OMPRODINE

PRODUCT CATALOG

FALL 1990

COMPRODINE attempts to bring you the best user friendly software that it can. With the many system configurations and variety of printers some may cause problems. Please call if you have a problem as many can be solved over the phone. We do offer a 30 day money back guarantee for those that can not be solved.

GAMES

WAR ZONE - $10 - 1989 by Quinton Tormanen

This all assembly war game with fast arcade action has a built in demo to show the amazing graphics and scoring. Joystick controlled, you fly an F-15 fighter to recover your lost territory. You must shoot down many aircraft, bomb many ground vehicles and destroy many bases on your journey over different terrain. All time high scores are saved to disk. You may choose to continue at the level you lose at but your score is reset.

LIVING TOMB - $15 - 1989 by Quinton Tormanen

This 100% assembly, joystick controlled, Adventure game likewise has a built in action demo to step you through the halls of the tomb and introduce you to the many creatures and traps you will encounter. Pop up windows let you select and control your steps. The 3D graphics are great. Even when you lose, you will get a score and a chance to make it to the all time top 10 list on disk. With the excellent animation, speech, sound and 3 level random tomb even if you can solve this adventure you will want to go back to improve your score and see the exciting final animation scene when you win.

BACKSTEINE - $10 - 1990 by Quinton Tormanen

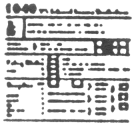
This is another fantastic entry from the 15 year old wonder. He has taken the old Break Out type game into the 90's with this masterpiece. Adding moving targets (that help your score but redirect your ball) and hidden dropping bricks (that if you catch them give you 6 different powers)would be enough for most. Not for him. 50 different screens with beautiful graphics and a great scoring table wasn't enough. He also added for your convenience a built in Icon driven editor you must see to believe. Change the colors, move the blocks, set the hidden specialty blocks and even play in edit mode to try it out. Change 1 screen or all 50 and Save them to disk under your filename and Load them back when you wish. You may even swap screens so another screen will come up first.

BINGO - $5 - 1987 - by Rodger Merritt

Simple game - simple choices - simply fun! This is a Hybrid of assembly and XBasic. Prints Bingo cards faster than 1/minute. Calls(speech) each number selected and displays it also. Displays total numbers called and lists all numbers. Displays 2 random boards and the computer marks those boards so you can play paperless BINGO against the computer or another person. You may pause the game, start over, print a winning screen with the persons name or give the winner a thunderous ovation with clapping.

BUSINESS

FORM SHOP - $15 - 1988 by R. Merritt/Steve Mehr/Gene Bohot



This utility allows you to create on screen any form and then print that form. This is a WYSIWYG process meaning you actually see the form of single, double lines and boxes. You may place your text within anywhere. This also works well for Calendars, Maps, Flowcharts and Graphs. You may use the TI-WRITER editor and formatter included or use Funnelweb, BA-Writer, MyWord or the original TI-WRITER. Since this works with the word processor it is easy and can utilize your printers NLQ print. Included is a Gemini 10X version, a graphics version for Epson style printers without the IBM char set and an IBM version for newer printers to get a NLQ form also.

REMINDERS - $10 - 1990 by William Gaskill

This is a datebook memo manager. It can help you keep track of anniversaries, birthdays, daily appointments, grocery store coupons, historical events and anything else that involves dates, either future or past. Memos may be up to 19 lines each. You may browse through them or search any span of dates. You may print a monthly calendar. Disk catalog and delete functions are also included.

EXTENDED BUSINESS GRAPHS - $10 - 1985 by Great Lakes

This program takes your data and creates Pie Charts, X/Y Graphs and 3D Linear Charts. You can then save these graphs to TI-ARTIST picture format or print them out in small/large single/double density. Fast, easy, fun and great results at a great price.

CLASS - $10 - 1988 by William Harms

A CAD (computer aided design) type program that utilizes the Draw and Plot features of the Super Extended Basic module that is required. Built in formulas create different signs, letters, gears, shapes (on screen) based on the parameters you have given it. The results may be printed or saved to TI-ARTIST picture format.

GRAPHICS PROGRAMS

PIXEASE - 1990 by Rodger Merritt

Over 2000 high resolution pictures (70 per disk) ready to use in any TI-WRITER Editor (Also Funnelweb, MyWord, BAWriter, FORM SHOP or others). These pix, 3/4 inch square, will print on any Epson compatible printer. The pictures can have text above them and below them on older printers and even beside or on top of on newer printers. You may even print PIXEASE beside each other or on top of each other for special effects. Each picture file takes 19 lines in the editor and up to 40 pix may be loaded at one time. The resulting pix takes 5 lines by 8 columns. 1 code changes the left margin of the pix(margin code chart and instructions included). You may put your pix in first and add your text around them. If you have a newer printer(NX-1000 e.g.) you may follow the "*READ/ME" file on each disk to discover how easy it is to add pix anywhere even after you type your text. You may even format your text back to disk then add them.

FEATURES

1 Over 2000 High Res pix (30 disks 70 each)
2 Prints from TI-WRITER Editor with PF and PIO
3 Text may be above and below on all printers
4 Text may be on left and right on newer printers - built in Reverse Line Feeds returns to top of pix
5 PIX print in 10 seconds
6 PIX may be saved to disk with text
7 Load PIX each by its own name and name is in file
8 Color code may be added to each pix(color printers)
9 NLQ text is unaffected
10 Left margin code easily changed to place pix - built in reset to margin 0
11 Don't let your letter leave home without them
12 Each disk comes with Printout of pix and docs

Highly enhances any document you add them to as you can see.

ARTIST PRINTSHOP - $25 - 1989 by Paul Coleman

This program uses TI-ARTIST Fonts and Instances directly to make the quickest and most professional Signs, Flyers, Banners and Letterheads in the TI world. The Letterheads and Flyers have been improved with a Double Density Double pass output for great copies. The Banners print in Double Density for good results. This is a very user friendly prompt driven program that with the 20 page book and a 2 hour learning curve you should be able to produce very impressive Letterheads in 5 minutes(1 min print time), Flyers in 15 min (5 min print time) or Banners (3 feet in 15 min). The Banners program will magnify Fonts and Instances (your choice) up to the size of the 8 in. page using any Font and pix. May be before, after or both. Letterheads will have 1 large Font line and 3 small Font lines with pix before, after or both. It can be printed as a header or footer with or without a line. Flyers utilize any size large Font and a 1 char high small Font. Up to 5 Instances any size may be used in a Flyer and used as many times on that Flyer as you wish. You may choose a row of pix or pix next to the text. Both Fonts and Instances may be single or double sized to give you variety and very large text.

FEATURES

1 BANNERS

a Uses Fonts and Instances
b Fast dark printout
c Auto-center or Tab picture to margin
d May make multiple passes by using Tab
e Magnify up to full page
f Proportional spacing

2 LETTERHEADS

a Uses Fonts and Instances
b Fast dark Double Pass Double Density printout
c Instance left, right, both or neither
d Pix may be Mirrored
e May be Header or Footer
f May have line or no line
g Choose number of copies
h Auto-centers text with page and pix
i Proportional spacing

3 FLYERS/SIGNS

a Uses Fonts and Instances in single or double sized for larger results
b Fast dark Double Pass Double Density printout
c Text is proportional and auto-centered on page
d Up to 5 pix/flyer and may be used more than once on flyer
e May have row of pix or mix pix and text
f Pix may be Mirrored
g Save to disk and only about 20 sectors
h Print with any of 13 included borders
i Choose number of copies
j Print time about 5 minutes

BORDER MAKER - $10 - 1990 by Paul Coleman

This program utilizes TI-ARTIST to create new borders for Artist Printshop. You may choose a Simple Border of a 3 by 3 char instance which the program will convert to a border file with that pix all the way around. A Super Border can have each corner and each side totally different. TI-ARTIST templates are provided to guide you. You then save them as an Instance and run them through this program and in about a minute you have a new border.

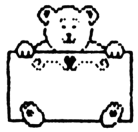
ARTIST CATALOG - $10 - 1990 by Paul Coleman

One of the simplest most useful programs you can buy is here. You choose Fonts or Instances and this program catalogs the disk and fills page after page with Instances or Fonts. In alphabetical order the Instances print as many as can fit on a page (up to 100) and then skip the perforation and use the next page until all are printed. With each picture is the filename and size (10R x 12C). At the Top of page 1 is the disk name. Fonts, including filename, are printed one after another in entirety also skipping over the perf. Once you see your collection and know where to find them they will become much easier to use.

GIANT ARTIST POSTERS - $15 - 1989 by Paul Coleman

GAP uses full screen TI-ARTIST Instances to make posters in 9 sizes from 10 inches by 14 inches to 5 feet by 7 feet (print time 8 minutes to 3 hours). You may even have 2 side by side to make 5 feet by 14 feet to get that message across. Documentation details paper to be used and time to print. No cutting. Just overlap and glue or tape rows of paper. Perforations will allign for easy folding.

COLOR CARD - $25 - 1989 by Rodger Merritt/Adrian Robinson



This program is a WYSIWYG program that print 4 fold greeting cards. When loaded in memory it is complete with 2 large fonts, 7 small fonts and 45 borders that can be cycled and selected in seconds. The front of the card may also contain CSGD/GR pictures of which 69 are provided on disk. Text and graphics may be placed anywhere, shifted, deleted or overlayed. Results may be saved to disk. While able to see the card being created on 4 screens, and with the handy prompt line at the bottom, you can quickly design and print a card in 15 minutes. With a color printer you choose the colors on screen, and those colors will be printed.

JIFFY CARD - $15 - 1989 by Rodger Merritt
Virtually identical to the Color Card program, this version does not have the capability to print in color or change screen colors.

CARDS 4ALL OCCASIONS - $10 - 1989 by Rodger Merritt
13 Cards on disk for the Color Card or Jiffy Card programs. Many holidays and special occasions are represented and exemplify the creative possibilities of these programs. Simply load, add your name and print.

COLOR FLYER - $20 - 1989 by R. Merritt/Adrian Robinson
Similiar to Color Card, only 2 screens are used to create a full page flyer in your choice of 7 colors for a 5 color flyer.

JIFFY FLYER - $10 - 1988 by Rodger Merritt
The same as Color Flyer without the color printout.

CARD/FLYER GRAPHICS - $10 - 1989 by Rodger Merritt
2 New Large Fonts and 48 more CSGD/GR pictures for Color/Jiffy Card/Flyer owners. Included is a border maker program and 40 new borders that may be merged or entered while using. Many of these borders were courtesy of Sister Pat Taylor and Deanna Sheridan.

CSGD GRAPHICS - $8 - 1990 by William Nelson
127 CSGD/GR pictures for users of Jiffy or other programs that use these pictures.

PICTURE IT - $10 - 1987 by Rodger Merritt
This program converts Instances 3 ways. Instances (only top 12 rows by 32 columns) may be magnified and printed to banner. A font is also provided to give you text. Instances may be displayed on the screen (size limitation varies) and saved to an XBASIC merge format so that you may display Instances in your programs or have an easy fancy title screen. Most people use this program to convert Instances (for letterheads) to a TI-WRITER format. This output is double density (others are single density) and prints 5 times as fast as previous converters.

PRINT IT+ - $13 - 1986 by Rodger Merritt

The first Docu-Printer to print a TI-WRITER file in a graphics font. Later the capability of printing an Instance with it. More than 100 built in pictures could also be printed. Banners can also utilize the 7 fonts and 100 pictures. Titles could also be created with these tools. A very handy disk catalog printer to print on labels is also included. Finally, a great designer program is provided to create new fonts or pictures.

JOYPAINT 99 - $10 - 1986 by Great Lakes
Once nearly $50, this excellent drawing program is very easy and fun to use. Gives fine, quick printouts and with Joypaint Pal is compatible with other drawing programs.

JOYPAINT PAL - $10 - 1988 by Great Lakes
Adds new drawing features to Joypaint as well as allows compatibility with TI-ARTIST and GRAPHX.

CLIP ART DISK #2 - $10 - 1987 by Great Lakes
Additional artwork and fonts for Joypaint 99.

CERTIFICATE 99 - $10 - 1987 by Great Lakes
The ultimate Certificate maker for the TI. Easy and very professional with 6 fonts, 12 borders and 24 pictures.

CERTIFICATE 99 COMP I - $10 - 1987 by Great Lakes
6 more fonts, 12 more borders and 36 more pictures for CERT 99.

CERTIFICATE 99 COMP II - $10 - 1988 by Great Lakes
12 new borders and 96 new pictures for CERT 99.

CERT 99 GRAPHIC COMP - $10 - 1990 by William Nelson
168 new pictures for CERT 99.
