FOR THE RECORD
BY FRANK N. ZIC

Mickey, the PEPSI KID, started the May meeting almost on time! Ken
caused the slight delay, gotcha Ken. Her first thoughts as always are
those of appreciation. This week they went to Art Gardner for his help
in selling MS products at the Lima Fair. She mentioned that correspon-
dence between our group and the Vast user's group is ongoing in the
games high score area. Just a quick message to Charles Rinehart of the
Vast group who called me recently. Haven't fo about writing to you and
will do so shortly. The computer club of southern California will be
joining us both in high score competition. Perhaps some other of you TI
clubs could add your skills to the competition also. The proceedings of
the 1994 Lima Fair have been ordered and are expected in a few weeks.
Mickey hopes the cameras were really on-line to record her every voice
influx and body shifting. Just kidding your hi-est. All the recent
newsletters from other clubs will be on hand at the next meeting.

Art and Lynn Gardner next made comments on their views of the Lima Fair.
There was a nice turn out and sales on older equipment were especially
brisk. Now as to the Ken mentioned in the first line who caused Mickey
so much trouble or was it the other way around. Our guest was none other
than Ken Gilliand of Notung Software out of a distant place know as
California. Ken next gave his views on the Fair and said that approx-
imately 150 attended and that buying was brisk. Speaking of far away
places, Ken demoed his "Disk of Mid- vil Times". Nice presentation of a
classical work on ancient times: helmets, dragons, jousting, swords,
castles and Gothic letters. He also offered this program as one of the
gifts in our raffle. Next he demoed the "Legend of Valor". His explana-
tion was better than his functioning skills, he got barbecued in the
castle. Nice graphics throughout. He also showed us "Bride of the Disk
of Dinosaurs". The program has nice pictures of dinosaurs, fossils and
many other instances. He kept busy with a demo of "Los Vegas Casino". A
full featured card game. While Ken was here he went to Gettysburg to
draw first hand pictures and collect information on the civil war. This
is to be his next programming endeavor. He has hopes of completing it in
time for the Chicago Fair, if all goes well. It was nice having you
visit with us, thank you and come again.

Art showed some of the new storage containers for disks. Art likes Coca
Cola and Mickey likes Pepsi, what an ongoing battle. John Whelan gave a
short but impacting report on the disk library, stating that he has
added 150 disks since the last meeting, What a nice job, John. Dick
Ohi's VCR library was available. Norn Rokke, as we have been accustom to
calling him instead of Doctor Rokke, next gave us his review of the
April MICROpendium. He covered it thoroughly as usual. Specifying:
p5-McCann, p6-Labyrinth, p7-Harrison's Assembly, p10-Weather Forecast-
ing, look out JOE here we come, p18-Assembly/XB, p20-Tony McGovern's
Funelweb, p23-Charles Good's Micro-Reviews and p25-Geneve CFORM. We all
had a nice time again as usual, thanks to Mickey's great energy. Tonight
she really thrilled in the fact that someone else had center stage,
thanks again Ken. Hope i haven't left out too much. May the good 4's be
with you.

WEST PENN 99'ERS CLUB INFORMATION

NEXT MEETING DATE: JUNE 21, 1994

MEETING LOCATION: PENNS WOODS
                         CIVIC ASSOCIATION

                         JUST OFF ROUTE 30

                         N. HUNTINGDON, PA

TIME OF MEETING: 7:00 P.M.

LIST OF WEST PENN OFFICERS FOR 1994

PRESIDENT: MICKEY 412-265-5201
VICE PRESIDENT: NORM   614-264-6442
TREASURER: LYNN   412-835-4304

FREE SOFTWARE CATALOGS

Anyone interested in obtaining a free software catalog from Notung Software should write to:

    Notung Software
    7647 McGroarty Street
  Tujunga, California 91042

================================

NEW CLUB ADDRESS

Effective immediately - all club correspondence and newsletter exchange should be sent to the following address:

    West Penn 99'ers

  C/O Mickey Cendrowski
    100 Pine Street
  Russellton, Pa 15076

This change of address is due to the fact that my community will soon be going into a 911 emergency service, thus house numbers must now be issued instead of the P. O. Box numbers.

I regret any inconvenience this change may cause.

The BIG JOKE is that the post office will forward my mail (without interuption) for a period up to one year!

Gee...they make it sound so official...but the bottom line is...they will still be putting my mail in the same mailbox, at the end of my street!

PUBLIC ANNOUNCEMENT

Due to irreconcilable differences following the Lima show on May 14, 1994, between myself (Mickey Schmitt Cendrowski) and Mike Sealy, I felt it best to dissolve our software business, known as MS Express Software.

Thus, effective May 31, 1994, MS Express Software has been dissolved.

This announcement DOES NOT give anyone a license to distribute any of those products which we distributed, nor does it automatically place any of those products in the Fairware or Public Domain markets.

All software titles and copyrights remain the property of their respective authors, and each author has been asked to make a decision regarding the distribution of their software programs.

It is with great joy that I make the following announcement:

Effective June 1, 1994, Notung Software has exclusive permission to market and distribute the following products previously released through MS Express Software:

Adventure Hints - Series I, and Adventure Hints - Series II, both written by Lynn Gardner

Page Pro Cataloger, Sliding Block Puzzles - Series I, Sliding Block Puzzles - Series II, Sliding Block Puzzles - Series III, Sliding Block Solutions - Series I, Sliding Block Solutions - Series II, and Sliding Block Solutions - Series III, all written by Norman Rokke

Oliver's Twist, written by Lynn Gardner and myself, Mickey Schmitt Cendrowski

Adventure Data Base, Genealogy Plus!, Rattlesnake Bend, and TI-99/4A Software Data Base, all written by myself, Mickey Schmitt Cendrowski.

Anyone interested in purchasing any of the above products should write to Notung Software, 7647 McGroarty Street, Tujunga, California 91042.

To all of those who have supported MS Express Software over the years...Thank You!

Mickey Schmitt Cendrowski
100 Pine Street
Russellton, Pa 15076

NEW TI EMULATOR SOFTWARE RUNS ON 386-

   Looking for a program that will run some of your TI programs on a PC? A relatively slow PC?

   Edward Swartz, of Georgetown, Texas, has written a TI emulator that runs on 386 PCs (SX or DX), requiring only an EGA monitor and 256K of free RAM. The program is shareware and is offered for $25. It's available on a number of electronic bulletin boards. The program runs on a PC and should be downloaded using a PC.

   The program is claimed to support all standard TI graphics modes as well as TI key combinations using a 101-keyboard. It also touts Adlib support for three-voice music. It also supports the TI disk system, including DSK1 through DSK3 and a hard disk. It also emulates a 32K memory expansion.

   The program, called TI Emulator, doesn't include support for TI speech, printer, joystick or cassette routines. However, support for a mouse is included. It also does not support low-level routines such as sector read/write, formatting, etc.

   According to the author, "TI Emulator is meant as a diversion for anyone who ever used the actual TI computer". The emulator includes several demonstration modules. Registered users receive additional modules and information about transferring data from a TI/994A to the TI emulator.

   Source code is also available for $50. It is written in Turbo Assembler 2.0. For more information, contact Swartz, 1401 E. 18th St., Georgetown TX. 73626. Expect a wait of 4-6 weeks or more. He can also be reached through Internet at swartz@ralph.txswu.edu.

President's Corner
"New ti Emulator for 386SX Computers"

 Many TI owners (who also own and use 386SX/DX Computers) have watched with much interest, the development of PC 99. Well, now there is a new TI emulator for these computers! The shareware version is available as a .ZIP file on the Internet and Compuserve, as well as some TI BBS's (such as the Cactus Patch PBBS in Arizona) as "TI-EMUL.ZIP". It will pretty much emulate a TI-99/4A console, 32K memory and TI Disk System. Currently, it will support DSK1, DSK2, DSK3 and HD. It does NOT support RS232, PIO, speech, cassette or joysticks (Although it will let you use a mouse for the joystick) And, to get you started, it includes 4 modules (TI Extended Basic, TI Logo, Amazing and Hunt the Wumpus). It looks and runs just like a 99/4A and the Keyboard responds just the TI keyboard. It requires a 386SX/20 computer with EGA and at least 640K. It also requires enhanced 101-keyboard. If you like this program, you will want to register it (for a $25.00 fee). When you do, you will get the full program and all of the modules (including the Editor/Assembler) listed in the file MODULE.EXE. You can register the program or contact the author direct at:

Edward Swartz
1401 East 18th Street
Georgetown, TX 78626

TI Overlays - Old & New

from SouthWest Ninety-Niners

Several years ago SouthWest Ninety-Niners Users Group began offering overlays for the TI-99/4A. The first overlays offered were like the top one shown below. Now, SouthWest Ninety-Niners announces two new types of overlays, as shown in the second two below. The new overlays are designed for users of specific types of software. As you can tell one is for programmers, and the other is for Artists. Each of the overlays measures approx. 8.34"X 2.5" (we shrunk them here to allow them to fit into our newsletter better). The overlays sell for $3 each or 5 for $10. Send your order to SW99ers, PO Box 17831, Tucson AZ 85731.

JOHN F. WHELAN

LIBRARIAN

As of last month, I'm an official Senior Citizen, and I have my Lifetime Fishing License to proove it.

My wife and I have been married for 44 years. (She deserves a Congressional Medal of Honor for that.)

Our daughter Linda has been working for 'General Analitics', in Monroeville, since High School. (Over 20 years)

Our son John has been working for 'Alumo', near Danville Pa, for about 8 years, and he is now President of the company.

Our son David, living in Gettysburg, has been working for Ryan Homes for about 10 years and is in charge of the new Drafting Computer System that he initiated and installed.

I worked at Westinghouse Electric in East Pittsburgh until they closed the plant in January of 1989. After 41 years, I was forced to retire, and I haven't done a lick of work since. (except for making 'Disk Cataloged Labels' for our Library)

A friend of mine switched to an IBM computer, and gave me his TI'994A about 4years ago. I've been trying to learn how to use Funnel Webb ever since. (I'm only kidding!!)

Having been elected Librarian of our club, I'm finding out how versatile and broad in scope, the TI is. I think we have a formidable Library, and every member should take advantage of it's availability.

Th..Th..Th..Thats All Folks

John F. Whelan

Hi, my name is Art Gardner

I was born & raised in Pittsburgh. Worked at Fisher Body
Division of General Motors Corporation for 33 years, until I
retired in January of 1993. I now work in installing
kitchens.

I got my first TI sometime in 1983, but did not use it much
until joining Pittsburgh Users Group (PUG), and West Penn
99'ers, in 1986 or 1987. I use my TI mostly for my church
work. I am treasurer of our church, and do all my finance,
and meeting records on the TI.

I am the treasurer of PUG. Still active in both clubs.

Above all, please remember: COKE IS STILL - NUMBER ONE
                                             NUMERO UNO
                                             FIRST PLACE
                                             BEST DRINK

Coke Is It!
