JUST FOR FUN

By Ralph Schneider, author of SHIFTS88

Ever since Chris Schneider came out with his wonderful SHIFTS88 Newsletter I started having a strong desire to produce my own newsletter once again.

Back in the old days I was a member of the VALley of the Sun Tiggers (VAST) Users Group and really enjoyed the meetings, group bbs and the newsletter every month.

As time went on, I eventually became president of the group and newsletter editor. I really enjoyed being the editor and producing a newsletter every month - although it was quite a bit of work, it was a labor of love.

I started out using PagePro 99 and really got to know the program well. Using Page Pro, Page Pro Composer and other TI graphics and text programs I was able to push the TI to the limit with producing a newsletter. At least that was my opinion (and a few other people at the time). I wanted to rival newsletters that were being produced on PC Clones and Macs at the time and I think I accomplished that.

This publication is by no means meant to compete with the SHIFTS88 newsletter. Chris is doing a fantastic job reporting all the new things that are happening with our beloved TI-99/4A. What I am going to do is reprint information from our rich past that hopefully you will find interesting. At the very least, maybe somebody new to TI will read something they didn't know.

Anyway, I don't know how many issues of this little rag I will be publishing but at least I am satisfying the urge to compose another newsletter and put it to bed.
