NEW

NOW YOUR PRINTER BECOMES — A PRINT SHOP! — (You Asked For It!)

NEW

Add up to 17 type styles to your printer including, Roman, Old English, Greek and many many more. This interface will triple the value of your printer: Just plug in, easy to use.

StyleWriter makes your dot matrix printer perform like an expensive letter quality printer. Connecting the small StyleWriter unit between your computer and the printer lets you print letter quality documents with multiple typestyles and sizes.

StyleWriter is an 8085 processor and self-contained ROM-based software. StyleWriter works by intercepting the ASCII coded text sent by any computer program and converting it into a more sophisticated graphic representation before sending it on to your printer. The result is a totally transparent interface which quickly generates high quality text in a variety of typestyles. What's more, StyleWriter gives you an unparalleled degree of control over the text you print—whether it be individual characters or entire reports. Now you can control margins and even print double underlines and "inverse" characters with any word processor, text editor, DBMS, spreadsheet, or accounting program! No other product lets you be so expressive!

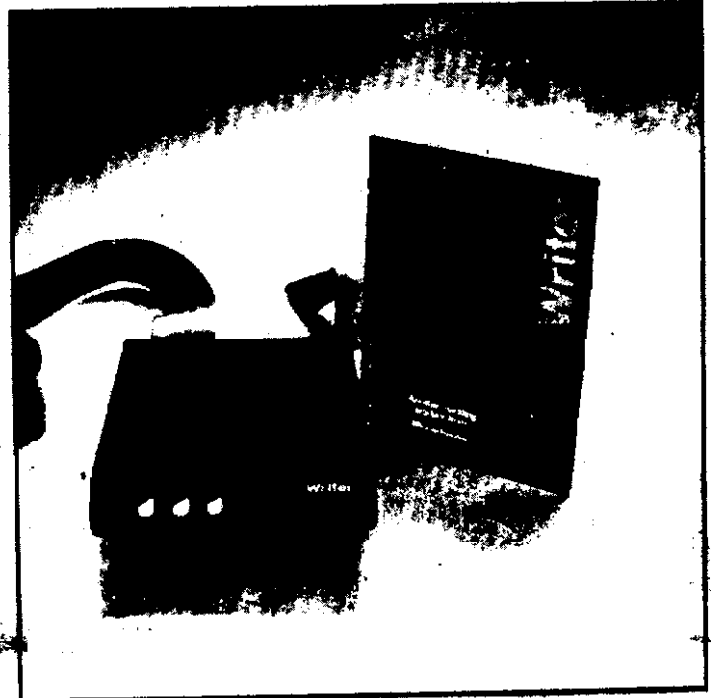

Ordinary print-control software is slow and confusing to use: first, you must save your document, then load the

your document, and finally, set the fonts before printing. Then you wait because ordinary software ties up your computer for prolonged periods of time while the documents are printing. StyleWriter eliminates these problems by providing up to 128K of print buffer so it can hold and process up to 65 average pages of text while you get back to work.

StyleWriter comes with three typestyles, and additional styles can be added simply by inserting them into the unit and selecting them from the keyboard. The following are some of the typestyles available:

- | | |
|-----------------------------|-------------------------|
| ROMAN (8-14pt) | CENTURY ITALIC (8-12pt) |
| ROMAN BOLD (8-14pt) | ELAN (10-14pt) |
| ROMAN ITALIC (8-14pt) | OLD ENGLISH (10-16pt) |
| SANS SERIF (8-12pt) | INVITATION (18pt) |
| SANS SERIF BOLD (8-12pt) | COURIER (10pt) |
| SANS SERIF ITALICS (8-12pt) | PRESTIGE (8pt) |
| CENTURY (8-12pt) | ITALICS (8-12pt) |
| CENTURY BOLD (8-12pt) | JAZZY (14pt) |
| | GREEK (18pt) |

The print quality is truly remarkable, and you can change from draft mode to letter quality and back again at the flip of a switch.

TO USE STYLEWRITER ALL YOU NEED IS

- Standard dot matrix printer
- Centronics printer interface (parallel)
- Parallel cables
- ANY SOFTWARE!
- Any Computer

COMMON QUESTIONS ABOUT THE STYLE WRITER

How does the stylewriter change your dot matrix printer?
Stylewriter works by intercepting the ASCII coded text sent by any computer program and converting it into a more sophisticated graphic representation before sending it to your computer. The result is a totally transparent interface which quickly generates high quality text in a variety of styles type.

Stylewriter will work with the following Printers:

NEW COMMERCIAL SOFTWARE

New, by special arrangement with a U.K. firm, these "lost hits" have been released. Our initial response confirms our expectations...this combo is a **Best-seller!** System requirements: 32K and Extended BASIC. All three games are packaged on one convenient disk.

COMPUTER WAR

Based on the hit movie "War Games" ... the alarm bells are ringing at NORAD! Crack the code and destroy the simulated enemy missiles before the world is engulfed in a thermonuclear holocaust!

RIVER RESCUE

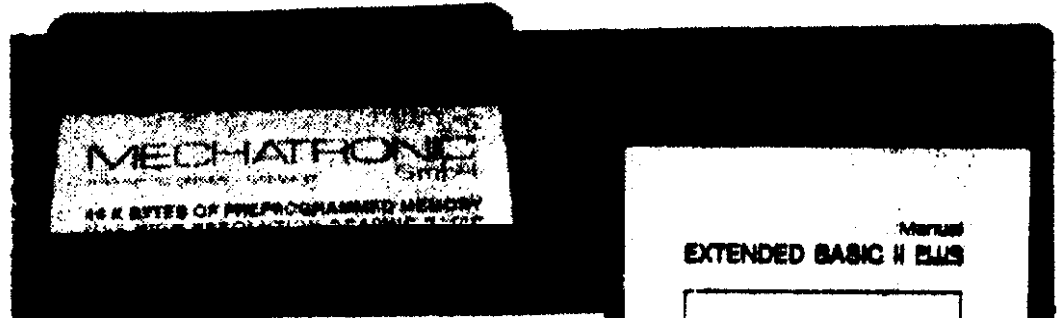

Save a group of helpless refugees who are trapped between a fierce battle and a raging river. High speed action.

SUBMARINE COMMANDER

One of the best submarine simulations ever created for a home computer ... the submarine patrol mission must hunt down and destroy enemy ships.

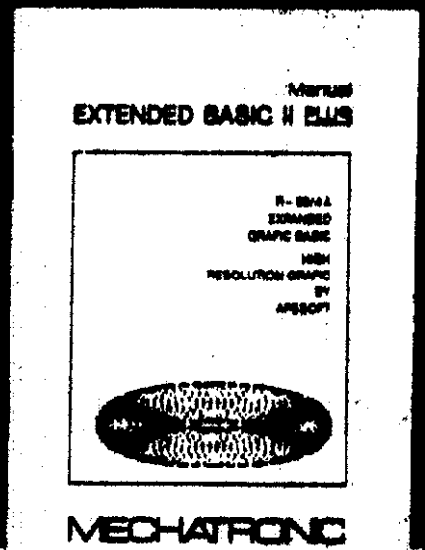

EXPANDING YOUR TI WITH MECHATRONIC

Powerful New Extended BASIC from Mechatronic

Incorporates all TI Extended BASIC commands plus new Graphics Commands!

EXTENDED BASIC II PLUS from Mechatronic starts off just like TI Extended BASIC — all of the same commands, functions, etc. It will run all of your software that requires TI Extended BASIC. So where does the "Plus" part of the name come from? The innovators at Mechatronic have built in both an extended statement set and a novel graphics mode. The extended statement set includes handy functions like a screen dump command, a delay command, a function that disables the CLRT key, and many others. The graphics mode adds 48 powerful routines to let you do almost anything you want using high resolution graphics. Functions include WINDOW, MOVE, TURN, RECTANGLE, CIRCLE, ARC, ELLIPSE, AXIS (for graphs), WRITE (for TEXT), and dozens more. A powerful and versatile package. Use of graphics functions requires
