## A TIP FOR YOU

### Page Pro 99 Modification For 24-Pin Printers

After reading Ron Warfield's Artist Cardshop Tip for 24-pin printers (reprinted on page 7 of our newsletter), I got to wondering if the same procedure might hold true for Page Pro 99 and 24-pin printers.

Well... wonder no more... cause I'm here to tell you that it does.

So...

If you are using Page Pro 99 and wish to print your pages out with your 24-pin printer, this is what you do.

First, make a backup copy of your Page Pro 99 disk.

Then, working with your backup copy, sector edit your disk, searching for the string, 1B4108 and change it to 1B3314.

That's all there is to it!

Your Page Pro 99 page should now print out correctly, without printing one page out at one and one third pages, and without the venetian blind effect.

Thanks, Ron, for giving me the idea of trying this.

Now...

Can anyone out there shed some light on how we can get Page Pro Composer to work with our 24-pin printers?

I tried using the same procedure as with Page Pro 99, but was not successful.

Perhaps someone reading this article could help.

If so, you may write to me at the following address:

Mickey Cendrowski  
100 Pine Street  
Russellton, Pa 15076

...and I will be more than happy to reprint your solution in our next newsletter, so that others in the TI Community can benefit by your knowledge.

## NEW SOFTWARE

Rumor has it that Mickey

Cendrowski is currently working on a new disk utility package for the TI-99/4A that will be "Mouse Driven" and "Window Sensitive."

Although it is too early to release any of the specific details of this package, we do know that the name of this new program will be MOUSEWORKS, and it will be released to the TI Community as FAIRWARE.

Mickey states that she expects this program to be like Funnelweb - ONLY to the extent that the program will see many working revisions, as more and more features are added to the program at the request of its users.

Release date of Version 1.0 is expected to be at the TI New England Fair on September 30th, with backup release dates set for the Chicago show on October 28th, and Fest West '96 on February 17th.

Those wishing to get in on the ground floor with their SUGGESTIONS should write to Mickey at the following address:

MOUSEWORKS  
c/o Mickey Cendrowski  
100 Pine Street  
Russellton, Pa 15076

Please keep in mind that the program is not yet ready for release, so any requests for this program should not be made at this time.

In the meantime...

...if you don't already own a Horizon Mouse...

...now's the time to get off your duff and buy one!

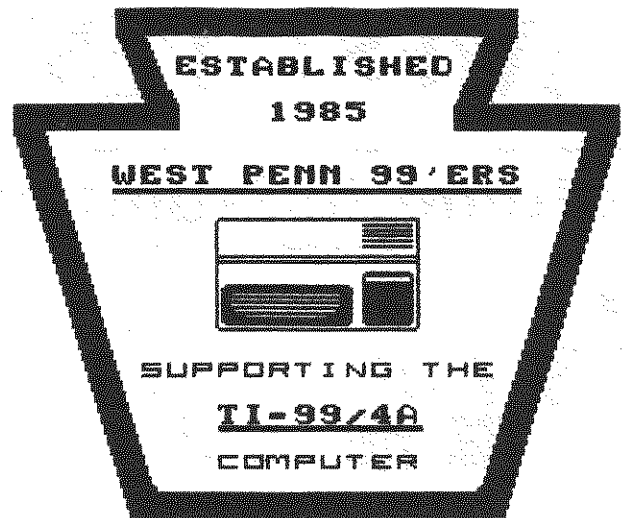

Tell them, Mickey sent ya!

# WEST PENN 99'ERS CLUB INFO

Next Meeting Date: July 18, 1995  
 Meeting Location: Penns Woods  
 Civic Association  
 Just off Route 30  
 N. Huntingdon, Pa  
 Time of Meeting: 7:00 P.M.

## GENERAL ITINERARY OF OUR CLUB'S MEETING

6:45 P.M.	Doors Open
7:00 P.M.	General Meeting
7:45 P.M.	Demos and New Info
8:45 P.M.	Page Pro 99 SIG
8:45 P.M.	One on One Help
8:45 P.M.	Socializing
10:30 P.M.	Doors Close

## MEETING HIGHLIGHTS FOR THIS MONTH

Latest T.I. News - Software Discounts - And Show Reports  
 Latest News Concerning Our West Penn 99'ers Disk Library  
 Demo - Arcade Action II - Demo by Mickey Cendrowski  
 Demo - Open Slot For Any Member Wishing To Demo A Program  
 Page Pro 99 SIG - Immediately Following The Main Meeting

## LIST OF WEST PENN OFFICERS FOR 1995

President:	Open	
Vice-President:	Norm Rokke	614-264-6442
Treasurer:	Lynn Gardner	412-835-4304
Recording Secretary:	Paul Brock	412-478-2754
Corresponding Secretary:	Paul Brock	412-478-2754
Librarian:	John Whelan	412-823-3312
Newsletter Editor:	Mickey Cendrowski	412-265-5201
Assistant Editor:	Mike Cendrowski	412-265-5201

The West Penn 99'ers Users Group is a Non-Profit organization, dedicated to encouraging the continued use of the TI-99/4A home computer.

Our membership fee is:

- \* \$15.00 per year for an INDIVIDUAL / FAMILY membership.
- \* \$10.00 per year for a NEWSLETTER ONLY membership.

Those having FULL memberships are entitled to the many extra benefits our club has to offer.

Some of those benefits are:

- \* Demos of the latest TI-99/4A software.
- \* Free copying of our West Penn 99'ers Disk Library.
- \* Latest T.I. news - Local - National - International.
- \* One on one help / Problem Solving.
- \* Participation in our Module Lending Library.
- \* Participation in our Video Lending Library.
- \* Ribbon re-inking - for just \$1.00 per ribbon.
- \* Various computer supplies - at a substantial savings.
- \* Participation in our Coke / Pepsi Wars.
- \* And ... entertainment by one of the biggest TI-99/4A supporters around.

We meet the third Tuesday of each month at the Penns Woods Civic Association in North Huntingdon, Pennsylvania, at 7:00 P.M.

If you can't make it to our meetings ... at least become a NEWSLETTER member - and enjoy our NEW NEWSLETTER FORMAT - done ENTIRELY on a TI-99/4A computer.

SEE PAGE 10 FOR OUR WEST PENN MEMBERSHIP APPLICATION.

# FOR THE RECORD

BY  
**PAUL BROCK**

## JUNE MINUTES

The June meeting was started when I arrived late. My wife and I got there about 7:45 P.M. as our 3-year-old grandson had open heart surgery in the morning and we didn't want to leave until we were sure that everything was going to be all right.

Norm was busy conducting the meeting and was talking about the Lima show. He also passed out the VIDEOTAPES. Mickey spoke a little more about the show. I couldn't get my tape recorder to work so I may have missed something along the way. Dick Ohi was unable to make the meeting because of health reasons. There were a few new faces. I didn't get their names. Sorry! I will next time. There was no request for old video tapes, so don't worry about the tapes, Dick.

There was a discussion about Raymond Frantz, a Broker of TI-99/4A stuff. It seems that he is not getting enough sellers. Mickey said that he is a great person to deal with. She also brought in some TI equipment for FREE. All she wanted was an article for each lot. YEP! You guessed right - NO ONE wanted to write an article. We need something to put in the newsletter. If you have some interesting stuff that you'd like to share, let us hear from you. I need some information on the Myarc 512 card and RAM\*BOOT from Asgard Software.

Mickey high-lighted on Page Pro FX, then she demoed the game Colors (from Asgard Software), which was one of the raffle prizes for the evening. A widget, a pen disk marker and a supply of printing paper were also given out. I think that Mickey had to take some of the TI stuff back home with her. (No, she didn't!)

Art had a large collection of computer equipment for sell. (Color disks, disk cases and modems, to mention a few). Lynn still has club disks for sell.

Emil Barca was feeling ill and had to leave. My wife and I had to leave early. I don't know how long the rest stayed.

As usual, everyone had a good time, and enjoyed the soft drink wars!

An article seems to be very hard to come by these days. I am sitting in front of my trusty TI trying to think of what I could write about. I have a lot of software and the only thing that I really use a lot is Page Pro 99. Since Mickey is using Page Pro 99 to do the newsletter, I thought that this is where I would start.

BOOKS are taking up more and more room in my computer room, or should I say my bedroom. I moved to a smaller apartment and I am pushing the walls. I am having a hard time finding things, or remembering what goes where. So one of the things that I must do is to get organized. To help the Page Pro 99 users, I will write about a few things that I picked up on in using Page Pro 99.

The muscles of the program is in trying to remember everything. I get so involved that I lose concentration and mess up. When I want to put a picture on the screen to see what it looks like, I press CTRL O and the Picture appears (and disappears). At the bottom of the screen is the information of where you are at (LINE and COLUMN). The P in the middle means that the Picture is turned on. The \* means that the Picture is turned off. I use this when I don't know what I am doing. It is hard to type with the Pictures turned on, since leaving the screen and coming back will pause the process until the Pictures are loaded into place. So sometimes looking at the bottom is helpful.

The arrow keys are very helpful. If you wish to clear a large area, just press CTRL 9 (large font) CTRL (arrow keys) and the pointer at the bottom right will indicate the direction you are going. Then just press the space bar. This is handy when I want to erase the line fonts or large chunks.

Using Page Pro 99 is similar to using Funnelweb when typing, as most of the keys are the same. If you are on line 66 at the bottom, press FCTN X and you will go to line number 1. If you are on line 1 at the top, press FCTN E and you will go to line number 66.

Thumbs up for Page Pro 99 - a quick page with graphics to put anywhere you want.

If you need any help using Page Pro 99, just see me at the meetings, or write to me at the following address:

Paul A. Brock

1707 Luxemburg Manor  
North Apollo, PA 15673

# UPDATING THE MEMBERSHIP

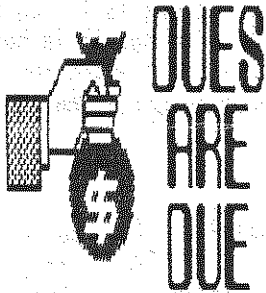

# OUR 1995 MEMBERSHIP LIST

The West Penn 99'ers would like to acknowledge the following newsletter member for changing his membership from a newsletter member to a full member.

Billy Wiegand

Our 1995 membership count continues to remain steady at 27 members.

Remember...

Please see Lynn Gardner, our West Penn 99'ers Treasurer, to renew your membership.

If you can't make it to our meetings...at least become a NEWSLETTER member - and enjoy our NEW NEWSLETTER FORMAT - done ENTIRELY on a TI-99/4A computer, using Page Pro 99 and Page Pro Composer.

Note: If you are one of the 14 people who has yet to pay their dues for the 1995 season - you have been taken off our mailing list!

FROM THE LIBRARY

## LIBRARY NEWS

John Whelan is still working hard on getting our disk library cataloged.

Please do what you can to help John accomplish this MONUMENTAL TASK!

Remember...

Our West Penn 99'ers disk library is available at ALL of our West Penn 99'ers meetings.

There is NO CHARGE for disk copying and there is NO LIMIT to the number of disks you may copy.

This is YOUR disk library.

If you need assistance in finding a particular program, ASK!

Note: In the coming months ahead, John hopes to have our entire disk library cataloged.

At that time, we will make hard-copy catalogs available to the membership at a very nominal charge (or even for FREE if arrangements can be made).

In addition to that, we also hope to start reviewing our disk library in our newsletter, (to give you a more in-depth look at what we have in our library).

This month has been pretty slow as far as the mail goes.

For the most part, the only mail that we have received has been our exchange newsletters.

So what's been happening out there in TI Land these days ... Well, the best answer that I could give you is "Read our exchange newsletters and find out for yourself."

NO - I am not trying to be nasty or sarcastic.

Different things appeal to different people.

While I may be interested in adventure games and Page Pro 99 products, you may be interested in hardware articles or Assembly tutorials.

The point is - There is something for everyone in our exchange newsletters.

So, check them out at our next meeting.

## UPCOMING TI SHOWS

# A MOUSE

## IN MICKEY'S HOUSE?

### PART 2

Now that I am the proud owner of a Horizon Mouse, I thought that I might relay some of my experiences with you.

So far I have ONLY TRIED to use my Horizon Mouse with two pieces of software - and my Horizon Mouse has performed flawlessly.

The first of those two programs is TI-Pei, a tile solitaire game written by William Reiss and distributed by Asgard Software (available from RamCharged Computers, P.O. Box 81532, Cleveland, Ohio 44181, 800-669-1214).

At start-up TI-Pei will autoloading out of Drive #1 in Extended Basic.

At the main title screen, press the space bar to

begin.

Next the screen will display the message - INITIALIZING.

This will be followed by the games main menu.

#### TI-PEI MAIN MENU

- R) REPLAY LAST GAME
- P) PLAY NEW GAME
- L) LOAD NEW SETUP
- C) CHANGE INPUT DEVICE
- D) RESTORE DEFAULT SETUP
- Q) QUIT

KEYBOARD ENABLED

To play this game using your Horizon Mouse...

Select C) CHANGE INPUT DEVICE.

This will change the bottom message on your screen from KEYBOARD ENABLED to ASGARD MOUSE ENABLED.

Next, select P) PLAY NEW GAME.

After a brief pause, the game will appear on your screen (ready to be played with your Horizon Mouse).

You may press either the right or left buttons to toggle between selecting and de-selecting the game tiles.

To "cheat" and see all of the possible moves at any given time during the game, press the middle button.

(Again, this button works as a toggle).

To quit the game, HOLD DOWN THE FCTN 9 KEYS AND HOLD DOWN THE MIDDLE BUTTON.

The screen will go into "cheat" mode - then return you to the main menu.

The second of those two programs that I have used my Horizon Mouse with is Page Pro Composer, written by Chris Bobbitt and distributed by Asgard Software (available from RamCharged Computers, P.O. Box 81532, Cleveland, Ohio 44181, 800-669-1214).

At start-up Page Pro Composer will autoloading out of Drive #1 in Extended Basic.

At the main title screen, press any key to begin.

Next the screen will display the message - Configure program? (Y/N). Answer Y.

This will be followed by the programs configure options list:

Input Device:

- (1) Myarc Mouse
- (2) Joystick
- (3) Asgard Mouse

Press 3 to select the Asgard Mouse option.

Next, enter your printer device name. (For most of you this will be PIO.CR).

Next, you will be asked to enter your default drive/path. (For most of you this will be DSK2.).

Next, you will be asked if everything is OK. Press Y if it is or N if you need to repeat the configure process.

Your default data will now be written to disk, and after a short pause, the heart of the Page Pro Composer program will load.

Once loaded, you will be quite pleased with the responsiveness of your mouse with this program.

As a matter-of-fact I would highly recommend the use of the Horizon Mouse to anyone who uses the Page Pro Composer program.

Once you've used a Horizon Mouse with this program, you'll never want to use your joystick ever again!

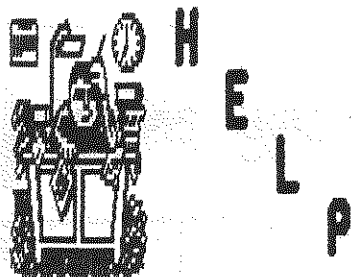

NOTE: Throughout this article I've always referred to the use of the Horizon Mouse, that is because I own a Horizon Mouse and not an Asgard Mouse.

Whenever a program asks if you have an Asgard Mouse, your Horizon Mouse should work without any problem.

Mike Maksimik wrote both the Asgard Mouse routines and the Horizon Mouse routines.

To purchase a Horizon Mouse contact RamCharged Computers (address listed above) or Bud Mills Services, 166 Dartmouth Drive, Toledo, Ohio 43614, 419-385-5946. Tell them Mickey sent ya!

What is the cause of this problem...

...and is there a better and quicker solution.

My guess is that the problem must be a combination-type problem, such as...

...using a certain copying program with a particular disk controller card when the disk is initially copied...

...however, that is just my personal guess.

Can anyone out there shed some light on this problem that I am experiencing.

If so, please send your answer to me at the following address, so that I can share the solution with the rest of the TI Community.

My address is:

Mickey Cendrowski  
100 Pine Street  
Russellton, PA 15076

By the way, I did bring this problem up at our user group meeting on May 23rd, but unfortunately no one knew the answer to my question.

However, in doing so, I did find out that others have also experienced similar problems - so I am quite sure that this problem is not just something that is happening only to me.

Again, any help in this matter, would greatly help me, as well as others in the TI Community.

## IN RESPONSE TO YOUR PLEA

By Ron Warfield  
B.C. 99'ers  
Users Group

Dear Mickey,

I have 2 HFDC cards and 1 FDC by Myarc and have also had the problems that you described.

The problem is that the Myarc controllers have difficulty reading CorComp disks.

CorComp controllers put the disk information at the very top of the read sector and TI and Myarc leave space at the top.

TI had no problems with this because they are slow, but Myarc controllers are so fast that they miss this info.

All I do is "REDISK" - copy the disk on a TI system and the problem goes away.

Good Luck

## ARTIST CARDSHOP TIP

By Ron Warfield  
B.C. 99'ers  
Users Group

I use Artist Cardshop a few times during the year and enjoy it very much.

After I got my 24 pin printer I noticed that the cards are now much longer than they used to be.

To fix the problem I used a sector editor to search for the printer codes to see what they were set at.

I found the codes were for 8/72 line feeds on an Epson printer.

Well when you have a 24 pin printer the same code sets the printer to 8/60 line feeds, hence, the longer picture.

Well to convert this to a better line feed you have to find something a little closer to 8/72 only in 180th or 360th line feeds.

Well 20/180 is almost perfect, so I changed the codes and it now works perfectly.

To do this, first make a backup copy of your Artist Cardshop disk.

Then, working with your backup copy, sector edit the file PRINTU, search for the string 1B4108 and change it to 1B3314.

About six months ago, I purchased a used 40 Meg hard drive, along with a Myarc hard and floppy disk controller card.

Up until then, I had been using a TI disk controller card in my system.

The problem that I am now incurring is that my new setup (the one with the 40 Meg hard drive and Myarc hard and floppy disk controller card) is now saying that many of my disks are not formatted - when they actually are.

(The program that I am using now that is telling me that my disks are not formatted is MDM V).

The solution has been to recopy these disks, using my husband's system.

To do this I use his Cor-Comp controller card and the Disk Manager II cart-ridge.

Since this problem is occurring with about 30 percent of my 1300 disk library - this solution is a royal pain in the butt, but it is the only thing that I can do at this time.

My question is...

### ONLY \$20.00

Plus \$2.00

Shipping and Handling

Page Pro Cataloger requires a TI-99/4A console, a monitor or TV screen, a disk drive system (minimum configuration of 2 SS/SD drives), 32K memory expansion, a TI-99/4A compatible printer, and the Extended BASIC Module.

Page Pro Cataloger is a graphics printing utility program that should prove to be quite useful to all Page Pro users, young and old alike.

Now, no more wondering what characters are included in any particular Page Pro Font...or what that font even looks like in the first place.

No more wondering what a Page Pro Border looks like, no more wondering what a Page Pro Picture looks like, no more wondering what a Page Pro Page looks like, no more wondering... period!

With Page Pro Cataloger, you can choose to print out any combination of the various Page Pro file formats, or you can choose to print out all of the Page Pro file formats that are on any particular disk.

In addition, our Page Pro Cataloger program prints out a "File Type Listing" so you'll always know what Page Pro files are on each of your disks.

If that wasn't enough, Page Pro Cataloger prints every page with ample space on each side of the page, making it easy to keep your pages in any full-page notebook. It automatically skips over your page perforations and prints each new category at the start of a new page, thus making it possible for you to catalog all of your disks without ever having to move any of your files.

## TI-BROKER

Raymond Frantz  
"Broker of 99/4A Stuff"  
Worldwide  
502 N. 51st Street  
Suite 2  
Phoenix, Arizona  
85006-6649

JUST A REMINDER.....I continue to BROKER TI stuff because I want to be satisfied to know that IF someone needs SOMETHING 4A that there's a good chance that I will be able to at least LEAD THEM TO IT through this non-profit effort. THIS IS NOT A BUSINESS!!!

If you have something to sell...let me know and I will list it here.

If you see something here you wish to buy...let me know and I will arrange the transaction and shipment to you.

I NEED SELLERS ALL THE TIME. GET RID OF WHAT YOU DON'T NEED, someone else just might need that item.

My mailing will be made about every other month as long as there is an interest.

Note: We will pass around a copy of Ray's most recent list at our next meeting on July 18th. (If you cannot attend our meetings - write directly to Ray, at the above address for a copy of his most recent listing.)

WANTED - Printer Control Code information for a Seikosa SP-1000AP printer
