51, cursor to 08 and type over it with 20. Press Enter; then SAVE DSK1.TIPSX.

Make the same change to TIPSSHOWX, editing Line 260. These line numbers are also valid for Version 1.6. In TIPS V1.4 edit line numbers 1820 in TIPSX and 260 in TIPSSHOWX. If you are using Earl Raguse's V 1.6/ER, the line numbers are 1480 and 270. In Earl's TIPSLABEL disk, change Line 1010 of TIPSLABEL and Line 270 of TIPSSHOWX. Always work on a copy of the program disk.

STARVING THE FORM FEED

Nine pin printer owners, listen up. The next change applies to you also. TIPSSHOWX has an annoying habit of sending a Form Feed each time it is run. If you are prepared to set the paper to the top of the form each time before you run the program, you can eliminate the extraneous Form Feed.

Load in TIPSSHOWX and call up line 400 for editing. Starting on the first line, delete "CHR\$(12):"—and press Enter. Now press FUNCTION 8 (REDO). You will find your cursor at the start of the line number. Change Line number 400 to 405 and press Enter. Now type in the following line:

400 IF PG>1 THEN PRINT #3:CH R\$(12)

Save the edited program back to disk. Before running the program set the paper to start printing a line or two below the perforations. You won't get that paper wasting Form Feed at the start.

LOVE THAT TIPS!

******************************** ## ## FROM THE EDITOR'S CONSOLE *****************************

It was SO CONVENIENT having the little monitor hooked up for demoing last month. We've needed that cable and set-up for years. It really cut down on movement.

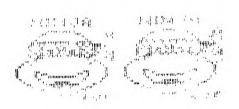

I'm really looking forward to Fest West. If there's information, software, or hardware anyone would like me to be on the lookout for, let me know.

Earl Raguse has send his ver 1.1 of TIPSLABEL, and his 1/91 update of TIPS 1.6/ER. These will be available in the library, as are the newest TIPS graphics. See Leland for these.

Thank you so much, Ed Machonis, for the fix for the 24-pin printers. I had got as far as figuring out that the printer was making 1/60" line feeds, but I didn't know what to do from there. I know some more of you in the club have gotten 24-pin printers, too, so this should be useful for you.
