

Mickey started the June meeting at 7:07PM. Not sure why she was a little late starting when she had so many little helpers. She thanked Ralph Vasco for his fine efforts in getting the newsletter out when he received some of the information at such a late date. Then she thanked me for my small part of writing the minutes of the meeting. Don't look now but Mickey was baby sitting her small nephew Louie and her neice Lindsey, more on Louie's part in the meeting a little later. Lynn Gardner gave a favorable Treasurer's report. A warm hello to Paul and Evelyn Brock, we are still waiting for your return to the meetings. Also it was nice to see Mary Jo Cline in attendance at our meeting.

The VCR tapes of the Lima Fest came in, see Dick Ohi to check them out. Tape #1 has; Bruce Harrison, MS Express, Notung Software, Bud Mills and comments from the group meeting of the Presidents of the various user groups that were in attendance. Tape #2 has; Don Waldon, Dave Rodder, Jim Krych, Charles Good(who he), Mike Wright and Barry Miller. Tape #3 has; Barry Traver and Vertical 4/A.

Art Gardner covered the many products he had for sale on the back table. I next read from an abbreviated list of TI equipment that I had for sale. Check inside the Newsletter for all the details. Mickey brought in some recently received NLs from other clubs. The games high score contest is still active between several user groups and ourselves. Information was passed around about the Lima demos, the RDB company and a price list from the Cecure Co. Let us all remember that MS Express software will now be distributed through Ken Gilliland of Notung software. The evenings raffle was held next. One of the nice gifts offered was a copy of a program by Mickey Cendrowski for organizing your disks. She also demoed the program. It is set up on TI-Base. John Whelan had the FREE copy disk library available all evening. Norm Rokke had available the module library. Speaking of Norm, he's the reason this report is a bit shorter than usual, he didn't present his much looked for review of the latest MICROpendium. We were all treated to a special event, this being a demo of a game by Mickey's Ace assistant, Louie. Folks you had to be present to appreciate the nice manners and very knowledgable discription offered by this 6 year old. Very nice job, Louie.

Finally, after the meeting I talked with Rob Ekl. He is doing fine in college and is on the Dean's list. He is also on several student committees. He is working locally for the summer. Well that's about it for now. May the good 4's be with you.

 * TI BASE v3.02 INDEX *
 * by Jerry Keisler *

For those having trouble finding commands in the TI BASE manual, I created TI BASE v2.0 INDEX. I have now added V3.02 commands. The v2 manual goes thru pages 5-13. If you label the v3 supplement pages 6-1 thru 6-9 and use the numbered items as .1 thru .20, you have the key for the new index. Therefore, you can use this INDEX with either v2 or v3. TI BASE v3 or upgrading v2 can be done thru Textments, 701 S. Wicklow Ste. Stillwater, OK 74074 phone (405) 372-0819

THE TI - 99 LIGHT PEN

I found an article in my archives that referred to a light pen for the TI - 99 that I had been saving for quite a while (the article and accompanying program came from the MAY 1987 edition of TIBUG's BUG BYTES Newsletter). After looking into it a little more closely it became evident that it was not what I had remembered it to be, however I thought that it would serve quite well as a beginners' hardware project, a novelty for the younger members and a challenge to the Extended Basic programmers to come up with some useful routines or interesting games to play

The basis of the design is a light - dependant resistor or CdS (Cadmium Sulphide) cell which is quite sensitive to light. Construction of the pen is very simple, and the accompanying diagram should be self - explanatory, as the CdS cell is not polarity conscious

Connected to pins 7 and 9 of the joystick port, the programme is looking for RIGHT joystick movement from JOYSTICK #1. The original article suggests that a second pen could be connected to pins 2 and 5 WHICH IS PROBABLY THE SAME FUNCTION FOR JOYSTICK #2

The accompanying program is of a trivial game that I had to modify to make it more interesting to look at and more challenging to play - I mean if I can consistently win, the game MUST be at pre - Kindergarten level. For those who find the game too easy, try firstly changing the score values at lines 820 to 890, at least you will get some abusive messages occasionally

I have been frantically searching for joystick - based games that were suitable for modification for use with the light pen. Please send me a copy of simple programs that you think may fit the bill. Just remember that this is supposed to be a project for the novice programmer

I would also like a copy of the program that came with the original TI joysticks if any one has a copy of it - maybe that type of drawing and music program would suit the light pen. There is also a TIC TAC TOE program deep in the archives that requires a light pen - does anyone have a copy of that one ?

Geoff WARNER

FOOTNOTE : The CdS cell is sensitive to WHITE light, and thus the light pen will not work on a green screen monitor...G.W.

TI LIGHT PEN

PIN LAYOUT
DB9 Connector
(from solder side)

Old 'fine line'
fibre-tipped pen

drill a $\frac{3}{16}$ " hole
in the end of the
empty pen casing

cut
tip off,
remove and
discard contents
of pen

to DB9 connector

Cds Cell or light-dependant
resistor

I used light
'figure 8' or car speaker
wire for the connector.

Solder wire to
Cds Cell leads.
Don't forget to sleeve the
exposed leads.

* Knot the wire to prevent
it pulling through and
putting a strain on the
soldered connection.*

PARTS LIST TI-99 LIGHT PEN

- DB9 Connector (female)
- Backshell to suit
- length of light 'figure 8'
cable (car speaker wire)
- CDS cell Dick Smith DSCD01
- Surplus fibre-tipped pen

A PROGRAM THAT I WOULD LIKE TO SEE by
Dave Renkenberger

First of all, let's establish one thing, I am not a Programmer! I can plunk around in Extended Basic and I have written a couple of screen display routines in Assembly but that's about all.

One thing that I have noticed over the last couple of years in the 99-4A/9640 world is that most of the programmers are turning out utility programs and a few games. If this trend continues, our computers will become more and more one dimensional. What we need is more variety in the new offerings from our programmers.

The few simple programs that I have written in the past, were not all that difficult to write, once I came up with an idea of what I wanted to create. If others are like me in this respect, it would follow that if we would flood the user group newsletters and BBS's with programming ideas, we just might end up with some new programs to play with.

The following are my thoughts on a program that I would like to see written by someone more talented than me. I would encourage others to follow suit and submit requests for programs that they would like to see. If handled properly, this thing could snowball into something useful.

I have always wanted to write a program that would develop a grocery shopping list. The program should include a database for coupons and the user should be able to develop a store map that would sort the items on the list into the order in which they appear in the store. This program could also include such things as estimated cost calculations, and if the programmer really wanted to get fancy, nutritional info could be worked into the package.

Now it's your turn, What kind of program would you like to see?

The following is a partial list of TI equipment I have for sale: 1. Complete TI system, monitor, console, full P-Box with RS-232, Cor Comp card, DSDD drive and 2,400 buad external modem. 2. 10 Meg hard drive. 3. 10 disk drives. 4. six keyboards. 5. 4 modulators. 6. Two EPROM burning units with chips. 7. 400+ program disks. 8. Mini Memory module. 9. Three P-Boxes some with Flex cables and 32K cards. 10. 3 1/2 in. disk drive. 11. Module Expander. 12. HFDCC card with 200 watt power supply. 13. Large box of cables made-up, connectors and cables. 14. Hundreds of books, pamphlets, old Newsletters, MICROpendiums and module instruction books. 15. Speech Syn. Conservatively priced at \$995, asking \$550 for this Van load. Frank N. Zic (412) 751-6065. 818 Everglade Drive McKeesport, Pa. 15135-2202.

RAY BRONDER

I WAS BORN AND RAISED IN
MONESSEN, PA. FEB 17TH. 1923,
GRADUATED IN 41 MONESSEN
VOCATIONAL HIGH SCHOOL,
ELECTRICAL, AND AUTOMOTIVE.
GOT EMPLOYED AT PAGE STEEL
AND WIRE COMPANY. WHERE I
WORKED IN THE ROD MILL AS A
HOOKER AND REELER.

OCT 3RD 1942 ENLISTED IN THE
ARMY AIR CORPS. WENT TO
KELLY FIELD TEXAS TO FLIGHT
SCHOOL. AS A CADET.
GRADUATED CLASS OF 43-C. AS
PILOT AND SECOND LIEUTENANT;
ON OCT 14TH 1943 .I GOT
MARRIED THE SAME DAY TO MY
WIFE OLIVE. WHO FAST AWAY
SEPT 1ST. 92 AFTER 49 YEARS.

WE WERE THEN SENT TO FORT
MYERS FLA. WHERE WE FLEW
AT-6 (THE TEXAN) I WAS
FLYING TOW TARGET SHIP FOR
THE GUNNERY SCHOOL THERE.
BUCKINGHAM ARMY AIR BASE.

WE THEN GOT OUR B-17 AT
BUCKINGHAM AND SPENT TIME
FLYING THEM. I WAS LATER
SHIPPED OVER TO ENGLAND WITH
THE 388 BOMBER GROUP 8TH. AAF

WE RETURNED HOME IN DEC 46.
I GOT A JOB AT PITTSBURGH
STEEL CO. IN THE ELECTRIC
SHOP. I STARTED OFF WITH A

CRANEMANS JOB THEN I BID TO
A MOTOR INSPECTOR HELPER,
THEN MOTOR INSPECTOR. THEN
MY LAST 5 YEARS I WAS FIELD
ELECTRICIAN FOR WHEELING
PITTSBURGH STEEL CO.

I RETIRED IN 85 MOVED TO NEW
ALEXANDRIA JOINED THE LIONS
CLUB HERE, WAS PRESIDENT OF
LIONS CLUB 94. JOINED WEST
PENN 99ER IN 90 I USE MY
T.I. MAINLY FOR GRAPHIC
PROGRAMS. TIPS & PAGE PRO
(Banners, Cards, Signs.) I
got my T.I. for a birthday
present when they sold for
50:00 now I have a P box
with 3 disk controllers, and
three hard drive in it. A
modem 1200. Star NX/1001
printer and two spares
equiped the same way I AM A
MEMBER OF ST. JAMES R.C.
CHURCH, PAST PRESIDENT OF
CHURCH COUNCIL FOR 2 YEARS,
PRESIDENT OF THE SENIOR
CENTER FOR FIVE YEARS, WAS
ON SCOUT COMMITTEE, PLAY THE
ORGAN AT ST. JAMES CHURCH IN
NEW ALEX. VERY ACTIVE IN
LIONS.

MY THOUGHT FOR TO-DAY IS:

"DON'T GET TOO MANY IRONS IN
THE FIRE. THE FIRE WILL GO
OUT."

JOHN VUKMAN

My name is John Vukman, I was born and raised in Blairsville, Pa. A few days after graduating from High School I was back in school again but under the supervision of U.S. Army Signal Corps. I was assigned to Signal Intelligent Unit and spent more time in schooling in Texas and California and finally spent the rest of War in CBI Area - China - Burma - India and also in the Philippines. After the war, went to School again only this time I was learning about Auto Mechanics, after six years I gave up the Auto Business and went to work for Westinghouse Electric, after 30 years with the company, I retired.

In between the time above, I married my wife, Mary. 45 years ago. We had a son and daughter and they in turn gave us five grandchildren.

Back in 1984 my kids gave me a Ti Computer as a birthday gift. After many months of playing with it, finally began to enjoy running different programs. I got into learning how to read and write Basic and some X-Basic programs. I have been using my Ti-programs to run my sons Business. I have taken sections from other

programs, that I liked and added them to my own, for a better running program. I love going into someones program and make changes.

Each year I send out over 300 letters for our South Blairsville Reunion. The letter is written with the Ti and use of FunnelWeb, then extra copies are made on copy machine. But Ti makes all the address labels. Then with the help of Page-Pro I make all the name tags for all that attend the Reunion.

Last year I did two High School Class Reunions, a 50th and 55th. After making the address and name tag labels, I also made the program booklets.

My TI is in use almost everyday of the week. I also get into my pickup truck and haul supplies to my son's job sites. Also haul all cardboard and cut pieces of lumber and dispose of them by burning once a week. So I am kept very busy in my retirement years.

Back issue #92 May 93 I wrote about three and four page printing in which I gave you more info about my involvement with the Ti.
